RoHS Compliance Statement for Bridgeport Zinc Die Cast Fittings, Malleable Iron Fittings, Zinc-Plated Steel parts and Components, & Non-Metallic Fittings and Components

To Our Valued Customers,

Bridgeport Zinc die cast fittings manufactured and sold by NSI are made with high quality, Zamak #3 or #7 alloys. These alloys have ingredients which include Lead (Pb) at 0.005% (max. by weight) and Cadmium (Cd) at 0.004% (max. by weight). The RoHS certification specification limit for Lead (Pb) is 0.1% (max. by weight) and for Cadmium (Cr) is 0.01% (max. by weight).

NSI only sells or manufactures zinc-plated, malleable iron products (fittings, straps, hubs, etc.), or zinc-plated steel components (fittings, straps, washers, etc.) of which **do not** contain Hexavalent Chromium (Cr VI). This substance is also **not** used in the corrosion treatment of our malleable iron products. Also, none of our products contain Mercury (Hg).

In addition, Polypropylene (Insulating Bushings, Metaliners, and Lock-A-Liners), Polyethylene (Pull Caps and Liquid Tight Gland Seals), and Nylon (Snap-In NM-B Connectors and Cable Stackers), other non-metallic fittings and components offered or manufactured by Bridgeport Fittings, **do not** contain PPB (Polybrominated biphenyls), PBDE (Polybrominated diphenyl ether), DEHP (Bis(2-Ethylhexyl) phthalate), BBP (Benzyl butyl phthalate), DBP (Dibutyl phthalate), or DIBP (Diisobutyl phthalate).

All NSI Bridgeport products comply with the RoHS European Directives 2002/96/EC, 2011/65/EU (2017/2012), and 2015/863.
