

**PRESSURE CLEANERS**

**Made in Australia**  
SINCE 1982

# HP15-250HYD

*Hydraulic Driven Cold Water Cleaner*

### Specifications

- ⇒ 250 Bar (3626 psi) pump pressure
- ⇒ 330 Bar (4786 psi) EWE turbo pressure (optional)
- ⇒ Pump volume:
  - 15 L/min at 1450 rpm – 42 L/min Hyd. flow
  - 20 L/min at 1950 rpm – 56.5 L/min Hyd. flow
- ⇒ 26 cc Hydraulic motor capacity:
  - 130 Bar (1885 psi) Hyd. pressure
- ⇒ Heavy duty machine

### Standard Equipment

- ⇒ Interpump EVO-3 brass head pump
- ⇒ HYPACK26 hydraulic motor with case drain
- ⇒ VB280 unloader valve
- ⇒ VS350 safety valve
- ⇒ Pressure gauge
- ⇒ Inlet water filter
- ⇒ Operating & Maintenance Manual
- ⇒ (Optional hose, gun and lance)

| Features                                                                        | Benefits                                                                                            |
|---------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| Compact design                                                                  | Able to fit in tight spaces on purpose-built vehicles                                               |
| Variable water flow from 15 L/min to 20 L/min (dependant on hydraulic capacity) | Ideal for different applications from concrete pumps and mixers to hydro-excavation and ag sprayers |
| Interpump with brass head and ceramic pistons                                   | Non-corrosive pump head, longer pump life and lower maintenance costs                               |
| Italian made hydraulic motor with case drain                                    | High quality and reliability                                                                        |
| Heavy duty unloader valve and safety valve with pressure gauge                  | High quality, reliability and complete operational safety                                           |
