Malco®

75
YEARS

TOOL BOOK

**LEADERS OF INNOVATION
FOR 75 YEARS**

SL18900

Work. Perform. Outlast.

In 1950, Mark Keymer, a young steel supply salesman, manufactured and marketed a pipe crimper he had invented for installing metal ductwork in heating systems. He insisted on quality construction, setting the benchmark for the new company. The rest is Malco history. Customer brand loyalty, carefully cultivated over the past 75 years, reflects Malco's commitment to innovative, dependable, high-performance hand tools and accessories for specialized markets in the heating, ventilation, air-conditioning, and refrigeration (HVACR) industry; exterior remodeling field, including roofing, siding, and gutter installation; fence, deck, and rail installation. We create work saving products that make the tough jobs easier. The pros do more, Malco distributors sell more.

Proudly Supporting The Trades

Malco is proud to support students learning a trade and the hard-working professionals who use Malco tools day in and day out. Each school term, Malco recognizes outstanding graduating students in the HVAC / sheet metal and building construction fields through the Head of the Class Student Recognition Program.

Milestone

Malco will be celebrating 75 years with some exciting contests in 2025, visit our website www.malcotools.com for more info!

The History of Malco.....

Malco is Born

Mark Keymer, a steel supply salesman, founds Malco in 1950 and establishes a legacy of innovation, efficiency, and quality.

Mark develops unique compound leverage hand tools for job-site metal fabrication.

Company Growth

The 60s were comprised of continued company growth, personally training sales reps, new product development/updates, and ramping up trade show attendance.

Malco's sales rep force, an essential link to wholesale distribution, grows to provide national coverage. Mark started hosting educational "Tool School" sessions to enhance product knowledge and high customer service standards.

To further enhance user efficiency and control, sleek vinyl grips were added to existing compound leverage tools.

The Move West

The 70s included the big move to Annandale, MN, which is where the current U.S. Malco headquarters is located, as well as entering a new product market, releasing Zip-in® Screws, and experiencing a shift in leadership.

Mark Keymer retires as president with his son Gerry taking leadership.

Big Changes

The 80s brought big changes to Malco's internal processes and packaging, which streamlined plant operations and enhanced distributor merchandising efforts.

The first skin carding line begins operation in the Packaging Department. The peggable packaging was designed to enhance product visibility, enabling wholesale distributors to have more effective merchandising.

Malco invests in internal systems and in-house educational programs on Manufacturing Resource Planning,

Just-In-Time Production System, and Statistical Process Control.

1980s

What's your favorite Malco Tool?

AVs® Snips

"My offset AVs. Both red and greens are in my bag that goes into every service call/install right off the back. Extremely versatile tools."

C-RHEX® Cleanable-Reversible, Magnetic Hex Drivers

"C-RHEX 1/4 to 5/16 or 5/16 to 3/8 my new favorite 3/8 to 7/16. I don't have to carry multiple Hex drivers."

Hand Seamers

"Hand seamers, they are just plain better than any other brand."

TurboShears®

"I would have to say TurboShears because they are fun to use and make cutting sheet metal quicker and easier. I like how effortlessly they cut through material."

TurboCrimper®

"Malco TurboCrimper. It crimps faster and better than anything else I've ever used."

Setting Hammer

"I have owned a Malco Setting Hammer for my whole 20 year career. Malco makes tools that last."

"My Andy Snips. They were some of the first tools I ever bought and I have never replaced the blades. It still cuts as good as if it was brand new."

A Shift in Ownership

Many big milestones occurred in the 90s, with Malco revolutionizing their product development and purchasing process, releasing many new tools, going online, and shifting ownership.

On the eve of Malco's 50th anniversary, Gerry Keymer sells his share of the company to begin the process of transferring ownership of Malco to an Employee Stock Ownership Plan (ESOP).

Innovation

Malco entered the 21st century with breakthrough innovation and student recognition. This decade features the release of the original TurboShear® drill attachment that sparked the development of other power-assisted tools, the creation of ergonomic Redline® Handles, and the introduction of the "Head of the Class" Program.

