

Max2000 Offset Snips

Work. Perform. Outlast.
Limited Lifetime Warranty

MAX[®] 2000

Versatile Max2000 Offset snips offer a narrower grip opening that accommodates large or small hands to maximize the powerful leverage of compound handle-to-head linkage. These snips feature a serrated upper jaw of hardened alloy steel and a forged steel lower jaw to produce a strong, sharply defined cutting edge for superior offset maneuverability and cutting performance.

Nothing outcuts, outmaneuvers or outlasts Max!

Replacement Spring M2000S
