

# HVACR HOSES

When performance matters and downtime isn't an option, MalcoEdge™ hoses give HVACR professionals confidence at every connection. Built for charging, evacuation, and recovery, these hose solutions are engineered to reduce refrigerant loss, maximize flow efficiency, and perform under real jobsite demands.

## DEEP VACUUM HOSES

### TURBOFLOW HOSES

Turboflow hoses are designed specifically for use with vacuum pumps and engineered for Trade Pros who want to evacuate a system in less time. Built with larger internal diameters and vacuum-rated performance, Turboflow hoses help reduce evacuation time, especially on larger or more demanding systems.

**Turboflow features include:**

- High-flow hose design for faster system draw downs
- Vacuum-rated construction for deep-vacuum applications
- Robust fittings built to handle demanding service conditions
- Ideal for high-capacity, residential, or commercial HVAC systems

**TURBOFLOW REFRIGERANT HOSES**

## SAFE SEAL HOSES

Safe Seal hoses feature a unique “one-touch” design that ensures that the hose is connected before the schrader valve is opened - keeping refrigerant securely contained from the start.

Combined with anti-blowback technology to prevent refrigerant loss and vacuum-rated construction, Safe Seal hoses help maintain system integrity, reduce the risk of accidental discharge, and deliver cleaner, more reliable service.

- One-Touch Low-Loss Valve Design
- 360° Swivel Fittings
- Anti-Blowback Technology
- Vacuum-Rated Construction
- Replacement Gaskets and O-Rings Available

### 3-PIECE SAFE SEAL CHARGING HOSE SETS:

## EASY SEAL HOSES

Easy Seal hoses are built for everyday HVACR servicing with a focus on flexibility and secure connections. Featuring swivel fittings, Easy Seal hoses allow 360° rotation during use — helping prevent binding, loosening, and leaks under pressure.

Optional ball valve configurations provide added control, making Easy Seal hoses a versatile choice for routine service and maintenance.

- 360° Swivel Fittings
- Ideal for tight spaces
- Ball Valve Options
- Controlled refrigerant flow
- Rugged Construction
