# FEATURRED

# S98™

The S98 is an eccentric, titanium, and fully-welded suppressor designed for 9mm handguns. Because it's eccentric, the bore sits below the shooter's line of sight for a clean look and unimpeded sights. The S98 is a premium suppressor with incredible sound performance, especially considering its lightweight construction.

The S98 is rated for 9mm handguns only. It ships with a 1/2 x 28 QD Mount, (AC22 not compatible).

The Scythe-Ti is SilencerCo's first all-titanium suppressor. Its performance was so impressive that it's now joined by a stainless steel version. The Scythe-STM gives shooters the option for modularity and extra durability while keeping the same sleek Scythe design. Both are rated for up to .30 caliber and optimal for hunting and long-range shooting.

# SPECTRE

The Spectre 9 Series is a titanium collection of suppressors designed for pistols and subguns. The Spectre 9 is extremely lightweight and compact for minimal impact. It's a great option for personal protection, low-visibility applications, or days at the range.

# VELOS LBP

The Velos LBP uses a low back-pressure technology to reduce overall blowback while maintaining impressive sound suppression. The Velos LBP is constructed of a 3D printed inconel 625 core fully welded to 17-4 stainless steel front and rear modules, making this product unlike anything else on the market. It is also full-auto rated and the most durable suppressor SilencerCo has ever made. Options include the Velos LBP 556, Velos 556 K, and Velos LBP 762.

### Velos LBP 556K

The Switchback 22 keeps rimfires ultra-quiet with the added benefit of modularity. It has four different configuration options including pistol- and rifle-specific optimizations. The Switchback is the quietest rimfire silencer on the market.

# SWITCHBACK™

# LOUISIANA GATORS

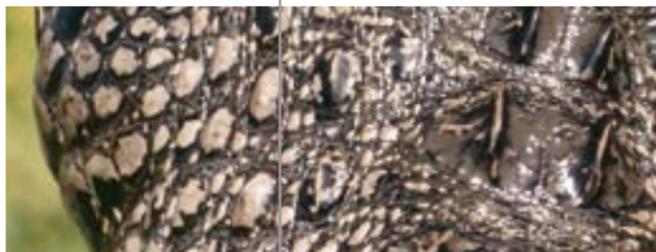

**When people think "Louisiana," they picture hurricanes, gators, LSU, Tabasco, and swamps—and sure, that's all true. But after being there in person, Louisiana means something completely different to me now.**

my lightweight evening scarf

LATER GATOR

After knocking down three coyotes with thermals and a buffet of calibers, our buddy and guide Quaid wandered into his sugarcane field, broke off a stalk, sliced it up with his pocket knife, and handed us each a piece.

One chew in, it hit me: this place is rad.

Southern Louisiana is a sportsman's paradise—flat-out magical. And the people? Quiet, polite, tough as nails, and the kind who'd hand you the shirt off their back without making a big deal of it. Rare these days. They're proud of their little square of the map—and they should be.

Last year we went down twice: once for nutria (too fun to be legal) and once for gators and coyotes. Will from ZEV Technologies and Kyle from Persistent Systems joined MEM, Justice, and me. Nutria hunts usually mean rolling deep with a big crew, but schedules didn't line up, so we ran light—and it turned out perfect.

After a quick zero check (and a few incidental rabbits and nutria), we loaded into the boats. Will ran a ZEV 5.56 with a Velos LBP 556K, MEM had a Q Mini Fix with a Scythe-STM, and I was shooting a SIG Spear 5.56 with a Scythe-STM. We were both running Flat .224 front caps. Shockingly quiet. It was past sundown, so we ditched night vision and went old-school with white lights and lasers. As we blasted swamp critters, our guide Cole set gator lines. Cole's a good one—patient enough to deal with our chaos and sharp enough to keep us out of trouble.

# Breakfast was instantly cancelled.

With lines set, we headed in to eat and crash. Morning came early. Breakfast was mid-storytelling when one of Cole's buddies rolled up and said, **"We've got a monster on the line."**

We tore out to the spot. Sure enough: a 10'3" prehistoric unit thrashing on the hook. I was up first. I hopped onto shore, pressed the STM to the dome, and one Hornady 35gr .223 later, lights out. We dragged that dinosaur up, and Cole insisted I shoulder it for the photo. With a group assist (and questionable spinal decisions), we got it done.

## One perk of suppressors: you can actually hear the environment around you... even if it's trying to eat you alive.

We still had tags, so the bloodlust kicked in—what's next? MEM was up; he'd never killed a gator. But the next few lines were empty. Heat rising, mosquitoes humming like old refrigerators, sweat everywhere.

Eventually Will spotted a thrashing gator. MEM had a tougher angle—dense brush and a moving boat. His first shot hit but didn't shut things down, so he racked another and finished the job. Boots and a belt incoming.

We rolled in for lunch, dehydrated but stoked—until we got cell service.

Cole looked at his phone and said, "Guys... they shot Charlie Kirk."