C-RHEX®unleashed

This recent decade encompassed a new market venture, exciting product updates/releases, enhanced sustainability initiatives, majority employee ownership, and company awards.

Malco introduces an exclusive, dual-sided 1/4 in. and 5/16 in. C-RHEX® Cleanable, Reversible Magnetic Hex Driver with 2 in. length that rapidly becomes a best-selling tool in the HVAC market.

Currently....

Malco was acquired by Aspen Pumps Group in 2024. The acquisition resulted in tremendous value for Malco's ESOP participants. With outstanding strategic, cultural and commercial synergies, Malco becomes the headquarters for Aspen Pumps Group North America securing future growth.

The Malco 7-in-1 Flip Bit is the top pick for Trade Pros. With seven essential functions all built right into its compact size, it's a whole toolkit built for on-the-go Trade Pros. Manufactured with superior-quality materials and packed with useful features, this tool is proven to perform on the job site.

Cleanable, Reversible, Stackable:
Easy maintenance and versatile storage

Secure Precise Fit:
Reduced screw wobble, slipping, and tip-out

Color-Coded Sockets:
Quick socket size identification

Ultra-Powerful Magnet:
Ensures a secure hold for hassle-free fastening

Secure Socket Storage Retention:
C-RHEX® sockets stay securely stored on the shaft

Impact Rated:
Works with any driver or can be used with the CONNEXT3® handle by Malco

Handle sold separately. See page 48-49 for CONNEXT handles.

+ Zip-in®

U.S. Patent No.
10,328,554**Eliminate Magnet Damage.**

The Ultimate System is designed to eliminate magnet damage. C-RHEX 1/4 in. and 5/16 in. hex drivers perfectly fit Zip-in and Bit-Tip screws without touching & damaging the magnet.

Save Time and Money!

The Ultimate System extends the life-span of C-RHEX hex drivers, while using the most trusted sheet metal screws on the market!

- Malco's exclusive, dual-sided magnetic hex drivers are simple to change hex sizes with 2-EZ Technology.
- Easily remove metal shavings from the magnet by removing the socket and wiping it off!

Zip-in®

Self-Piercing sheet Metal Screws

Rated #1, Zip-in® screws are the best selling sheet metal screws worldwide.

A unique thread design and quality controlled manufacture spell the Zip-in® difference.

Zip-in's® sophisticated heat treat process allows the screw to taper to a fine, sharp point without sacrificing critical point strength. They are also faster driving, with a greater capacity for fastening heavier gauges of sheet metal than any other self-drilling type.

1.) Burr Free Hex Washer Slotted Head

- One 1/4 in. hex driver accommodates tall sizes of Zip-in screws.
- Full 1/4 in. (No. 8) head will not strip out of hex driver opening at any ring operation.

2.) Undercut-Indented Hex Washer Slotted Head

- Undercut - Always seats flush.

3.) Combination Lead Double Thread

- Starting thread machined down to very tip of screw point.
- Instantly penetrates and engages in heavy gauge sheet metal and layered light gauge.

4.) Sharp Tapered Point

- Quality controlled heat treat.
- Sharp tapered point will not mushroom, break or walk.
- Complete operator control with precise hole alignment.

+ Bit-Tip®

U.S. Patent No.
10,328,554**Eliminate Magnet Damage.**

The Ultimate System is designed to eliminate magnet damage. C-RHEX® 1/4 in. and 5/16 in. hex drivers perfectly fit Zip-in® and Bit-Tip® screws without touching & damaging the magnet.

Save Time and Money!

The Ultimate System extends the life-span of C-RHEX® hex drivers, while using the most trusted sheet metal screws on the market!

- Malco's exclusive, dual-sided magnetic hex drivers are simple to change hex sizes with 2-EZ Technology.
- Easily remove metal shavings from the magnet by removing the socket and wiping it off!

