

PT-SCOPE-200

Platinum Tools Wireless Fiber Optic Inspection Scope

Streamline fiber optic endface inspections and cleaning.

The PT-SCOPE-200 provides a solution for endface inspection and reporting to ensure fiber optic connectors are up to the correct cleanliness standards. With the 200X magnification, dirt and debris are easily identifiable and the integrated application will provide testing zones to show pass/fail results. Includes a slim carrying case for easy transport and most common connector endface adapters.