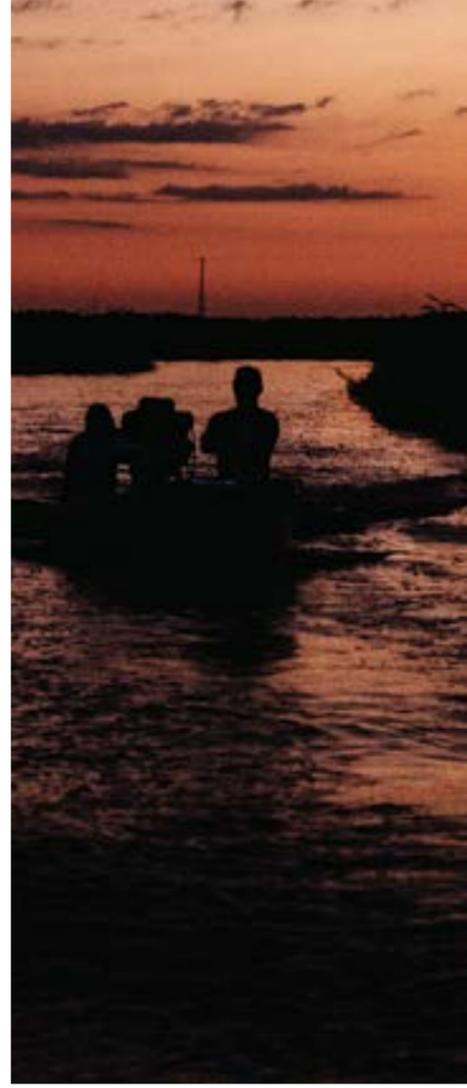

Everything stopped. We went inside, turned on the TV, scrolled social. The mood flipped instantly.

More information came out. Videos surfaced. My wife texted, "My nephew was 30 feet away when it happened." Total disbelief.

The energy of the morning evaporated. Silence. Anger. Sadness.

We finally decided to go into town for tackle just to break the spell. Back at camp, we sat on the dock with shrimp on hooks, catching small catfish and letting them go. Conversations came in short bursts. Mostly quiet.

The next morning we got back on the boats. Everything felt different, heavier. Midday we launched from a new spot to hit the back of Cole's property. Not much talking—just pointing when someone saw movement.

Then we spotted the gator. A giant. Easily over ten feet. Energy shot straight back through the group. Will was up, and with one clean shot he dropped the biggest gator of the trip.

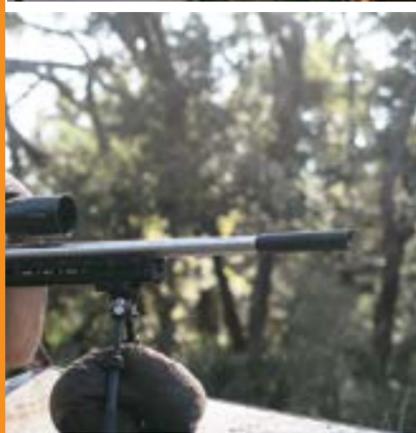

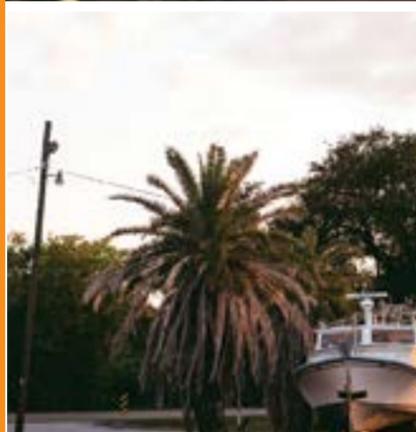

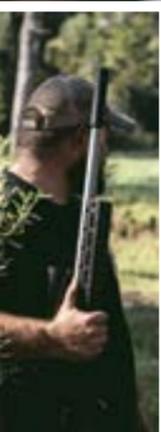

**Smiles returned.  
Trash talk resumed.  
Nature's therapy doing its thing.**

We tagged a few more, including one with a ZEV OZ9/S98 combo—tasty, for the record.

And somewhere in the middle of the heat, the mozzies, the gun smoke, the adrenaline, and the heartbreak, something clicked. The assassination rocked all of us in different ways. It'll stick with me forever. But being outside with friends in a place that's as brutal as it is beautiful... it heals you.

We aren't meant to sit behind screens and machines all day. We're built for dirt, sweat, water, sun, challenge, and camaraderie. I took a college class—The Challenges of Leisure and the Outdoor Experience—fully expecting an easy A. I got a B- and a life lesson: time outside with your people will make you better.

You don't need to drown your feelings or numb them. The outdoors has a way of putting you back together—if you let it. And SilencerCo? Our whole purpose is to help you experience all of that more clearly, more intensely, and just... more.

# LEGGIACY

**SKU SU5400 CAL .223 REM/5.56 NATO to .300 WM**  
**L 6.98" W 12.6 oz D 1.57"**

The Omega 300 DT is a lightweight, full-auto rated .30 caliber suppressor optimized for performance and utility. This suppressor is ready for carbines, hunting rifles or precision rifles. It ships with the anchor brake installed for minimum recoil.

# OMEGA<sup>TM</sup> 300

# OMEGA<sup>TM</sup> 36M

**SKU** SU4735 **CAL** 5.7MMx28 to 9MM / 5.56 NATO  
to .338LM & up to 350 Legend  
**L** 4.90 - 6.85" **W** 9.8 - 12.5 oz **D** 1.57"

The Omega 36M is the perfect fit for most shooters. It is compatible with pistols, submachine guns, and rifles without sacrificing performance. The two-piece modular design allows for the removal of the front section. This gives shooters the option for a shorter and lighter suppressor while maintaining impressive sound suppression. Both configurations are full-auto rated. The Omega 36M is compatible with a variety of Charlie accessories from front caps to mounts, so you can maximize suppression for each firearm and caliber.