Bit-Tip® Drill & Tap Screws

The One-Operation Fastener with a True Drilling Action Point

Bit-Tip drill and tap screws produce the optimum hole size for a quick tight fit.

Now even faster!

Drill & Tap Screws drill their own holes, taps a matching thread in steel .220 thick in less time than it takes to drill a pilot hole for other standard fasteners.

Choose from
Hex or Slotted

Hex Slotted Washers

**The Bit-Tip Difference!**

By drilling its own hole, Bit-Tip® produces the optimum hole size, resulting in better thread engagement and a tighter fit. One-operation fastening also means no alignment problems.

Bit-Tip® has a wide range of industry applications. Select the Bit-Tip® that's right for the job. Point length will determine metal thickness that can be drilled, tapped, and fastened.

Also, plywood, soft wood, composition board, drywall, insulation, and laminates may be fastened to metal framing or components.

Made from strong, high quality, specially heat treated steel. Bit-Tip® Self Drilling and Tapping Screws are precision cold forged insuring uniformity of dimension and drill point contours.

The versatile Bit-Tip® Screw is an excellent replacement for fastening operations now using rivets, nuts and bolts, spot welds, or adhesives. Bit-Tip® also eliminates the need for costly auxiliary fastening equipment such as drill bits, taps and welding equipment.

Requires only a standard screw gun power tool rated at 2500 RPM equipped with drilling depth locator.

U.S. Patent No.
D524,638

Look for the Dots! ® Trademarked & Patented Head Markings indicate one and only genuine Bit-Tip®.

CONNEXT® 3 Ratcheting Handle

Magnetic!

CONNEXT® Ratcheting Handle and Professional Kits

Magnetic Hex Driver Kits. Whole Kits feature popular assortments of handles and magnetic hex chuck driver shafts in a premium zipper pouch with belt clip and carabiner for portability, built-in magnetic panel to hold fasteners, and velcro pouch on the front for extra storage

Versatile Ratcheting Handle

A forward or reverse ratchet driving mechanism, as well as the locked driving position of the CONNEXT ratcheting handle, meets torque capacity standards (including ANSI) comparable to a 1/2-inch solid shaft driver! The clear, molded acetate, full grip is shock-proof, shatter-proof and fluted to fit any hand. The quick-connect holder mechanism accepts most 1/4 inch hex shank power drive or insert bits as a shaft, including all Malco hollow or magnetic hex chuck drivers.

4 in 1 Nut Driver

Quickly change hex sizes.

Malco's exclusive, dual-sided magnetic hex drivers fit over a magnet-tipped, ball locking hex shaft, and can be quickly reversed to change sizes.

4
HEX Sizes

1/4, 5/16, 3/8
& 7/16 in.

Positive Lock

A quick-release, secure positive lock secures telescoping shaft in position and prevents collapsing when forceful in-line pressure is applied during use.

3 Position Combinations

The 4-in-1 Nut Driver is perfect for pocket or pouch, and offers superior performance, ease of use and long service life. The driver shaft can be extended or retracted to produce three different end to end combinations: 1/4 and 5/16 in.; 3/8 and 5/16 in.; and 1/4 and 7/16 in.

Sure Fastener Engagement

Hardened chrome vanadium steel sockets offer sure fastener engagement and control. The comfortable 3-lobe handle is made of high-torque ABS plastic, and a non-slip TPR over-molded grip offers additional comfort and control on the job.

Two Package Types

*Available in Single Packs
and 12 Pack Box Display!*

IMPACT RATED

HC2
2-20 in. (51-508 mm)
Diameter Circles

Malco Hole Cutters are the longest lasting, fastest cutting solution for cutting holes in sheet metal.*

*based on internal testing

HC1
2-12 in. (51-305 mm)
Diameter Circles

HC1 is adjustable for making 2 to 12 in. (51 to 305 mm) diameter holes. The larger HC2 model cuts 2 to 20 in. (51 to 508 mm) holes. A combination English / Metric diameter gauge is standard, and both quickly install into the chuck of any impact or drill as small as 1/4 in. (6.35 mm).

