

TUBE STRAIGHTENERS

The MalcoEdge™ Tube Straighteners are designed to accurately straighten light wall copper tubing from coils, delivering clean, uniform lines for professional-grade installations. Ideal for HVAC, refrigeration, and plumbing applications, this tool eliminates bends, kinks, and irregularities that can disrupt system performance. Built for durability and ease of use, it ensures efficient tubing prep, supporting leak-resistant joints and optimized refrigerant or fluid flow.

PERFECT FOR:

- Line Set Prep
- Mini-Splits
- Residential HVAC Installs
- Gas Lines