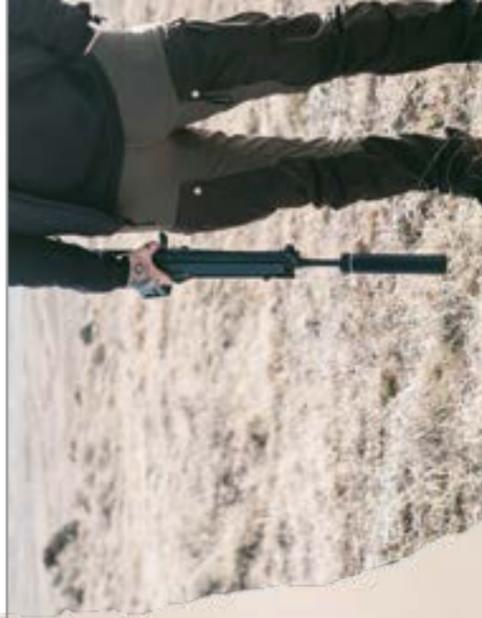

**SKU** SU5107  
**CAL** 9MM to 45 ACP / 5.56 NATO to  
 .45-70 GOV & up to .338 LM  
**L** 5.78 - 7.72" **W** 12.2 - 14.9 oz **D** 1.57"

The Hybrid 46M is a modular centerfire rifle suppressor with the versatility to use on most rifles, pistols, and submachine guns. The Hybrid 46M allows for the removal of a front module which provides the shooter with a shorter and lighter suppressor body still capable of effectively suppressing all centerfire pistol cartridges as well as rifle offerings as large as .45-70 GOV and .458 SOCOM. If you are looking for a highly versatile, multi-caliber suppressor, the Hybrid 46M is the answer.

# HYBRID<sup>®</sup> 46M

# HYBRID 46 DT

The Hybrid 46 DT is capable of accommodating a majority of the applications expected of a truly versatile suppressor. The Hybrid 46 is both full auto and magnum-rated and can be used on pistols, submachine guns, and rifles. The Hybrid 46 DT is rated down to 16" barrels for .45-70 GOV, 8" barrels for .458 SOCOM and down to 18" barrels for all magnum calibers up to .338 LM. With a number of compatible accessories available, you can turn the Hybrid 46 DT into the perfect silencer for any demand.

