

NewHeights™ Hooligan Teacher's Desk Modesty Panel Assembly Instructions

Warranty: raproducts.com/warranty

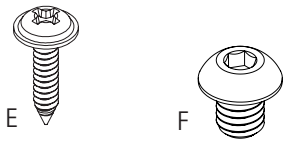

Tools Required for Assembly

- A. Power Driver with Adjustable Torque
- B. #2 Phillips Head Driver Bit
- C. 3/16" Allen Wrench
- D. 5mm Allen Wrench

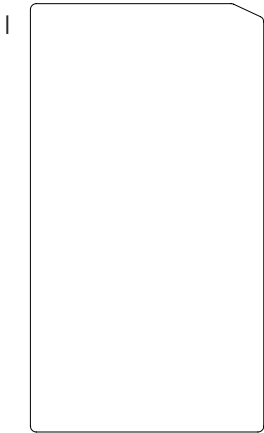

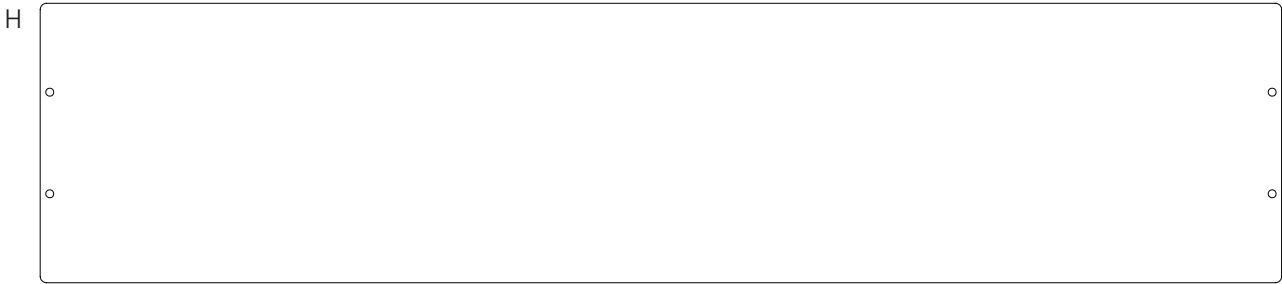

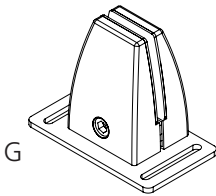

Hardware and Tools Included for Assembly *(may have extra)*

- E. 5/8" Washer Head Wood Screw **x4**
- F. 3/8" Button Socket Cap Screw **x4**

Parts

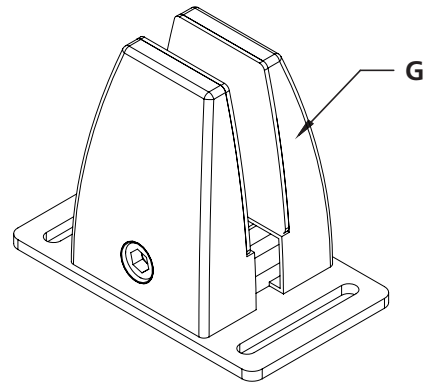

- G. Acrylic Panel Surface Mount **x2**
- H. Desk Side Modesty Panel **x1**
- I. Podium Side Modesty Panel **x1**

Step 1

- Place the Hooligan desk upside down on a protected surface with the desk legs and underside of the worksurface facing up.
- Using the 5mm allen wrench (D), loosen the bolt to open the clamping portion of one acrylic panel surface mount (G).
- Repeat on the second acrylic panel surface mount (G).

It only needs to be opened wide enough to slide in an acrylic panel.

Step 2

- On the podium side of the desk, place the two acrylic panel surface mounts (G). Align the mounts with the pre-drill pilot holes.
- Secure the surface mounts to the underside of the worksurface using four (4) washer head wood screws (E).

