

BRINGING **INNOVATION**  
TO THE **JOBSITE**

Bridgeport's 5157-DC is a duplex MC to compression 3/4" EMT transition coupling that is ideal for government and school projects requiring the use of compression style fittings.

**Fittings that solve problems for contractors.** Our extensive line of transition fittings are designed to solve common problems that contractors run into on the job site, like coupling together dissimilar systems. In their broadest application, transition fittings convert two different types of raceway while maintaining the appropriate physical strength and electrical continuity as required by the National Electrical Code.

Bridgeport understands what contractors need to safely and quickly transition between systems with uncompromised code compliance. Our expertly designed, agency listed products allow you to do this faster and easier than ever before.

## NEW FROM BRIDGEPORT

### Push Liquidtight Transition Couplings

**Push On Nonmetallic transitions couplings for use with nonmetallic "Type B" liquid tight conduit and Rigid Conduit. Connectors simply push onto LT conduit and threaded onto Rigid/IMC Conduit. Sunlight resistant. NPT Threads.**

**NEMA TYPE 2,3,3R,4,4X &12.**