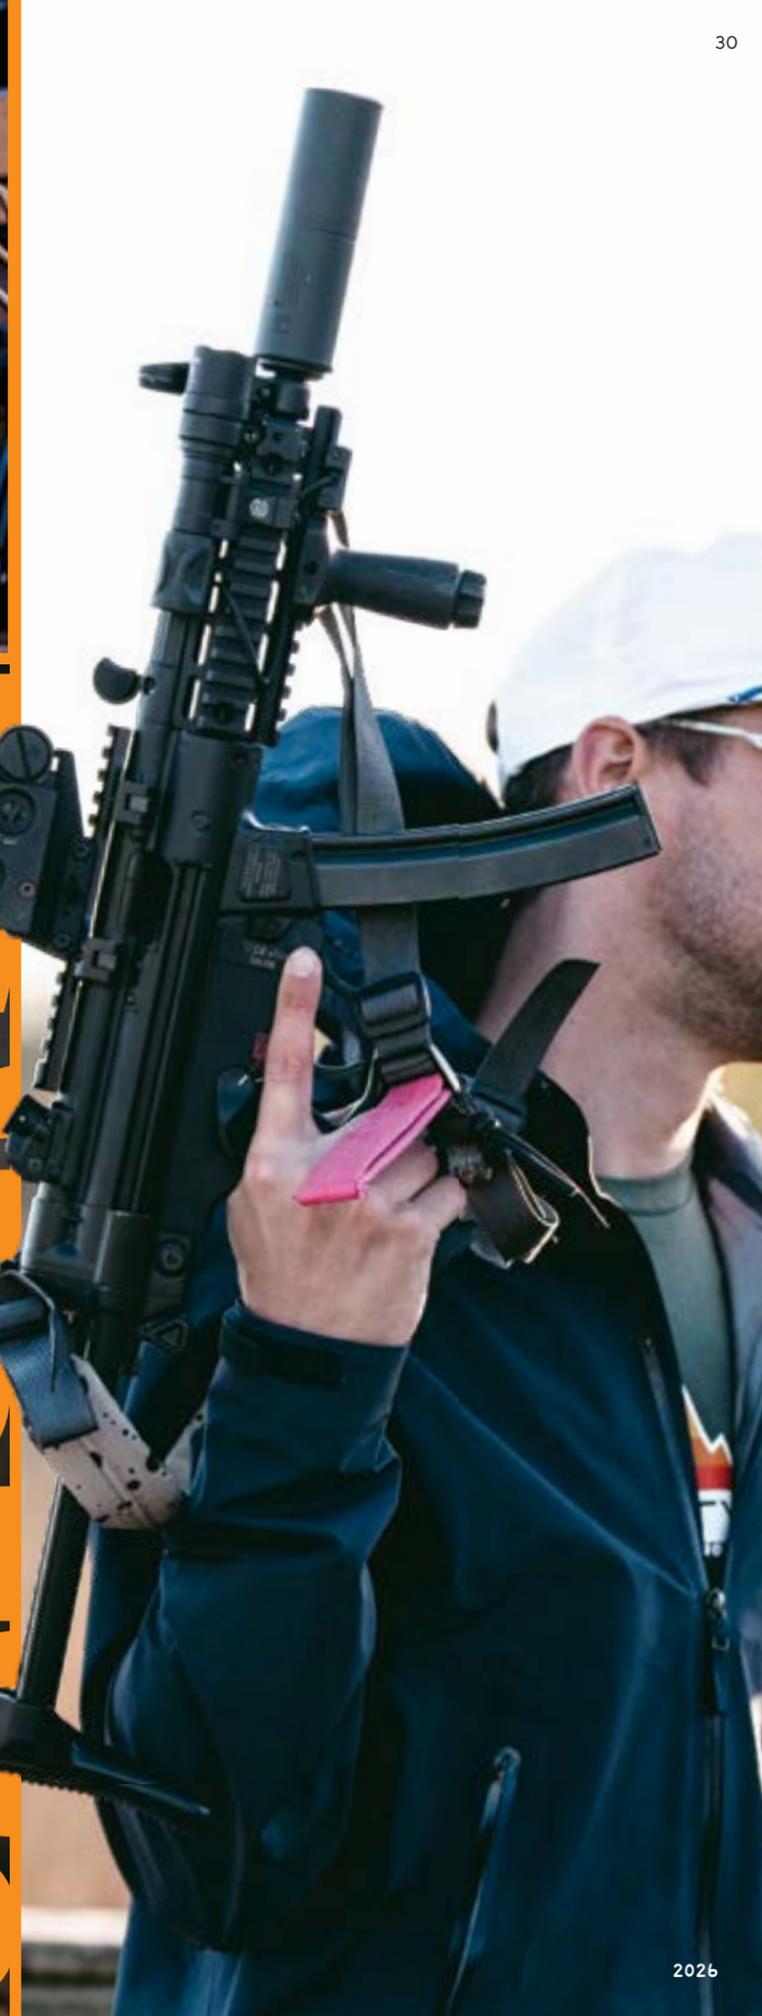

**SKU** SU5401  
**CAL** 9MM to .45 ACP / 5.56 NATO to .45-70 GOV & up to .338 LM  
**L** 7.61" **W** 14.1oz **D** 1.57"

ultimate joy

The Omega 9K is lightweight and compact with impressive sound reduction. The simple yet robust tubeless construction makes it an attractive pistol suppressor for a wide range of shooters. Full auto rated and ideal for use with pistols and submachine guns, the Omega 9K offers extreme durability and performance in a compact package.

**SKU** SU1544 **CAL** 9MM & 300 BLK  
**L** 4.54" **W** 7.3 oz **D** 1.48"

**OSPREY 9**

**SKU** SU5184 **CAL** 9MM & .300 BLK Subsonic  
**L** 7.06" **W** 8.8 oz **D** 1.30 X 1.75"

**L** 8.06" **W** 9.2 oz **D** 1.30 X 1.75"

The Osprey is uniquely designed in a polygonal shape to allow for greater internal volume and better overall sound suppression. Due to the shape, the Osprey also sits below the shooter's line of sight, thereby not impeding standard pistol sights. The updated version added a push-button locking system for quick and repeatable indexing. All of these features combined make it one of the sleekest and most iconic pistol suppressors on the market. The Osprey comes in the Osprey 9 and Osprey 45 options.

# OSPREY 2.0

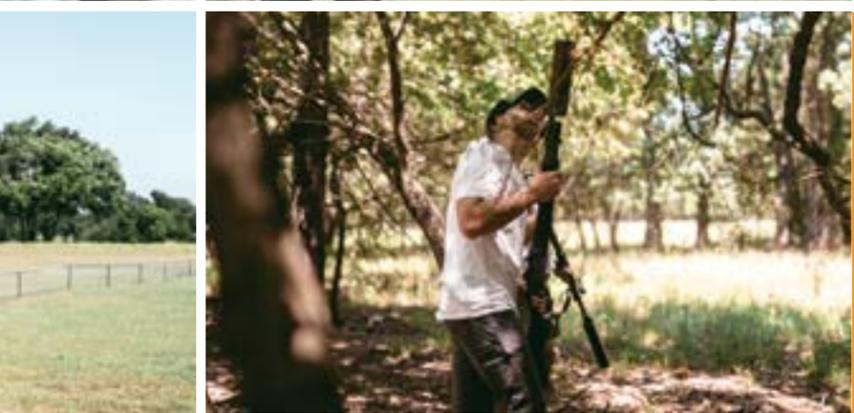

YONDER!

# SPARROW™ 22

The Sparrow 22 is the first suppressor SilencerCo ever made – and still one of the best. It's user-serviceable for easy cleaning and ultimate longevity. It's also rated for full-auto fire on .22 LR.

**SKU** SU75 **CAL** .22 LR, 17 WSM, .17 HMR, .22WMR, .22 HORNET, 5.7X28MM  
**L** 5.08" **W** 6.5 oz **D** 1.07"

just taking a rest...

The Salvo 12 is a modular shotgun suppressor. It is designed to operate with most pump action and semi automatic shotguns. At its full length of 12.5", the Salvo 12 brings sound down to an average of 136.8 dB at the muzzle with #7 shot.

It's configurable to 6", 8", 10", and 12" lengths making it possible for you to optimize the weight and length of your Salvo 12 for sporting clays, waterfowl, turkey hunting, home defense, and many other applications.

**WHEN YOU BUILD  
THE MAN, THEY'LL**

**BUILD THE  
COMPANY**

**BOSS  
HOSS**

I was out gathering content for an upcoming SilencerCo product with Jonathon in Wyoming. We were humming along, dropping prairie dogs while giggling like school kids every time the .22-250 turned a living creature into a twisted, bloody stump. On hunts like that, you take down about ten to twenty dogs before moving to the next spot.

We paused for a moment, everyone glassing the hills ahead, when I glanced at Jonathon. "Jon, you gonna head out with us again?"

"Yeah," he said, "but without all the camera equipment."

Puzzled, I replied, "But that's what we do. We make content."

Jonathon didn't hesitate. "Your job is to be out here hunting, pulling the trigger, and doing the thing."

I had no comeback.

**IT TOOK MONTHS FOR THAT  
MOMENT TO STOP RATTLING AROUND  
IN MY HEAD BEFORE I FIGURED OUT  
WHAT HE MEANT.**

Most companies build a product to fill some perceived market gap. A bunch of guys with notepads—who've never done the thing themselves—huddle up, crunch numbers, and decide it's a goldmine because they know how to make it.

For us, it's as easy as: a new rifle shows up in a fresh caliber. We haul it to some BLM land for testing. We pore over the DOPE and suddenly we're hooked—"This round is rad." It spirals from there—hunt after hunt—and before long, Jon's firing off 3 a.m. texts with ideas for a new suppressor. Next, it's a whirlwind of iteration, destruction, more iteration, destruction, sound tests, building new jigs, and repeat. After a few more trips and endless loops back to that same BLM spot... a product is born.

