

BEARING BUSTER BEARING REMOVAL TOOL

Tired of bearing replacement busting your knuckles? The Bearing Buster is designed for fast, painless removal of old, rusty or corroded bearings in need of replacement. By using a slide hammer technique, maximum power is generated with minimum effort. Choose from three sizes to fit the application.

Features / Benefits

- Slide hammer action
- Breaks bearing loose from shaft and bracket
- Reduces bearing replacement time
- Ergonomic rubber hand grips
- Choose from 3/4", 1" or 1-1/4" shaft size
