TORK®

**Since
1922**

TORK has pioneered the time switch industry with reliable digital and mechanical timers for indoor or outdoor appliance automation, alongside a full range of sensors and signals.

We know a thing or two about time. The world may be changing fast, it can seem like lost time. Now, with our automation and Wi-Fi integration, you can save time, energy and money in the field, making TORK products an attractive part of any professional's equipment. Modern innovation, backed by a trusted legacy of quality, sets TORK above the competition.

PHOTOCONTROLS

Thermal photocontrols use bimetal and heat for basic, cost-effective lighting control, while electronic versions offer faster, more precise switching with energy-saving features like zero-cross technology.

PRECISION LIGHTING. RELIABLE CONTROL.

TORK photocontrols offer dependable dusk-to-dawn operation with intelligent sensing technology for maximum energy efficiency. Built to withstand harsh environments and tailored for a wide range of outdoor lighting applications, TORK photocontrols deliver long-lasting performance and flexible control when and where it matters most.

UL/CSA LISTED: SAFETY & COMPLIANCE

Certified to meet rigorous safety and quality standards, ensuring safe and dependable operation.

ZERO CROSS TECHNOLOGY

Minimizes inrush current, extending lamp life and improving energy efficiency in electronic photocontrols.

VERSATILE VOLTAGE OPTIONS

Available in single and multi-voltage options, ranging from 120 to 480VAC, to fit diverse electrical systems.

COLOR-CODED VOLTAGE

Twist-lock photocontrols are color-coded by voltage for easy identification and correct application.

AUTOMATIC LIGHTING CONTROL

Turns lights ON at dusk and OFF at dawn, providing reliable, hands-free operation based on natural light levels.

CAST ZINC & ALUMINUM

Models available with cast zinc or cast aluminum housings for enhanced durability and protection in harsh environments.

WIDE RANGE OF MOUNTING

Offered in button-, swivel-, stem-, and twist-lock designs to suit various fixtures and installation needs.

5237-UL SERIES
5237-UL

DELAY FEATURE

Prevents unnecessary cycling by adding a short delay to avoid false triggers from lightning or car headlights.

FAIL-SAFE DESIGN

Includes fail-on or fail-off features to ensure predictable behavior in case of sensor failure.

THERMAL & ELECTRONIC

Available in thermal models and electronic models to meet different performance needs.

5	2227	7-Prong Turn-Lock Receptacle w/ Gasket, 120-480VAC

SIGNALING DEVICES

TORK signaling devices provide dependable visual or audible alerts for industrial and commercial settings, ensuring clear communication and enhanced safety in critical applications.

CLEAR SIGNALS. CONFIDENT CONTROL.

TORK signaling devices provide dependable visual and audible alerts for industrial and commercial applications. Designed for reliability and ease of integration, these devices offer flexible voltage options, durable construction, and consistent performance—ensuring clear communication and enhanced safety in any environment.

UL/CSA LISTED: SAFETY & COMPLIANCE

Certified to meet rigorous safety and quality standards, ensuring safe and dependable operation.

AUDIBLE & VISUAL ALERTS

Provides clear audible and/or visual signaling for effective communication of alerts, warnings, or status notifications.

CUSTOMIZABLE TONES & FLASH

Select models offer adjustable sound tones and configurable flash patterns to meet specific alerting requirements and enhance recognition.

WIDE RANGE OF DEVICES

Includes bells, buzzers, horns, chimes, strobes, and sirens to suit various signaling needs and environments.

EASY INTEGRATION

Can be paired with timers, occupancy sensors, and other control devices for automated or on-demand signaling.

WARNING LIGHTS

TA93-2RN5

INDOOR & OUTDOOR MODELS

Available in indoor-rated and weather-resistant outdoor models with durable housings to withstand harsh conditions.

APPLICATIONS

Ideal for schools, factories, warehouses, offices, commercial buildings, and industrial facilities—used for class change alerts, shift change signaling, emergency notifications, and general-purpose alerts

WARNING LIGHTS

WARNING LIGHTS

POOL & SPA

TORK pool and spa controls take the hassle out of maintenance by automating pumps, heaters, and lights—so you can enjoy your water features with ease, efficiency, and peace of mind.

RELIABLE TIMING. RELAXATION MADE EASY.

TORK pool and spa controls offer precise, worry-free scheduling for pumps, heaters, and lighting. Built for durability in outdoor environments, these timers feature easy-to-use settings and dependable performance—giving you the freedom to enjoy your pool or spa with confidence and convenience.