The Real Difference Gold Standard Cutter Bits

Malco cutter bits feature a long lasting, mill type cutting edge and large flat for adjusting the cutting edge location up or down to extend bit life. One cutter bit fits either model and is easily replaceable. Available in single (CB), 6-pack (CBB), and 100-pack bulk tub (CB100).

Enlarged to show detail.

8. HC1B - Pivot Pin Set

IMPACT RATED

**78%
Faster**

THAN A MANUAL
SHEET METAL
CRIMPING TOOL!

*verified by internal testing

5X Faster*

*based on internal testing

Based on Actual Field Trials!

The Malco TurboCrimper® IMPACT is designed to work with a minimum 12 volt DC cordless or maximum 7 amp AC corded impact driver equipped with a quick release 1/4 inch hex chuck.

Chuck it up and Go!

No set-up or adjustment is needed to immediately begin crimping multiple sizes, types, and thickness of round metal duct, including spiral duct and metal stove pipe.

Time and Labor Saving.

Simple, effective design increases speed and ease of crimping 30 – 24 gauge (0.41 – 0.71 mm) galvanized steel round duct and (0.31 - 0.61 mm) cold rolled steel stove pipe. (minimum 3" pipe)

Storage? No Problem.

The compact TurboCrimper® IMPACT is easy to balance while in use and stores easily in a pouch or bag when not in use.

Operating Tips

Begin crimping at angle after crease

Exit crimping at slight angle before crease

MAX
2000

*Nothing outcuts,
outmaneuvers, or outlasts Max!*

M2006

Max2000® Snips

M2001

M2003

Max2000® Left, Right, and Combination Aviation Snips

feature alloy steel blades with serrated lower jaws for solid gripping power in sheet metals, vinyl plastics, layered metals, and seams (including "S" cleats).

M2002

M2006

Versatile Max2000® Offset Right and Left Aviation Snips

feature a serrated upper jaw of hardened alloy steel and a forged steel lower jaw to produce a strong, sharply defined cutting edge for superior offset maneuverability and cutting performance.

M2007

M2004

Sharp Tipped
Center Jaw

The Max2000® Double-Cut Snip employs a best of all worlds close tolerance design for consistent performance. A curved cutting edge on the center jaw reduces cutting force required and large relief grinds on all jaws minimize drag. The double cut blades feed smoothly, cut cleanly without surface distortion, and easily navigate metal seams encountered in round metal duct and stove pipe. A self-starting point on center jaw makes short work of blind cuts.

M2005

The Max2000® Bulldog Snip

features shorter blades with a serrated lower jaw for controlled notching and trimming out to the blade tip in layered sheet metals and metal seams.

BIG

**performance
miniaturized.**

Only 7-1/8 in.

At only 7-1/8 inches (181 mm), the AVs® Mini easily goes to work in tight or awkward spaces where full-size aviation snips are challenged. A 3/4 inch (19 mm) length of cut provides the optimum speed for confined cutting applications where this small, maneuverable snip excels.

Each snip is made with forged steel jaws that contain precision-ground serrations on the lower blade, which produces a sharply defined edge for cutting accuracy and control.

Ultra

Lightweight Snips

The ULC10 Ultra Lightweight Metal Cutting Snip offers a light, yet powerful option for cutting aluminum, and 26 gauge steel. The ULC10 has a strong, lightweight 10 inch polymer frame and is easy to grasp while making big 3 inch long controlled cuts. It also utilizes a fully threaded brass insert, thermally anchored in the blade area of the polymer frame. The insert offers greater holding power with no loss of thread integrity, resulting in superior performance.

- Strong, lightweight 10 in. (254 mm) polymer frame
- Easy-to-grasp, protective handle loops
- Big 3 in. (76 mm) long controlled cut
- Designed for all weather conditions
- Includes a Full-Size Handle

Worry Free Blade Changes

A fully threaded brass insert thermally anchored in the blade area of the polymer frame for holding power and no loss of thread integrity.