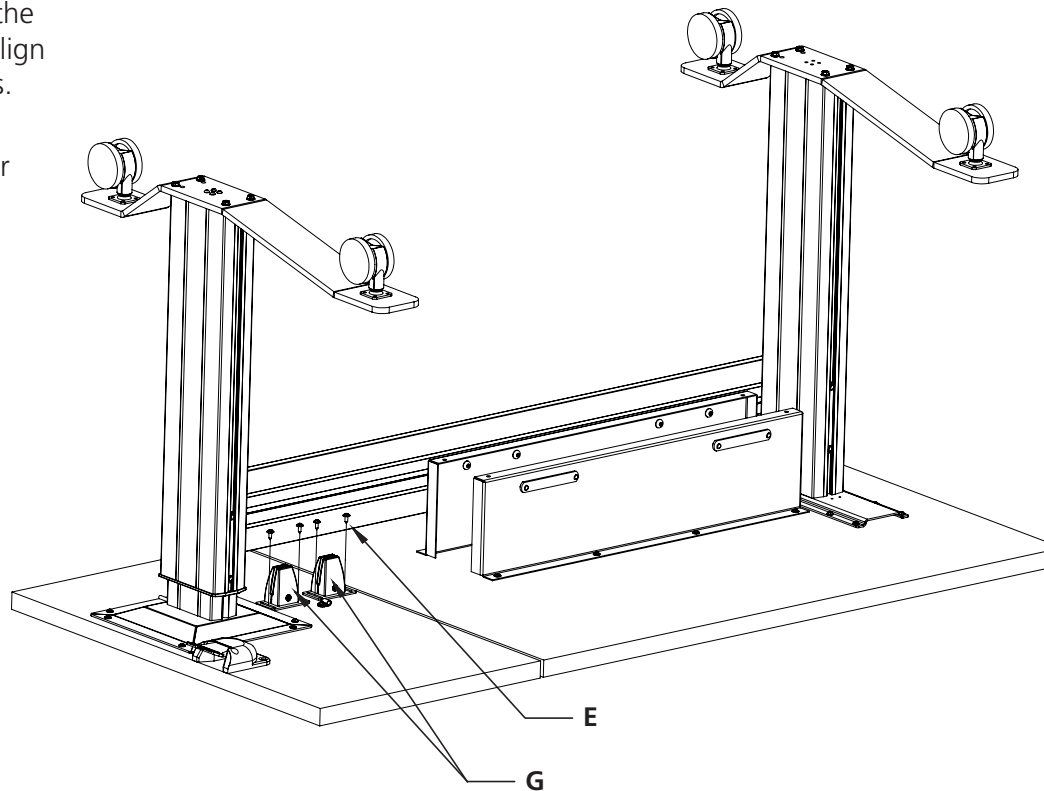

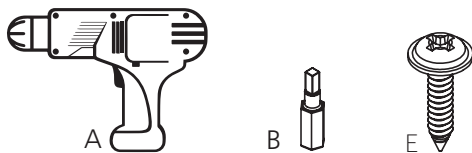

Image above shows second cross support removed for clarification purposes only.

Step 3

- Slide the podium side acrylic panel (I) into the two surface mounts (G).
- Using the 5mm allen wrench (D), tighten the surface mounts (G) to secure the panels.

