

The Next Generation of Liposomal Antioxidant Defense

SHIELD YOUR CELLS. STRENGTHEN YOUR HEALTH.

From Dr. Shade

"The body has its own transporters for ergothioneine, which allows it to concentrate in tissues and then go where it's needed. Ergo-Thione+ also includes glutathione, vitamin C, and selenium - and this formulation doesn't just help neutralize free radicals—it intelligently works within the body's antioxidant network, restoring glutathione levels, supporting mitochondrial function, and promoting longevity at the cellular level."

Product Overview & Key Benefits

Ergo-Thione+ is a breakthrough antioxidant formula designed to help safeguard cells from oxidative stress, support a healthy inflammatory response, and activate key longevity pathways for optimal health. Powered by Quicksilver's advanced liposomal delivery technology, Ergo-Thione+ improves upon the absorption of ingredients, including the product's hero nutrient, ergothioneine—an extraordinary antioxidant that is naturally present in mushrooms but difficult to absorb in its pure form.

ADAPTIVE ANTIOXIDANT

The body has dedicated transporters for ergothioneine making it easy to provide 'on-demand' antioxidant action

LONG-TERM RESILIENCE

The nutrient ergothioneine is known to concentrate in cells to provide a reserve of antioxidant support for long-term wellness

CELLULAR HEALTH & DETOX

A masterful blend of the antioxidants ergothioneine, glutathione, vitamin C, and selenium provide synergistic cellular aid and detox support

ADVANCED ABSORPTION

Uses Quicksilver's proprietary liposomal delivery technology for high bioavailability and fast results you can depend on

LONGEVITY NUTRIENT

Ergothioneine is one of the new darling antioxidants in supplementation and coined the 'blue zone' vitamin for its powerful longevity benefits

SUGGESTED USE

Take 1 tsp by mouth and hold for 30-90 seconds before swallowing. Repeat to desired dosage or as directed by your healthcare practitioner

How It Works

Ergo-Thione+ is a masterful formulation of the endogenous and exogenous water-soluble antioxidants ergothioneine, glutathione, vitamin C, and selenium. Ergothioneine, a naturally occurring sulfur-containing amino acid, serves as the hub, connecting the other antioxidants in the formula, and has an extremely unique ability to function "on-demand", concentrating in damaged tissues.

Why Trust Us?

Quicksilver Scientific® has been formulating and manufacturing highly bioavailable liposomal supplements since 2006.

- Leader in highly bioavailable liposomal delivery system technology
- Sold in 30+ Countries
- Trusted by 30,000+ practitioners and healthcare providers
- 38 patents issued or pending
- NSF Certified, GMP onsite manufacturing

At Quicksilver Scientific, we were among the first to master pharmaceutical-grade liposomal technology, unlocking the precise chemistry required for superior nutrient delivery in the nutraceutical industry.

Our liquid liposomes maintain a clear consistency, made possible by advanced nanoparticle sizing between 20-100 nanometers, ensuring rapid absorption the moment they enter your system.

This precision technology enhances the delivery of key ingredients like ergothioneine, a powerful longevity antioxidant that supports cellular health and helps combat oxidative stress.