REDLINE®

HANDLES by Malco

Longer Lasting Performance:

Wear resistant, hardened steel construction throughout. Hardened steel also produces greater handle strength to resist abuse and collapsing. Nickel plating resists elements.

S2R

S2R The 3-1/4 in. (83 mm) seamer is designed for the metal trades including, HVACR installation, metal roofing, and siding applications.

S6R The BIG 6 in. (152 mm) seamer is a power house for folding large bends in galvanized sheet metal.

S5R Designed with Die-Cast Zinc jaws. These seamers easily make clean bends without ruining paint finishes.

3-1/4 in. Hand Seamers

3-1/4 in. (83 mm) Jaws with
1-1/4 inch (31.8 mm) Bending Depth

6 in. Hand Seamers

Big 6 in. (152 mm) Jaws with
1-1/4 inch (31.8 mm) Bending Depth

3-1/4 in. Hand Seamers (Offset)

3-1/4 in. (83 mm) Jaws with Offset Handles.
1-1/4 inch (31.8 mm) Bending Depth

Malco Hand Seamers with forged steel jaws, are the premier choice for bending, folding, flattening and straightening sheet metal edges or safely gripping and moving sheet metal around the job site.

Designed for the metal trades, including HVACR installation, roofing and siding applications, and commercial building and remodeling, these seamers are available in 3 inch (76.2 mm) and 6 inch (152.4 mm) jaw widths as well as an offset 3 inch (76.2 mm) size for overhead work. Depth markings graduated in 1/4 inch (6.4 mm) increments are complemented by

a powerful compound leverage design. Easily bend flanges or completely flatten seams from 1/4 to 1-1/4 inch (6.4-31.8 mm) deep in 24 gauge (0.71 mm) galvanized or (0.61 mm) mild steel. Hardened steel handles resist abuse. Powerful compound leverage design. Tool also features rust resistant nickel plating.

5 in. Hand Seamers

Compact 5 in. (127 mm) Jaws
with 2 in. (51 mm) Bending Depth

9 in. Hand Seamers

Big 9 in. (229 mm) Jaws
with 2 in. (51 mm) Bending Depth

Easy Folding Bends without ruining paint finish! Die cast zinc jaws are gentle on painted or coated metal surfaces and ideal for making clean and accurate bends and seams in aluminum roof flashing, coil stock or fascia.

The jaws feature depth graduations in 1/4 inch (6.35 mm) increments to a maximum 2 inch (50.8 mm) bending depth. The jaws of these large die cast seamers are bowed so that they will hold firmly and evenly across the entire jaw width even when engaged on very light material.

These Seamers are not warranted for use as a striking tool or for prying or bending heavy ferrous sheet metal. Durable construction offers long, dependable service life under normal use. These tools also feature rust resistant nickel plating.

HANDLES by Malco

Easy Hand Motion and Greater Control:

A superior compound leverage mechanism offers maximum ease of operation. Comfortable opening and spring-actuated handles give additional comfort and control. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

C5R with Longer, shallower crimps produced with the C5R result in a tighter fitting, more self supporting, leak-proof connection in sheet metal pipe & duct.

Both the **N1R** and **N2R** Notchers make Fast, Clean, 30° "V" shaped cuts for HVAC duct fabrication.

SL1R joins sheet metal, duct and pipe sections economically.

C5R

3-Blade Crimper

Ideal for crimping heavy 24 gauge (0.71 to 0.86 mm) galvanized sheet steel.

Long wearing steel components are nickel plated to resist elements. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

5-Blade Crimper

Ideal for crimping heavy 24 gauge (0.71 to 0.86 mm) galvanized sheet steel.

Long wearing steel components are nickel plated to resist elements. Ergonomic Redline Handles with unique one-hand operation latch offer maximum compound leverage performance and natural fit and feel.

5-Blade Crimper (Offset)

Ideal offset crimper for tight-working quarters or working over-head.

