

Max2000 Bulldog Snip

Work. Perform. Outlast.

Limited Lifetime Warranty

MAX[®]
2000

Max2000 Bulldog snip offers a narrower grip opening that accommodates large or small hands to maximize the powerful leverage of compound handle-to-head linkage. An ambidextrous thumb operated handle latch and easily replaceable compression spring complete this user-friendly design. This snip features shorter blades with a serrated lower jaw for controlled notching and trimming out to the blade tip in layered sheet metals and metal seams.

Nothing outcuts,
outmaneuvers
or outlasts Max!