AUTOMATED SCHEDULING

Set precise on/off times for pumps, heaters, and lights to optimize energy use and convenience.

RELIABLE PERFORMANCE

Trusted TORK quality ensures long-lasting, dependable control for residential and commercial settings.

VERSATILE APPLICATIONS

Ideal for pools, spas, hot tubs, fountains, and other water features.

WEATHER-RESISTANT DESIGN

Durable, outdoor-rated enclosures built to withstand harsh poolside conditions.

ENERGY EFFICIENCY

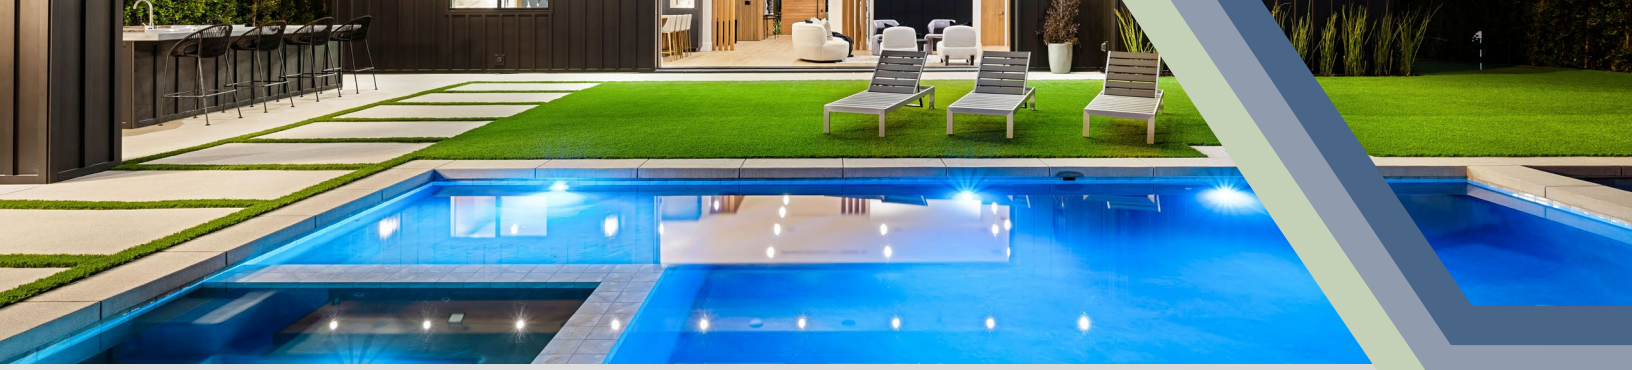

Helps reduce energy consumption by running equipment only when needed.

OCCUPANCY SENSORS

TORK occupancy sensors automatically detect motion to control lighting and reduce energy waste, offering smart, hands-free convenience for commercial, industrial, and residential spaces.

SMARTER SPACES. ENERGY SAVINGS.

TORK occupancy sensors deliver automated lighting control that enhances energy efficiency and convenience. With advanced motion detection, customizable time delays, and versatile mounting options, TORK sensors are ideal for optimizing lighting in offices, warehouses, restrooms, and other commercial spaces—ensuring lights are on when needed and off when not.

AUTOMATIC LIGHTING CONTROL

Detects motion and occupancy to turn lights ON when a space is occupied and OFF when vacant, improving convenience and efficiency.

UL/CSA LISTED: SAFETY & COMPLIANCE

Certified to meet rigorous safety and quality standards, ensuring safe and dependable operation.

VACANCY & OCCUPANCY MODES

Supports both occupancy sensing (auto ON/OFF) and vacancy sensing (manual ON, auto OFF) to meet code requirements and user preferences.

VERSATILE MOUNTING

Available in ceiling or wall mounting options.

EASY INSTALLATION

Designed for simple retrofit or new installations with clear wiring and setup instructions.

LOW-VOLTAGE OPTIONS

24VDC models available for integration with centralized lighting control systems and relays.

OCCUPANCY SENSORS COS-M

PASSIVE INFRARED (PIR) OR ULTRASONIC

Available with PIR (detect heat movement) or ultrasonic sensors (detect sound waves) for reliable performance in a variety of spaces. Select models have combined technology

ADJUSTABLE TIME DELAYS & SENSITIVITY

Customizable time delays, sensitivity levels, and ambient light settings ensure precise control and energy savings.
