New Color!

Malco Black Painted Zip-in® Self-Piercing Sheet Metal Screws

Malco is excited to introduce black to our trusted Zip-in® Self-Piercing Sheet Metal Screw lineup, providing an ideal solution for professionals looking to achieve a flawless, cohesive finish on gutters, securing downspout sections, fascia and other sheet metal projects. Known for their superior performance, patented Zip-in® screws are zinc plated and feature a sharp, tapered point for fast starts and reliable piercing, paired with a single-thread design that ensures exceptional holding power in metal-to-metal applications. Genuine Zip-in® screws are easily identified by looking for two dots on top, a mark of their unmatched quality and authenticity.

U.S. Patent
No. D524,638

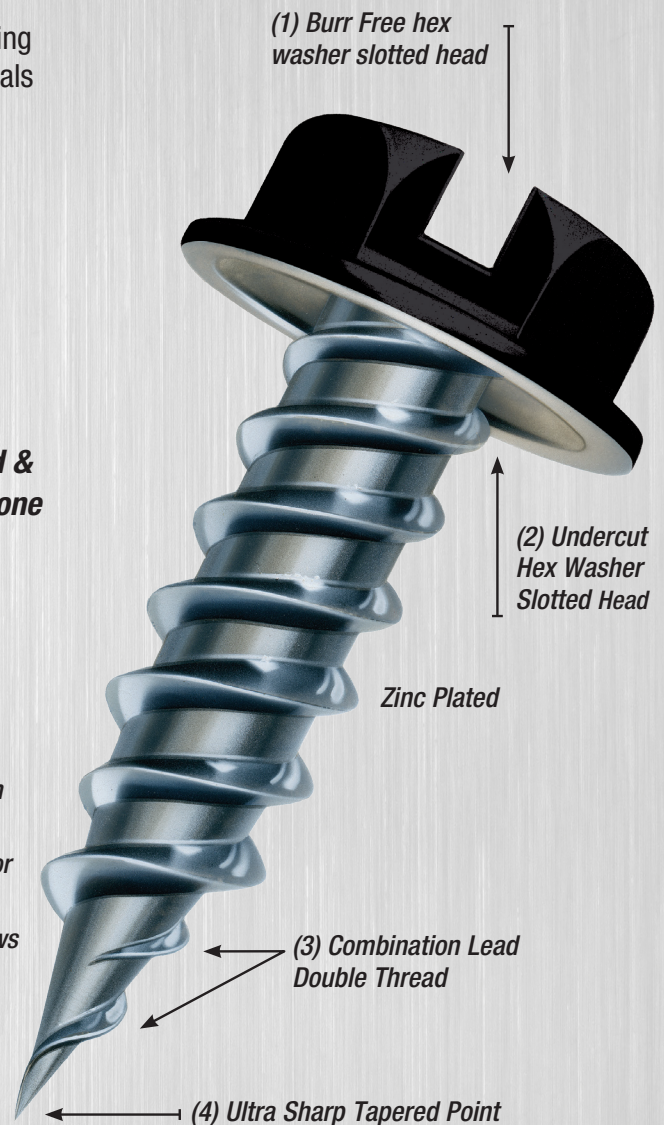

Look for the Dots! ® Trademarked & Patented Head Markings indicate one and only genuine Zip-ins®.

The Zip-in® Difference:

- **Burr Free Hex Washer Slotted Head:** No strip out of hex driver opening at any ring operation.
- **Undercut - Indented Hex Washer Slotted Head:** Screw always seats flush
- **Combination Lead Double Thread:** Starting thread machined down to the very tip of the screw point to instantly penetrate and engage in heavy gauge or light gauge layered sheet metal.
- **Sharp Tapered Point:** Quality controlled heat treat process for strong screws that won't mushroom, break or walk and provide complete operator control.

The Ultimate System

All Malco Zip-in® screws pair perfectly with our innovative C-RHEX® Cleanable-Reversible Magnetic Hex Drivers, creating The Ultimate System for efficiency and precision.
