## Deer Fence Dual Leaf Driveway Gate Installation Instructions

1. Layout your FRAME POSTS
( N ) where you would like your driveway gate to go on your fence line. Using the table below, measure out your gate distance between your post going from the INSIDE edge of one FRAME POST (N) to the INSIDE edge of the opposite FRAME POST (N).

Note: It is EXTREMELY important to double check the measurement between the FRAME POSTS (N) before STEP 3 as these posts will be set into concrete.

| Gate Width | Distance between <br> posts - INSIDE <br> EDGE TO INSIDE <br> EDGE |
| :---: | :---: |
| $8^{\prime}$ Gate | $96^{\prime \prime}$ |
| $10^{\prime}$ Gate | $120^{\prime \prime}$ |
| $12^{\prime}$ Gate | $144^{\prime \prime}$ |
| $14^{\prime}$ Gate | $168^{\prime \prime}$ |

2. Measure 12 " from the bottom of your FRAME POSTS (N) and drill a 3/8" hole. Insert the REBAR (P) into the hole. This helps prevent the FRAME POSTS $(\mathrm{N})$ from rotating when it is setting in concrete (see STEP $3)$.

For 8' - 7' Gates Only: Insert END EXTENSION (Q) the silver part into each FRAME POST (N). Secure the extension with two (2) SELFTAPPING SCREWS (J). This is the top of your post.
1.

2.

|  |  |
| :---: | :---: |
| 3. Place the POST CAP (N) into each FRAME POST ( $\mathbf{N}$ ). Then using a shovel or post hole digger, create a hole for the FRAME POSTS (N). Each hole should be $\mathbf{1 2 "}$ WIDE and $\mathbf{3 6}$ " DEEP. Drop the FRAME POSTS ( $\mathbf{N}$ ), open end down, into the hole and then set with concrete. Repeat for both FRAME POSTS (N). <br> Make sure to allow the concrete to set completely before proceeding to STEP 3. <br> Note: It is HIGHLY <br> recommended to set your posts into concrete. Setting the posts in concrete will strengthen the overall fence system and increase the longevity of the fence. Alternatively, you can use expanding post foam or backfill with rocky dirt and tamp firmly. | 3. $\square$ |

4. Slip two (2) MALE HINGES (F) over the FRAME POST (N). The first, bottom MALE HINGE (F) should face UP and the second, top MALE HINGE (F) should face DOWN. Secure both MALE HINGES (F) loosely on the post. Next, slip BRACE BAND (A) and BRACE CUP (B) over the FRAME POST ( $\mathbf{N}$ ) and position them approximately $12^{\prime \prime}$ from the top of the FRAME POST (N). When attaching the BRACE CUP (B) to the BRACE BAND (A), position the cup so that the BRACE POST (E) will be on the INSIDE of the fence line. Do not fully tighten the bolt holding the BRACE BAND AND CUP. Repeat step for second FRAME POST (N).
5. 

5.

6. Once the dead man is in place, adjust your BRACE POST (E) so it rests tightly against the dead man. Fill the hole back up with dirt and tamp down. Secure the BRACE POST (E) by drilling a SELF-TAPPING SCREW (J) through the BRACE CUP (B) and BRACE POST (E). Once secured, tighten the bolt on the brace band. Repeat step for second BRACE POST (E).
6.

Birds Eye View

7. Insert VERTICAL GATE DOOR POST (A) into CORNER ELBOW (C). Then slide in the HORIZONTAL GATE DOOR POST (B) into the CORNER ELBOW (C) so that it presses tightly against the VERTICAL POST (A). Secure the POSTS inside the CORNER ELBOWS (C) using four (4) SELFTAPPING SCREWS (J) per bracket. Locate the center of the VERTICAL GATE DOOR POST (A) and mark this location; this is where HORIZONTAL CENTER BAR (C) will be attached. Attach the HORIZONTAL CENTER BAR (C) on both sides of the VERTICAL GATE DOOR POSTS (A) with two (2) END CLAMPS (D). Secure the END CLAMPS (D) with a CARRIAGE BOLT (K).

Note: The CARRIAGE BOLT (K) that secures the HORIZONTAL CENTER BAR (C) DOES NOT go through the bar itself. The HORIZONTAL CENTER BAR (C) rests against the CARRIAGE BOLT (K) and secures the two pieces of the END CLAMP (D).
7.

䍚
4 Screws per Bracket

8. Locate the center of HORIZONTAL GATE DOOR POST (B) and mark this location, this is where the VERTICAL CENTER BARS (D) will be attached. First, attach the remaining END CLAMPS (D) on the HORIZONTAL GATE DOOR POST (B) and secure with CARRIAGE
BOLTS (K). Then, Insert the VERTICAL CENTER BARS (D) into the END CLAMPS (D), resting the bar against the CARRIAGE BOLT (K). Finally, attach the VERTICAL CENTER BARS (D) onto the HORIZONTAL CENTER BAR (C) using the CENTER SUPPORT CLAMP (M) and secure the SUPPORT CLAMP (M) with CARRIAGE BOLTS (K).

Note: The CENTER CLAMP (M) is placed VERTICALLY on the HORIZONTAL CENTER BAR (C).
Do not tighten bolts until everything is loosely assembled.
8.

9. Open the TURNBUCKLE
(E) by twisting both ends. Place the hook end of one TURNBUCKLE (E) through the hole in one top CORNER ELBOW (C) and stretch the cable diagonally to the hole in the bottom CORNER ELBOW (C). Pass the cable through the CONNECTION CLIP (I) and then through the hole in the CORNER ELBOW (C). Pass the end of the cable through the CONNECTION CLIP (I) again. Position the CONNECTION CLIP (I) close to the CORNER ELBOW (C) and tighten using the small nuts. Repeat on the opposite side creating an " X " across the gate. Evenly tighten the TURNBUCKLES (E) on each side to keep the gate square.
10.

10. On one side of the newly assembled gate door, measure 18" from the TOP and 18" from the BOTTOM of the door. Attach the FEMALE HINGES (G) at these marked points. On the opposite side of the gate door, attach the FORK LATCHES (H) at the same height as the FEMALE HINGES (G); 18" from the TOP and 18" from the BOTTOM.

Note: Only one gate door will have the FORK LATCHES (H).
11. Repeat STEPS 8-11 to build the SECOND GATE DOOR.
11.

12.

12. Position one GATE DOOR on
the INSIDE of the FRAME POSTS ( $\mathbf{N}$ ) at the desired height, then slide the MALE HINGES (F) into the FEMALE HINGES (G) to attach the gate door. Once positioned, you can tighten the bolts of the MALE HINGES (F). Repeat with the second GATE DOOR. Then, cover the entire GATE DOOR with your fence mesh (NOT INCLUDED) so the mesh faces the outside edge of the fence line. Fasten the mesh to the GATE DOOR using SELF-LOCKING TIES (O). Trim excess material as needed.

Note: We recommend attaching the mesh from left to right before attaching top and bottom. You do not need a tie for every square on the mesh. We recommend 1 tie for every $1^{\prime}$ along the pipes of the gate door.
13. Attach the FEMALE HINGES that comes with the DROP ROD ASSEMBLY KIT (L) on the gate door WITHOUT the gate latches. One of the FEMALE HINGES goes at the bottom of the door and the second approximately $\mathbf{1 2 "}$ from the bottom. Drive the DROP ROD RECEPTACLE (L) into the ground beneath the hinges until flush with the ground. Insert the DROP ROD (L) through the FEMALE HINGES and into the RECEPTACLE (L).
13.

14.
