# NEBO®

ILLUMINATE POSSIBILITIES®

THE GOOD STUFF

OTHERWISE KNOWN AS THE TABLE OF CONTENTS

Calling all doers and dabblers, thinkers and tinkerers...
keep on creating, experimenting and exploring. We'll continue
to imagine new ways to bring light to what you do.

THE TECH

THE GEARS AND GUTS THAT GET IT GOING

In a world of rapidly changing technology, keeping up with the latest trends is hard, but doing so only takes you as far as someone else has already gone. At NEBO, we like to explore uncharted territories. That's the trailblazer mind-set. What makes NEBO better? What makes NEBO different? The answers can be found in our technology, where instead of just asking why, we ask "why not?"

C·O·B (CHIPS ON BOARD)
Uses smaller, easier-clustered LED chips that mount directly to the circuit board to work together as one lighting module, outperforming traditional lighting by up to 50 times per centimeter of light surface.

ARCUS™
A new, proprietary C·O·B LED technology that allows the shaping of light into full 3D patterns, giving optimal, bright, uniform light exactly where it's needed.

OPTIMIZED C·O·B
Provides industry-leading brightness and zoom capability in spot mode, and a perfectly dispersed flood light beam with our integrated OC Technology.

SMART POWER CONTROL™ (SPC)
Creates a seamless transition through light modes to extend battery life and allow your eyes to adjust more easily.

SMART TEMPERATURE CONTROL™ (STC)
Utilizes advanced circuitry to actively regulate light output and monitor temperature to preserve battery life and ensure safe, reliable operation.

FLEX-POWER™ TECHNOLOGY
Provides power and operation with the use of either rechargeable batteries or disposable alkaline batteries.

L·E·P (LASER EXCITED PHOSPHOR)
Generates a stable, more visible light beam that can project over incredible distances.

OPTIMIZED POWER CURVE™
Efficiently utilizes battery power to provide a steadier, more consistent light beam over extended periods of use.

OC™ (OPTIMIZED CLARITY) TECHNOLOGY
Creates a perfectly dispersed beam of intense, pristine light that is as bright on the edge as it is in the center when used in flood mode.

EASY TOUCH
Simple and intuitive push button operation quickly cycles through multiple light modes.

MAGNETIC MODE SELECT DIAL
Easy-to-use twist dial allows you to quickly and easily select the light mode of your choice.

POWER MEMORY RECALL
Quickly accesses your preferred light setting, so you don't have to cycle through the light modes.

NEBO

MYCRO® 450
HEADLAMP & CAP LIGHT

RECHARGEABLE

LIGHT MODES
- Turbo (450 lumens) - 30 seconds* / 80 meters
  *After 30 seconds, light returns to the previously used mode to prevent overheating and protect the battery. Turbo mode can be reactivated at any time.
- High (150 lumens) - 1 hour / 50 meters
- Medium (50 lumens) - 2 hours / 18 meters
- Low (15 lumens) - 5 hours / 10 meters
- Green - 10 hours / 3 meters
- Red - 10 hours / 3 meters

DESIGN
- USB-C rechargeable
- Detachable cap light clip with 130° adjustable tilt
- Smart Power Control (SPC)
- Direct-to-Red
- PowerSave™ lockout
- Battery charging indicator
- Water (IPX4) and impact-resistant

OPERATION
- Side-positioned button controls power and mode selection

ACCESSORIES
- Adjustable head strap; one size fits all
- Removable cap-light clip
- USB-A to USB-C charging cable

BATTERIES
- Powered by internal rechargeable battery (Recharge time: 0.5 - 1 hour)

SPECS
- 0.25 lbs.
- (H) 1.75" x (W) 2.75" x (D) 0.6"

• NEB-LTN-1004 Old Red Lantern (pg. 77)

*There is a one-time $35 fee (per custom print/engrave order), which includes the setup for either screen printing or laser engraving. This setup fee covers the logo/text printed in a single location on the product, using a single color. There is an additional charge for printing or laser engraving on multiple locations or printing in more than one color. There is a $0.50 charge per unit for products that require removal from a box or natralock packaging.