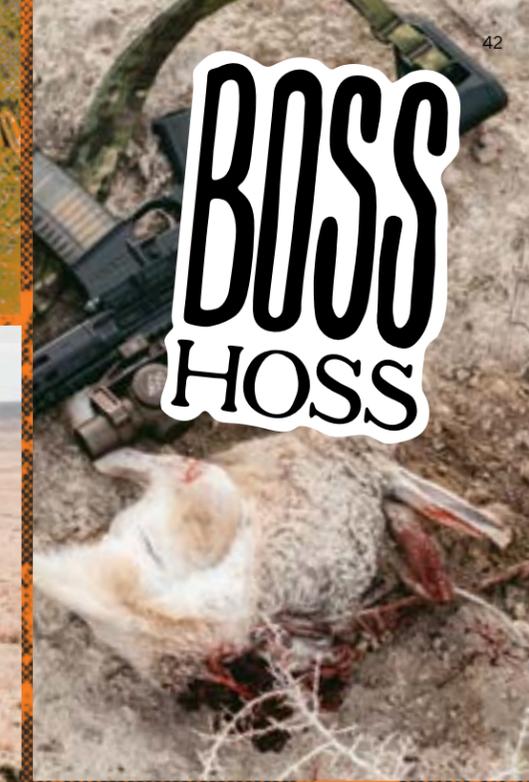

What Jon was really saying wasn't to ditch the camera gear and just shoot prairie dogs. What he meant was your job is beyond the scope of tangible skills. Your job is your passion, and your passion fuels your job.

He meant let passion steer the ship—it can lead anywhere: the spark for our best content yet, the next big product idea, or a fix for the latest problem. He was urging me to stay curious, to stand apart from the rest. "Your job is to be out here hunting" was his way of keeping a promise—to himself, to me—that SilencerCo stays different.

Driven by folks who just don't know how to turn off that switch that says, "worry about it later." The ones who get a sniff of an idea, and that same day a wall is full of drawings and a part is 3D printed.

It's hard to explain it to people that don't operate this way. They look at us and go, "must be nice." The part they're missing is the endless pursuit. Imagine every time you went to the grocery store, you became obsessed with cooking a Michelin Star worthy meal. The endless pursuit has led us to never take the conventional approach.

