CONNECTING POSSIBILITIES

## POWR-TECK CONNECTORS

CONNECTORS FOR JACKETED MC AND TECK CABLE

REMKE.COM

# POWER-TECK CONNECTORS

## EXPERIENCE THE POWER OF A ONE-PIECE DESIGN

### REMKE POWER-TECK MC CABLE CONNECTORS FEATURE AN EXCLUSIVE ONE-PIECE DESIGN

When you choose our POWER-TECK Connector you get the compact one-piece POWR-LOCK design. No disassembly required for installation—just push the cable through and tighten the connector.

These connectors form watertight seals around jacketed metal cable and at the enclosure entry. They're rated NEMA 4 and IP 65, available in 1/2" to 4" sizes and manufactured from aluminum, nickel-plated aluminum and stainless steel.

#### FEATURES INCLUDE:

- Compact one-piece design
- Unique POWR-LOCK grounding seal for superior conductivity
- No disassembly required for installation
- Neoprene bushing for superior pull-out and sealing protection
- Embedded Viton® O-ring

#### MC CABLE VS. PIPE AND WIRE

Using MC Cable can save upwards of 50% of total installation cost compared to pipe and wire. Additional benefits include:

- Preassembled, flexible design uses fewer parts
- Bendable cable saves time and is non-restrictive
- Can be installed right off the reel
- Less scrap reduces waste, cost and clean-up

Time is money, and using MC Cable lets contractors offer savings direct to their customers.

† U.S. Patent No. 7,156,671

**CSA STANDARD:** C22.2  
**NO.18-98**  
**FILE NUMBER:** 28985  
**RATINGS:** NEMA 4, IP65

# MATERIALS AND SPECIFICATIONS

## ALUMINUM

*In Stock and Ready to Ship*

Excellent durability and performance for most industrial applications

## NICKEL-PLATED ALUMINUM

*In Stock and Ready to Ship*

Protection against corrosion with the look of stainless steel

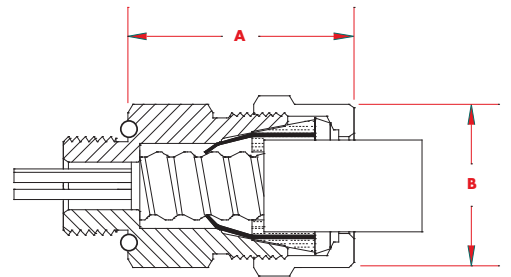

## STAINLESS STEEL

*Type 304 In Stock and Ready to Ship\**

The highest levels of durability in highly corrosive environments
