

## STEEL "T" SHAPED HANDLES AND STRAP MAKE CARRYING OLD WATER HEATERS EASIER, ESPECIALLY IN TIGHT SPACES.

### FEATURES

- ✔ Steel "T" shaped handles with 1" female steel threaded end
- ✔ Includes 1" to 3/4" steel reducer
- ✔ Screws onto the inlet and outlet of water heater for secure gripping and carrying
- ✔ Carrying strap acts as a bottom sling for an easier two person lift, especially on stairs

### TECHNICIAN INVENTED. TECHNICIAN PROVEN.

While struggling to remove a water heater in a tight stairwell, HVAC technician Sal Murgolo came up with the idea of the water heater handles. Since the top of water heaters offer no effective area to hold onto, he developed easy grip handles to attach to the inlet and outlet areas of the unit. His goal was to make the removal of old water heaters easier for plumbers and technicians, especially in tight spaces.
