

B BRIDGEPORT[®]

TRANSITION FITTINGS PRODUCT BROCHURE

FITTINGS THAT SOLVE PROBLEMS FOR CONTRACTORS

Bridgeport's 5157-DC is a duplex MC to compression 3/4" EMT transition coupling that is ideal for government and school projects requiring the use of compression style fittings. Our extensive line of transition fittings are designed to solve common problems that contractors run into on the job site, like coupling together dissimilar systems. In their broadest application, transition fittings convert two different types of raceway while maintaining the appropriate physical strength and electrical continuity as required by the National Electrical Code. Bridgeport understands what contractors need to safely and quickly transition between systems with uncompromised code compliance. Our expertly designed, agency listed products allow you to do this faster and easier than ever before.

NEW!

PUSH LIQUID TIGHT TRANSITION COUPLINGS

Push On Nonmetallic transitions couplings for use with nonmetallic "Type B" liquid tight conduit and Rigid Conduit. Connectors simply push onto LT conduit and threaded onto Rigid/IMC Conduit. Sunlight resistant. NPT Threads.

NEMA TYPE 2, 3, 3R, 4, 4X & 12

MIGHTY-MERGE® RAIN-TIGHT EMT TO RIGID COMBINATION COUPLINGS

Used to join rigid to EMT. Coupling internally threaded for rigid/IMC. Compression type for EMT. "Raintight." Patented. US Patent 7,390,037

cETLus Listed

280-DC
280-DCX

EMT TO RIGID TRANSITION COUPLINGS

Used to join rigid or IMC to EMT. Coupling internally threaded for rigid/IMC. Compression type for EMT. Concrete-tight. UL File No. E9391: 292-MS

290-MS

EMT TO FMC TRANSITION COUPLINGS

Used to join EMT to flexible metal conduit. Screw-in end for flex. Compression end for EMT.

UL File No. E9391, also 581-DC UL listed for use with XRW FMC.