**IT ISN'T JUST SOME NUMB CORPORATE GIG WHERE YOU FILL OUT SPREADSHEETS OR CHURN OUT SOME MEANINGLESS BULLSHIT.**

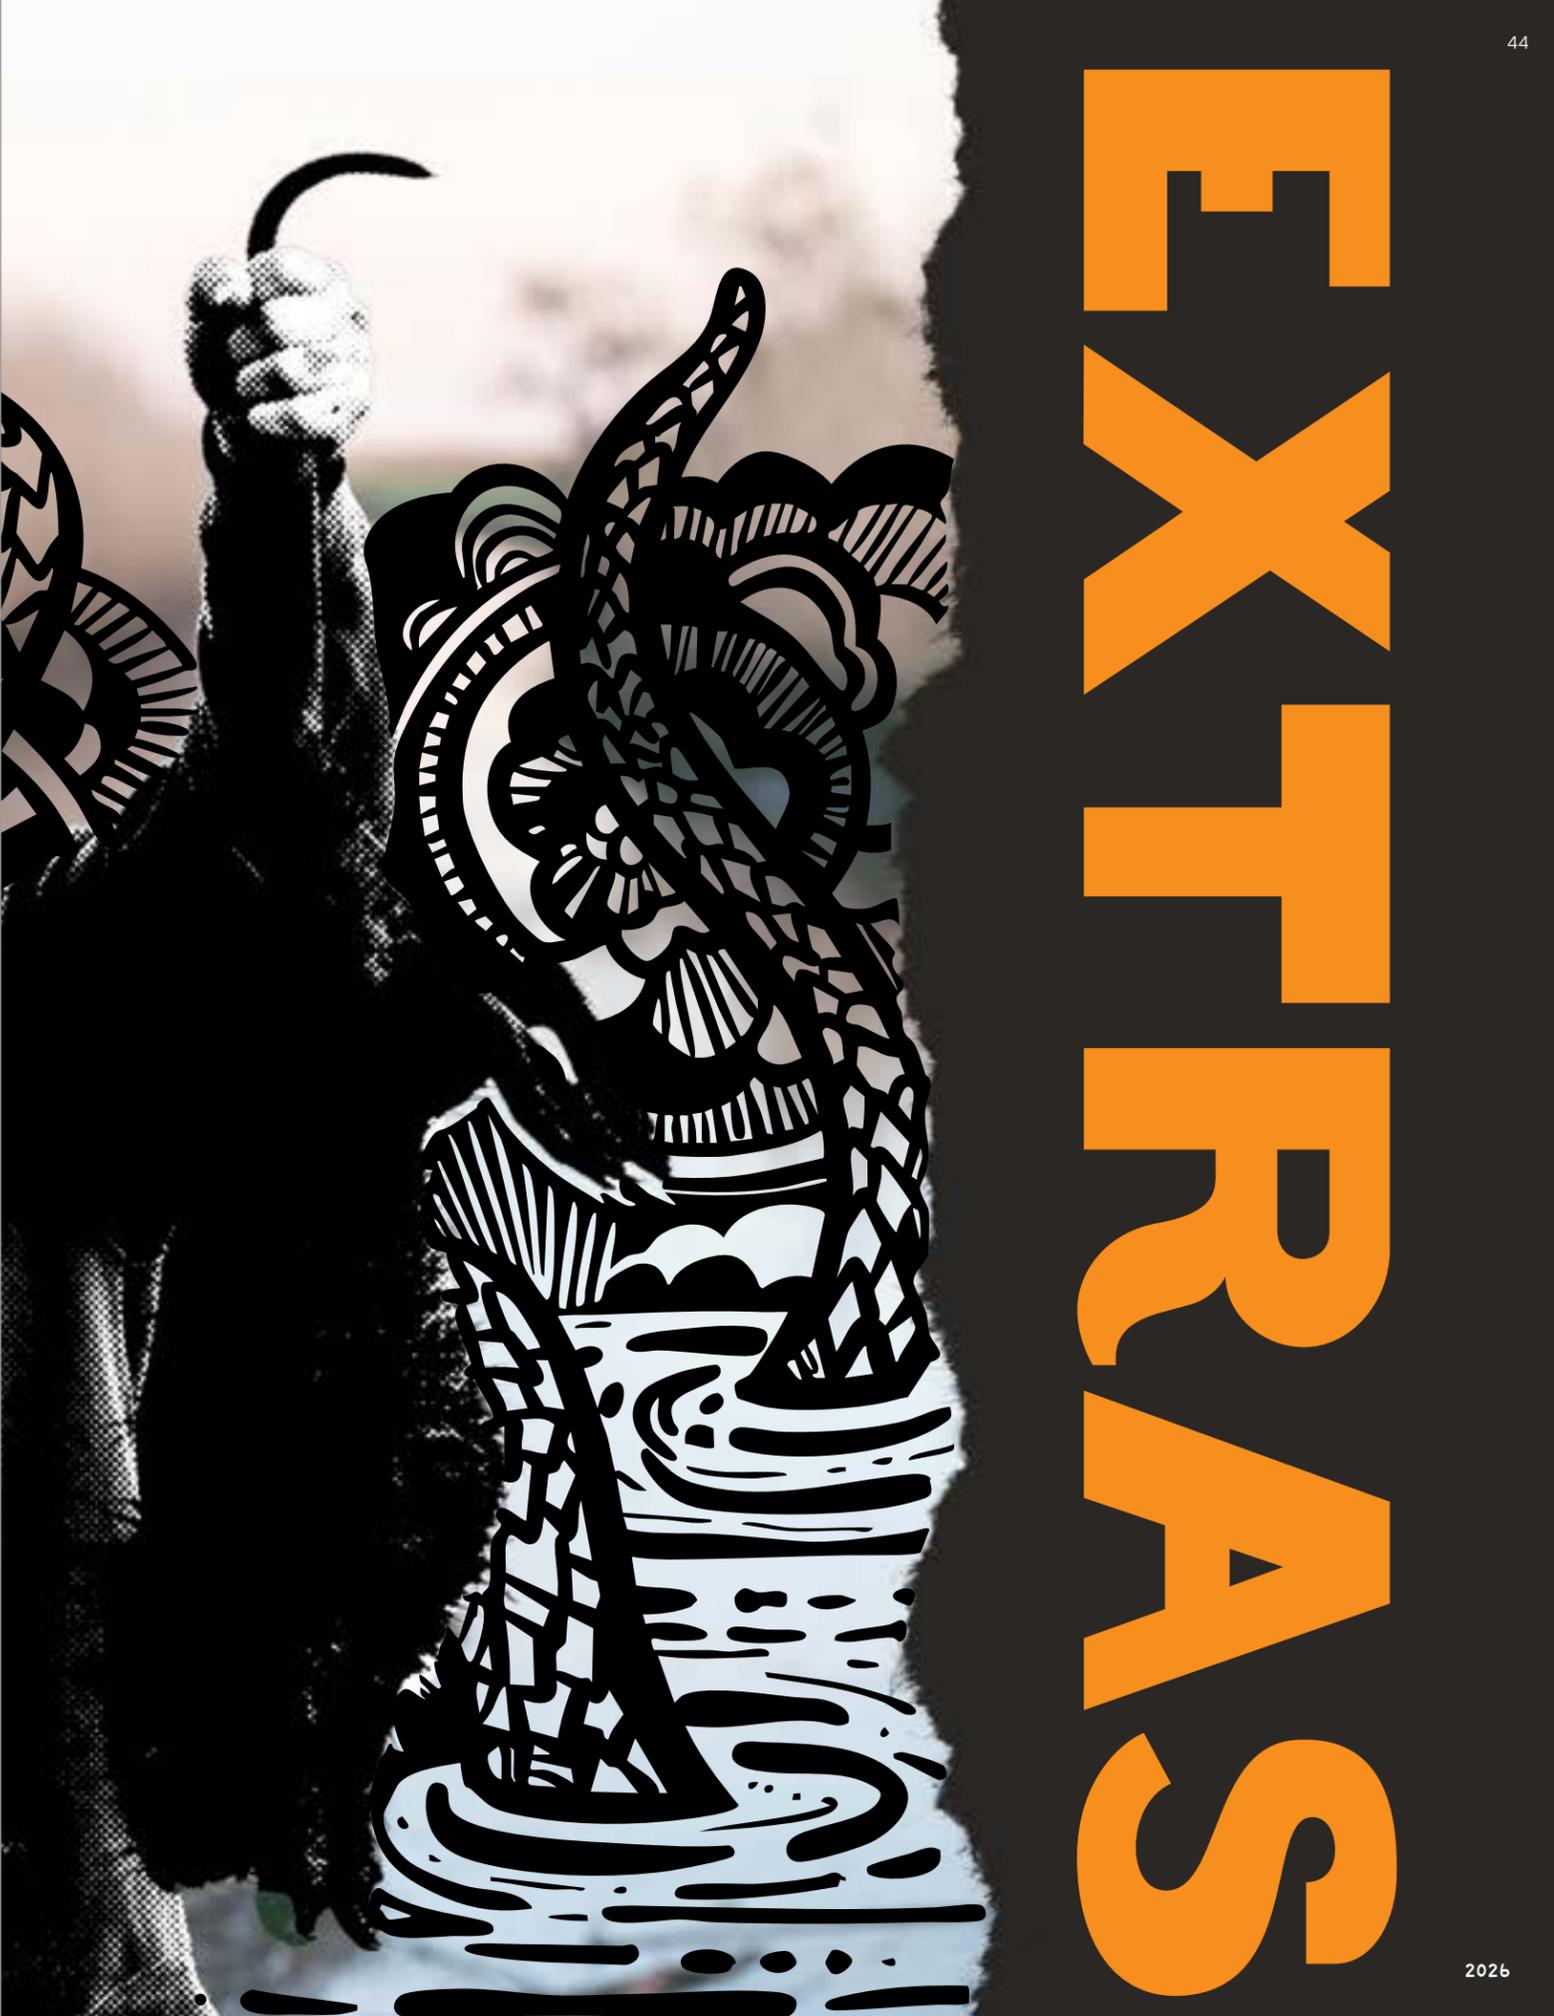

# BOSS HOSS

Whether that be making the most intricate designs on a CNC machine or maxing out what's possible in 3D printing, we can't just settle on that pack of ramen. We strive to make the Michelin Star worthy meal every damn time.

SilencerCo is about passion in everything we touch. We're not pencil pushers chasing a quick cash grab. We're in it to change the game—for us, and for everyone who ever picks up one of our products.

# EXTRAS

# BRAVO

# DIRECTIONAL

# ANCHOR

# BRAKE

The Bravo Directional Anchor Brake is specifically designed to reduce recoil and increase stability. It features a more aggressive and directional port design that can be timed in the desired orientation for optimal performance on your firearm. This new design is compatible with all Bravo cans but looks best on the Scythe-Ti and Scythe-STM suppressors.

The Bravo Directional Anchor Brake decreases muzzle rise, adding stability to follow-up shots. This increases accuracy for hunters, PRS shooters and recreational shooters alike.