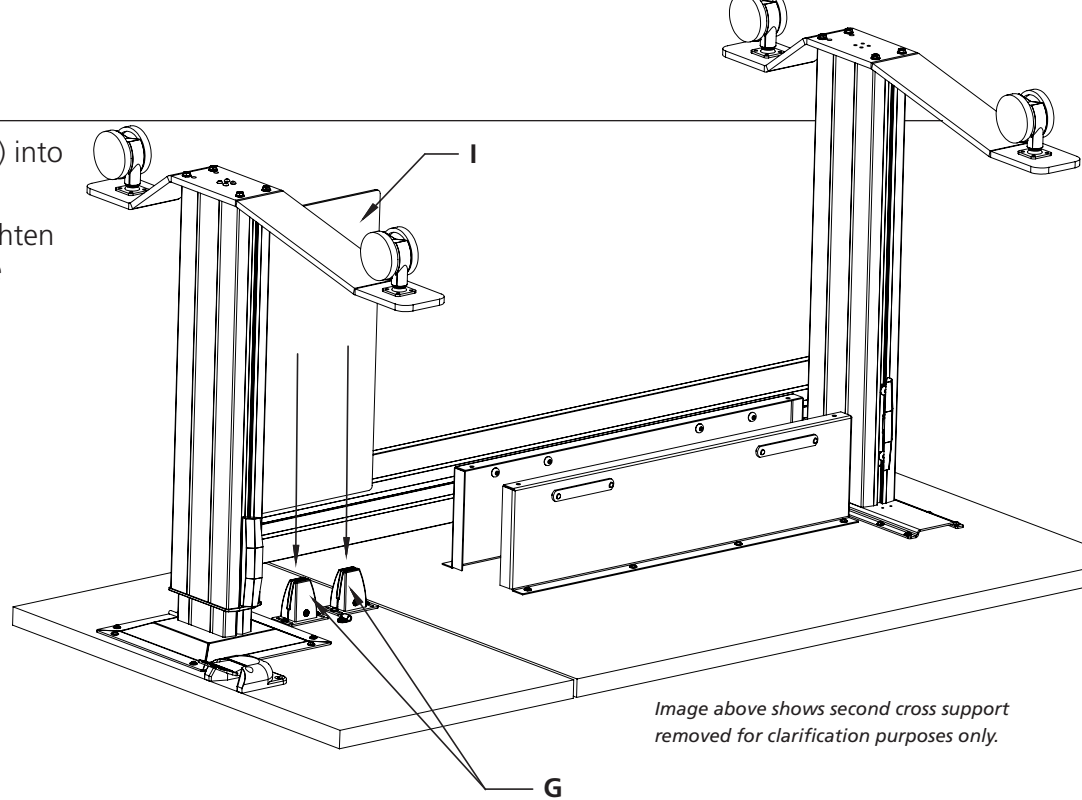

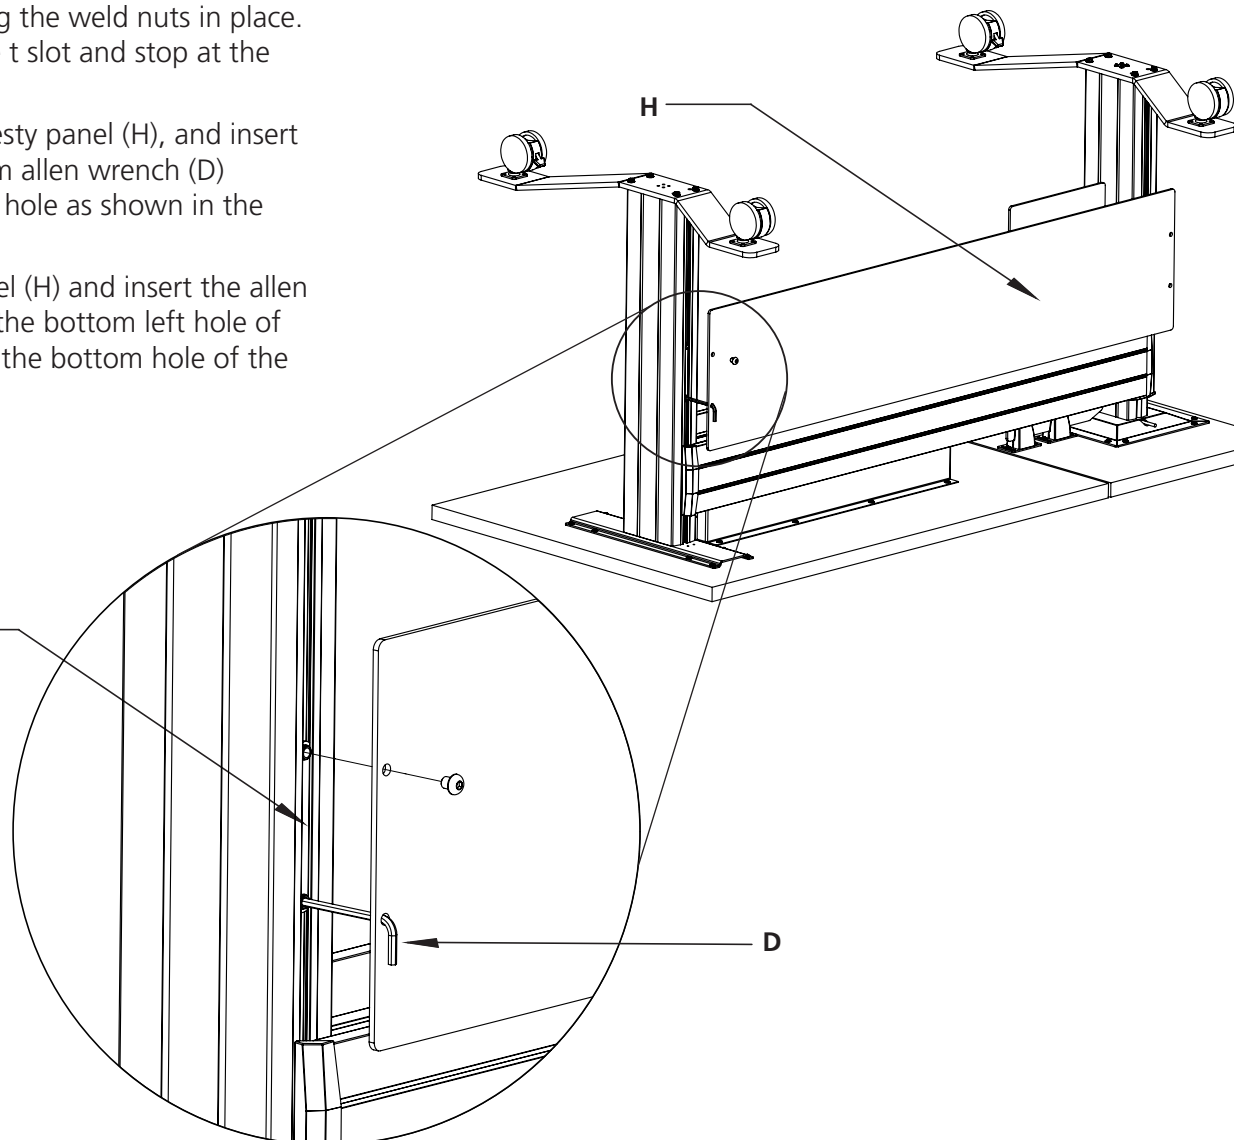

Image above shows second cross support removed for clarification purposes only.

Step 4

- Remove the tape holding the weld nuts in place. They will drop inside the t slot and stop at the cross support.
- Take the desk side modesty panel (H), and insert the long end of the 5mm allen wrench (D) through the bottom left hole as shown in the image.
- Lift up the modesty panel (H) and insert the allen wrench (which is still in the bottom left hole of the modesty panel) into the bottom hole of the weld nut.

Weld nut
(located inside the t slot of the leg column)

