Restore
the Wood
Nature Destroyed

WHY TRANSFORMATION LOG & TIMBER STAIN?

- **Beautiful glossy finish:** showcases the natural woodgrain.
- **Flexible and durable** blend of oils both penetrate and leave a flexible film to protect against insect, moisture, and UV damage.
- **Ideal for restoration projects** where the current stain is either a non-drying oil or unknown. (But also great on new builds, too!)
- **Chemically compatible** with all Sashco caulking and chinking products.
- **Exquisite color portfolio** curated specifically for log homes.
- **12 popular colors to choose from.** Pick one of the “out of the bucket” colors or layer different colors for a shade unique to you.

NEVER SURRENDER YOUR FATE TO A *color card*

Wood age, porosity, species, and more will affect the final outcome of the color on your home. Scan the QR code to request free stain samples, download the full Transformation Log & Timber Performance Report, and more.

THE *Restoration* PROCESS

The log below highlights the stain restoration process on a log home:

1. Peeling stain and gray, weathered surfaces...
2. ...Are brought back down to bare wood, then...
3. Buffed to remove fuzzing - a clean, sound surface ready to be...
4. Stained with Transformation Log & Timber.
5. When regularly maintained with a fresh coat of stain, weathered, neglected wood is a thing of the past.
