

**INDUSTRIAL-STRENGTH
STAINLESS STEEL FITTINGS**
FOR FOOD & BEVERAGE

FOOD & BEVERAGE

Bridgeport delivers stainless steel fittings designed specifically for food and beverage environments. Our portfolio includes liquidtight connectors, cord grips, wire mesh grips, and conduit fittings engineered to withstand frequent washdowns. Each product is designed with smooth, easy-to-clean surfaces that minimize hidden areas where contaminants could collect, ensuring safe and sanitary performance.

304 & 316 stainless steel for superior durability.

Designed with easy-to-clean surfaces.

Watertight for frequent washdowns.

USA-based quality, engineering, and support.

With 100 years of U.S.-based engineering and manufacturing, Bridgeport is a trusted partner in food and beverage environments from commercial kitchens to large-scale processing facilities.

STAINLESS STEEL FITTINGS

Stainless steel is essential for food and beverage applications—delivering corrosion resistance, long-lasting durability, and smooth surfaces that can be quickly cleaned of moisture, grease, and other contaminants.

CONDUIT DRAIN FITTINGS

Engineered to drain away condensation, these fittings protect enclosures and conduit systems from moisture buildup, ensuring safe and sanitary performance.

STAINLESS STEEL LIQUIDTIGHT CONNECTORS

Designed for wet, dry, and washdown environments, these connectors seal out dust, dirt, oil, water, and corrosive elements—ensuring hygienic, long-lasting protection in food and beverage facilities.

STAINLESS STEEL CORD GRIPS

Built with a Type 304 stainless steel body and compression nut, these cord grips provide exceptional tensile strength and reliable performance in corrosive food and beverage environments. Each connector includes a Buna-N O-ring for a watertight seal in washdown conditions.

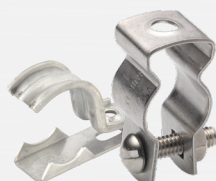

WIRE MESH GRIPS

Rugged mesh grips provide reliable strain relief, protecting against pullout and cable fatigue to prevent costly power interruptions.

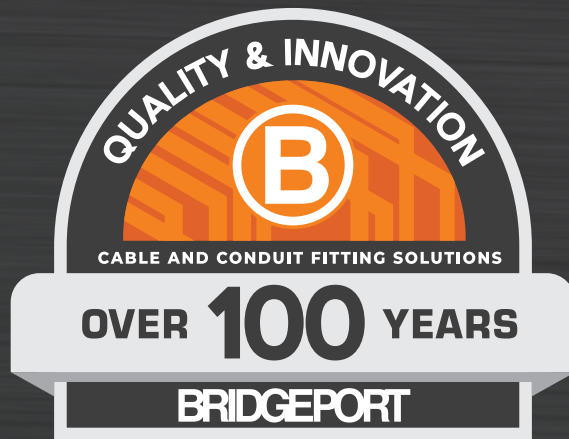

VALOX CORD GRIPS

An alternative to stainless steel, Valox non-metallic cord grips provide excellent resistance to heat, chemicals, and corrosion. Featuring a neoprene compression bushing and nylon anti-friction washer, they are ideal for non-metallic applications requiring lightweight, non-conductive performance.

STAINLESS STEEL CABLE AND CONDUIT SUPPORTS.

USS-6171, UCSS-series, and 2100-S series.
