## Offset Ratcheting Wrench

### Two-way ratcheting action with an effortless handle-swing motion

This versatile, compact, and lightweight Offset Ratcheting Wrench provides easy fastener access and fast, two-way ratcheting action with an effortless handle-swing motion. Finger switches are easily accessible to change ratcheting direction. It is ideal for installing or removing fasteners at chainlink fence hook-up points. A 25 degree offset design maintains clearance between fingers and chainlink fabric when fastening fence hardware such as tension bands, brace bands, and rail end cups. The 12-point box heads, at each end of the wrench, grasp standard U.S. 1/2 inch and 9/16 inch hex fasteners from multiple angles. The box head keeps wrench in contact with the fastener for superior control. Through-hole socket openings accommodate any fastener length! Designed for long service life, this Offset Ratcheting Box Wrench exceeds ASME minimum torque requirements. Hardened socket openings and protective nickel chrome plating compliment a solid plastic core sandwiched between the tool's 1/8 inch (3.18 mm) steel plates to ensure that the ratcheting mechanism will function in harsh cold, wet, or dirty working conditions.
