

Top 10 Reasons to Own and Wear Proper Respirator Equipment

1. OSHA Requires it. That's right – Uncle Sam could level big fines if you and your employees aren't using proper respirator equipment.
2. Your employees will love you for it. It's amazing how clean air can improve employee morale and efficiency.
3. Dust in your eyes? Not you! Keep those baby blues (or browns, or greens) looking and functioning well by keeping dust and other dangerous debris out of them with a proper respirator hood. The Bullard® EVA Powered Air Purifying Respirator (PAPR), available from Sashco, comes standard with this hood, along with fog-free glass.
4. No more smelly stain vapors. A good respirator, including the Bullard EVA PAPR, filters out all those vapors, keeping your head clear and your stain work beautiful.
5. Remember those Mesothelioma commercials? Those won't apply to you because your lungs will be properly protected.
6. It can cool you off on a hot day. The Bullard EVA PAPR has fans in the hood to keep you more comfortable on warm days.
7. Your Halloween costume is ready every year. No need to go buy a new funny mask every year – you will have one that was a tax write-off.
8. Get better sleep. Wear your hood and keep those annoying nighttime noises out of your head and enjoy sound sleep (finally).
9. Bad haircut? Keep it under wraps for a bit and breathe easy while you make up the story of how it happened.
10. Look like the guys in the "Ghostbusters" movies. Need we say more?
