

Breathe Easy with Fast-Acting Hista-Aid®

NANOFORMULATED SUPPORT FOR BALANCED HISTAMINE LEVELS & IMMUNE FUNCTION

From Dr. Shade

"Immune reactivity is common, whether it's from seasonal discomforts or food sensitivities, the body's response is to release a compound called histamine which can cause unwanted symptoms like itchy eyes, sneezing, and brain fog. Nanoformulated Hista-Aid is a fast-acting immune support product designed to tame that response and bring the system back into balance."

Product Overview & Key Benefits

Hista-Aid is an advanced blend of vitamin C, quercetin, luteolin, and diindolylmethane (DIM), formulated to support a balanced histamine response, modulate immune function, and promote overall well-being. Histamine is an important chemical released by the immune system in response to reactivities, but unchecked levels can lead to unwanted symptoms. Developed using Quicksilver's proprietary nanoformulated delivery technology, Hista-Aid is your fast-acting, go-to solution to calm an overactive immune system.

HISTAMINE BALANCE

Helps stabilize mast cells and balance histamine levels

HEALTHY INFLAMMATORY RESPONSE

Aids the activation of important inflammatory-controlling compounds

IMMUNE REGULATION

Supports healthy immune activity and a regulated immune response

FAST-ACTING ABSORPTION

Nanoformulated delivery technology offers rapid absorption of ingredients for immediate support

ANTIOXIDANT SUPPORT

Helps combat free radicals and quench oxidative stress

SUGGESTED USE

Take 4 pumps by mouth holding 30-90 seconds before swallowing. May take 8-10 pumps for advanced cases

How It Works

Histamine plays a crucial role in immune function, inflammation, and neurotransmission, but imbalances can lead to unwanted symptoms and systemic discomfort. Hista-Aid combines scientifically backed ingredients to support the regulation of histamine activity and immune balance. Quercetin and luteolin are potent flavonoids that have been shown to stabilize mast cells, reduce histamine release, and offer inflammatory balance. Vitamin C is known for stimulating the production of DAO enzyme to support histamine breakdown, while DIM supports a healthy inflammatory response and balanced immune activity.

Why Trust Us?

At Quicksilver Scientific®, we develop innovative health solutions rooted in nature and backed by science. Quicksilver Scientific has been formulating and manufacturing highly bioavailable liposomal supplements since 2006.

- Leader in highly bioavailable liposomal delivery system technology
- Sold in 30+ Countries
- Trusted by 30,000+ practitioners/healthcare providers
- 38 patents issued or pending
- NSF Certified, GMP onsite manufacturing

At Quicksilver Scientific, we were among the first to master pharmaceutical-grade liposomal technology, unlocking the precise chemistry required for superior nutrient delivery in the nutraceutical industry.

Our liquid liposomes maintain a clear consistency, made possible by advanced nanoparticle sizing between 20-100 nanometers, ensuring rapid absorption the moment they enter your system.

Not all liposomal supplements are created equal—quality, chemistry, and manufacturing expertise matter.

**SMARTER SCIENCE.
UNPARALLELED RESULTS.**

**Breathe Easy.
