

HEAVY-DUTY TIRE REPAIR KIT with (PLUG BOND™)

KIT DE REPARACIÓN DE LLANTAS DE TRABAJO PESADO

HOW TO PLUG A TIRE

● Step 1

Remove any puncturing objects from your tire.

● Step 2

Slide the reamer tool in and out of your tire puncture multiple times to roughen and clean the inside of the hole.

● Step 3

Remove a plug from its clear backing, then thread it halfway through the eye of the plugger needle. Coat the middle section of the tire plug with Plug Bond.

● Step 4

With the plug centered in the eye of the needle, start pushing the plugger tool and plug into your puncture. The insertion tool collar will stop the insertion of the plug at a certain depth to help ensure the plug is inserted to the proper depth.

● Step 5

Pull the plugger tool straight out of your tire with a rapid motion, leaving the tire plug behind. Do not twist the needle.

● Step 6

Use the utility knife to shorten the tire plugs sticking out from the tire

● Step 7

Reinflate your tire to the recommended pressure.