# GDCH

**GAS DEFEATING  
CHARGING HANDLE**

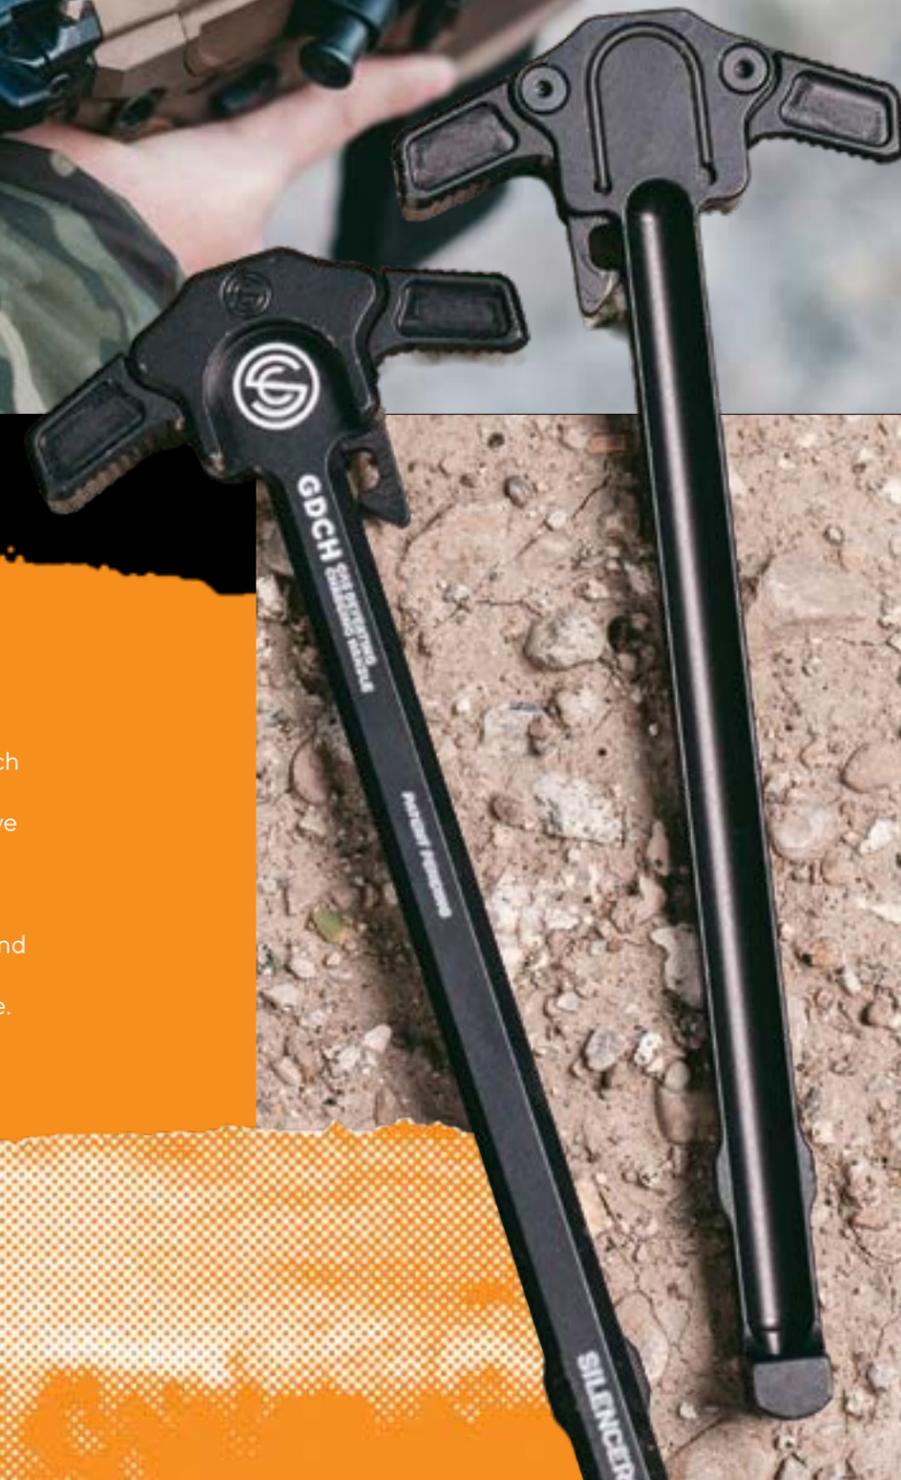

**NOW INCLUDING SIG**

The GDCH's proprietary design uses an O-ring seal that stops gas from blowing back into the shooter's face, a common problem with the AR-15. We also updated the texture to be more aggressive and engaging. Plus we increased our lever throw and strength of latch engagement in the upper.

- Features ambidextrous design for intuitive manipulation and smooth charging.
- Machined from aircraft grade 7075 aluminum.
- Ships with one O-ring already installed and one spare.

Say goodbye to gasses pelting you in the face.

## Charlie

### Compatible With

Velos LBP Series Hybrid 46M Omega 36M

### Charlie ASR Mount (AC622)

### Charlie Direct Thread Mounts

- [1/2 X 28](#) (AC4740)
- [5/8 X 24](#) (AC4743)
- [11/16 X 24](#) (AC4741)
- [3/4 X 24](#) (AC4742)
- [9/16 X 24](#) (AC4744)
- [M13 X .75](#) (AC4745)
- [M18 X 1](#) (AC4747)
- [M18 X 1.5](#) (AC4748)

### Charlie Thread Over Mount (TOM) (AC5229)

### Charlie Piston Mount (AC4751)

### Charlie Front Caps

- [.224 Cal](#) (AC4736)
- [.30 Cal](#) (AC4738)
- [Internal Flash Hider Front Cap .223 Cal](#) (AC5219)
- [Internal Flash Hider Front Cap .30 Cal](#) (AC5258)
- [9mm](#) (AC4739)

## Echo

### Compatible With

Salvo 12

### Improved Cylinder Chokes

- [Remington](#) (AC874)
- [Mossberg 500](#) (AC872)
- [Benelli Crio/Crio Plus](#) (AC871)
- [Beretta/Benelli Mobil](#) (AC870)
- [Beretta Optima HP](#) (AC1217)
- [Browning Invector Plus](#) (AC1245)

### Improved Modified Chokes

- [Remington](#) (AC1308)
- [Mossberg 500](#) (AC1310)
- [Benelli Crio/Crio Plus](#) (AC1311)
- [Beretta/Benelli Mobil](#) (AC1312)
- [Beretta Optima HP](#) (AC1320)
- [Browning Invector Plus](#) (AC1315)

### Full Chokes

- [Remington](#) (AC1322)
- [Mossberg 500](#) (AC1324)
- [Benelli Crio/Crio Plus](#) (AC1325)
- [Beretta/Benelli Mobil](#) (AC1326)
- [Beretta Optima HP](#) (AC1327)
- [Browning Invector Plus](#) (AC1328)

### Adapters

- [Saiga/Vepr 12 — M22 — .75](#) (AC865)
- [KSG —15/16 — 32](#) (AC1347)

### Rod Kits

- [10"](#) (AC834)
- [8"](#) (AC835)
- [6"](#) (AC836)

## Pistol

### Compatible With

Spectre Series Omega 9K Osprey Series Hybrid 46 DT Hybrid 46M Omega 36M

### Pistons

- [1/2 X 28](#) (AC25)
- [.578 X 28](#) (AC24)
- [M13.5 X 1LH](#) (AC26)
- [5/8 X 24](#) (AC30)
- [M16 X 1LH](#) (AC28)
- [9/16 X 24](#) (AC31)
- [1/2 X 28 SN](#) (AC1756)
- [1/2 X 28 XL](#) (AC59)
- [M13.5 X 1LH XL](#) (AC626)
- [1/2 X 36](#) (AC57)
- [M16 X 1](#) (AC29)
- [M14.5 X 1LH](#) (AC27)
- [.578 X 28 XL](#) (AC1346)

### Fixed Barrel Spacer (AC22)

### Common Piston Kit

[1/2 X 28, .578 X 28, 13.5 X 1LH, 16 X 1LH, 9/16 X 24](#) (AC728)

### Low Profile 3-Lug Mount

- [9MM](#) (AC2447)
- [45 Cal](#) (AC2448)

### 3-Lug Muzzle Device

- [1/2 X 28 9mm](#) (AC2604)
- [1/2 X 36 9mm](#) (AC2607)
- [5/8 X 24 9mm](#) (AC2609)
- [M13.5 X 1LH 9mm](#) (AC2602)
- [5/8 X 24 .45 Cal](#) (AC2603)
- [.578 X 28 .45 Cal](#) (AC2605)
- [9/16 X 24 .45 Cal](#) (AC2606)
- [M16 X 1LH .45 Cal](#) (AC2608)

### Threaded Barrels

- [Glock 19 1/2 X 28](#) (AC862)
- [Glock 17 1/2 X 28](#) (AC864)
- [Glock 17 1/2 X 28 Gen 5](#) (AC5335)
- [Sig P226 1/2 X 28](#) (AC859)

## ASR

### Compatible With

All ASR Mounts

### ASR Muzzle Brake

- [9/16 X 24 .30 Cal](#) (AC1276)
- [9/16 X 24 .355 / 9MM](#) (AC4766)
