

# Piston FIT GUIDE

The piston is part of the Nielson device that allows the pistol to cycle correctly. SilencerCo pistons thread directly onto SilencerCo threaded barrels for easy installation.

Pistons are interchangeable. Use your silencer on multiple firearms by swapping the piston to the required thread. Pistons are built with 17-4 stainless steel, then heat-treated for maximum durability.

*\*For unlocking pistol barrels. For fixed barrels, add a Fixed Barrel Spacer.*

**WARNING: Only use pistons with pistol calibers.** Using a piston with rifle caliber (such as 556) may cause **catastrophic failure**. Call customer service for more info

## Piston

For use on pistols with unlocking barrels.

## Fixed Barrel Spacer

For use with fixed barrels.

All pistons are compatible with Spectre 9, Omega K Series, Hybrid 46, Hybrid 46M, Omega 36M, Octane Series, & Osprey Series.
