

## Launching July 2025

- Four standard shapes: square, rectangle, round, and oval and in a variety of sizes
- LIO can be purchased with our standard plug-in control box or our battery pack solution which lasts up to 200 cycles on a single charge (approx. 3-6 months dependent on frequency of use)
- LIO's centered base configuration is ideal for collaboration and meeting areas
- LIO's off-centered base configuration is ideal to use as an executive workstation
- Inlay the control switch for easy access - select the position from various standard options
- Two button and four button control switch available
- Base: anodized aluminum columns with a thick steel bottom plate for durability and stability
- Worksurface: thermally fused laminate (cut and edgebanded in-house)
- Upgrade to custom HPL
- Finishes:
  - Base: black or silver
  - Worksurface: all standard TFL laminate finishes available. [Review here.](#)
- Made in Wisconsin
