

**INDUSTRIAL-STRENGTH
STAINLESS STEEL FITTINGS**
FOR WASTEWATER APPLICATIONS

WASTEWATER SOLUTIONS

Bridgeport delivers stainless steel fittings engineered to withstand the harsh realities of wastewater environments. Hydrogen sulfide and other byproducts demand industrial-strength, corrosion-resistant solutions. From pump control panels and flow meters to valve actuators, Bridgeport products ensure safe, reliable, and code-compliant performance where it matters most.

Industrial-strength stainless steel construction.

Superior corrosion resistance against hydrogen sulfide and chemicals.

Ingress-rated designs for wet environments.

USA-based quality, engineering, and support.

With 100 years of U.S.-based engineering and manufacturing, Bridgeport is a trusted partner for wastewater management projects from pumping stations and distribution systems to treatment facilities.

STAINLESS STEEL FITTINGS

Bridgeport's stainless steel cord grips, mesh grips, hubs, and dome vent plugs are purpose-built for wastewater applications. Stainless steel provides unmatched corrosion resistance, is easy to clean of contaminants, and delivers long-lasting durability in demanding environments.

CONDUIT DRAIN FITTINGS

Engineered for durability, these fittings safely remove condensation from enclosures and conduit runs, preventing moisture buildup and protecting system integrity.

STAINLESS STEEL LIQUIDTIGHT CONNECTORS

Built for wet, dry, and hazardous locations, these connectors seal out dust, dirt, oil, water, chemicals, and other corrosive elements ensuring long-lasting, code-compliant protection in oil and gas environments.

STAINLESS STEEL CORD GRIPS

Featuring a Type 304 stainless steel body and compression nut, these cord grips deliver exceptional tensile strength and superior endurance in corrosive environments. Each connector includes a Buna-N O-ring for a watertight seal, and sizes 3/8" to 3" can be equipped with stainless steel wire mesh grips for added strain relief and vibration resistance.

WIRE MESH GRIPS

Rugged mesh grips provide reliable strain relief, protecting against pullout and cable fatigue to prevent costly power failures.

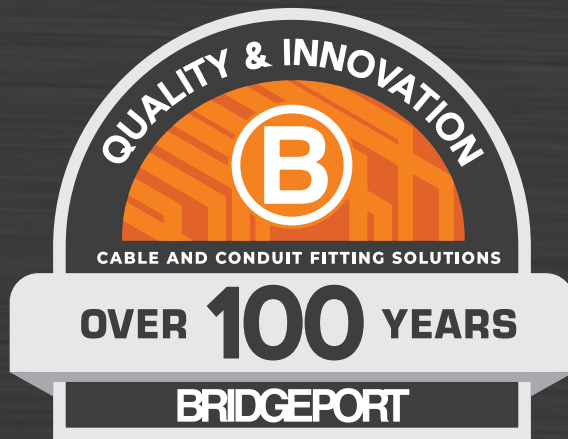

VALOX CORD GRIPS

An alternative to stainless steel, Valox non-metallic cord grips are lightweight, non-conductive, and offer excellent resistance to heat, chemicals, and corrosion. Featuring a neoprene compression bushing and nylon anti-friction washer, they are ideal for applications where non-metallic performance is preferred.

STAINLESS STEEL CABLE AND CONDUIT SUPPORTS.

USS-6171, UCSS-series, and 2100-S series.