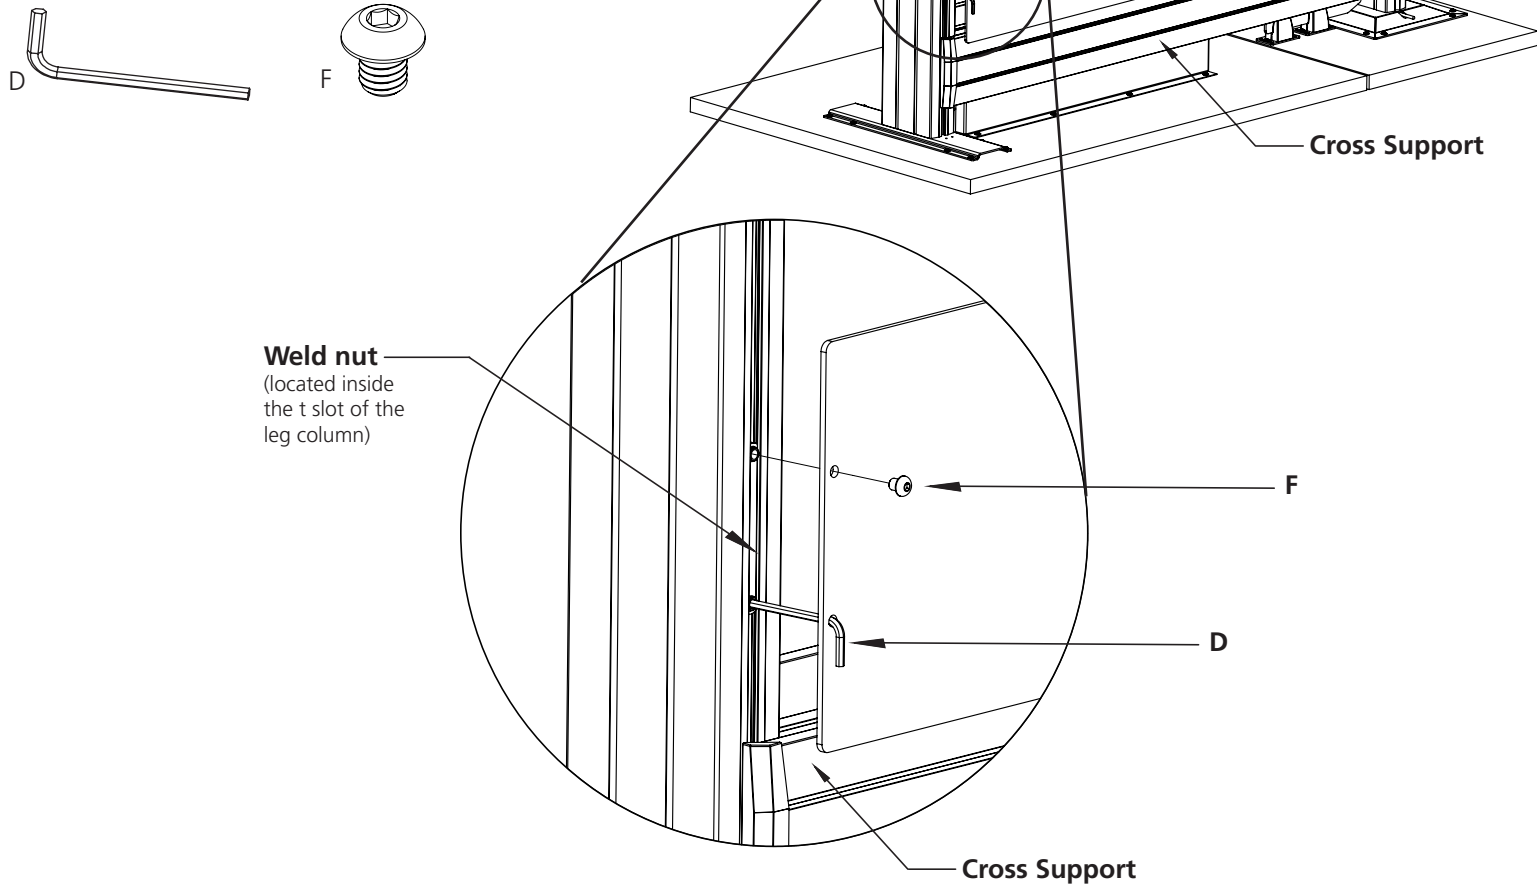

Step 4 continued

- Using the allen wrench, slide the weld nut up until the bottom of the modesty panel is flush with the top of the cross support.
- Keeping the weld nut & allen wrench in place with one hand, use your other to insert one button socket cap screw (F) through the top hole of the modesty panel and into the weld nut.

DO NOT FULLY TIGHTEN.

- Repeat step 4 on the other side of the desk side modesty panel (H).

Step 5

- Then, insert the last two button socket cap screws (F) into the remaining holes of the modesty panel. Do not fully tighten.
- Carefully adjust the desk side modesty panel to your chosen position.

We recommend pushing the panel up against the cross support.

- When in place, use the 3/16" allen wrench (C) to secure the panel and tighten all four button socket cap screws. See Pro Tip.
- You can now flip the Hooligan desk rightside up and begin use.

Be careful not to over tighten the screws to avoid cracking the acrylic.