A unique blade design keeps handles offset and keeps hands off work obstacles such as floor joists and underlayments. The handle design also promotes correct gripping of tool resulting in less wrist fatigue. Long wearing steel components are nickel plated to resist elements.

Hand Notcher (13/16 in.)

Fast and easy cutting. Notcher makes a clean 30° "V" shaped cut in sheet metal.

13/16 in. (20.6 mm) maximum throat depth. Upper cutting jaw is drop forged high impact alloy steel. Hook design of cutting jaw facilitates notching corners or take-off tabs to desired depth without slipping. Long-wearing, hardened stamped steel components.

Hand Notcher (1 in.)

The N2R Notcher punches a BIG 1 in. (25.4 mm) deep "V" notch in common 24 to 30 (0.71-0.41 mm) ga. galvanized sheet metal quickly and easily.

Folding and fabricating metal ductwork is easier than ever with the full 1 inch clearance the N2R single operation notcher provides. Precision-ground steel upper jaw and hardened stamped steel components.

Snap Lock Punch (1 in.)

Join sheet metal, duct and pipe sections economically with the Snap Lock Punch.

Punches raise a louvered shaped projection on metal edge for locking into rolled edge of sheet or piece to be joined. Metal pieces snap together and are fastened securely. Compound Handle Leverage for maximum ease of operation. Punch impression spaced 3/8 in. from edge of metal. Heavy forged cutting jaw.

TB1

Tool Bag

Rugged, heavyweight nylon tool bag organizes large and small tools with ample capacity and multiple interior and exterior pockets. Open pockets as well as velcro and zippered entries also accommodate other on-the-job necessities including cell phones and MP3 players! An easy grip, lock-tight web handle and generous padded shoulder strap make this stylishly engineered bag easy to tote and a welcome alternative to heavier steel tool boxes, less durable plastic trays and boxes, or catch-all bucket pouches.

TURN YOUR DRILL OR IMPACT INTO A POWERED SHEAR!

Trade Pro's know anything less than the best just won't cut it.

“ These shears work much better than I ever imagined they would. The blades stay sharp very well, and it cuts very cleanly. Also it's very maneuverable. ”

“ Worked in drill or driver impact. Performed as advertised and fast cutting. Quality product. ”

Long lasting blades make fast, smooth trim cuts and tight circular or rectangular cuts in metal ductwork, metal roofing and metal building panels.

Make fast straight, curved, or square cuts in most common sheet metals. A sleek, lightweight aluminum cast shear head and molded drill clamp allow maximum portability and ease to go wherever the work is.

**Designed for
18 ga. Sheet Metal**

More compact Telescoping Drill Clamp fits drills and impact drivers including lithium-ion models.

**Attach to any drill or impact for easy,
clean shearing on both edges of cut.
Cut either direction, as scrap spirals
out of tool path when cutting.**

The Double-Cut TurboShear® removes a narrow spiral scrap from the tool path to produce a clean, straight edge on both sides of the cut. Approach a cut from either end to produce a quality work-piece edge. Also navigate up to 90° outside profiles of metal roofing panels, or metal ductwork, and cut through seams!

**Designed for
18 ga. Sheet Metal**

Works with a drill or impact to navigate all popular vinyl siding styles and power your way through thick lock seams and profiles.

Vinyl Cutting TurboShears® provide easy scissor action for making straight cuts, circles, and squares in vinyl siding. A knife-like beveled blade edge quickly penetrates siding to start cut. Non-slip blades and 3/8 in. (9.53 mm) jaw opening tackles lock-seams with ease. Wide jaws combined with a 3/4 in. (19.05 mm) length of cut makes easy work of cutting through siding profiles.

Designed for cutting carpet, flashing, trim, rubber, and other vinyl type material.

Works with a drill or impact to make fast, clean, trim cuts in asphalt shingles along a roof valley, or tight left square cuts and circles to fit around utility outlets.

Make fast, smooth, trim cuts in multiple layers of asphalt shingles, up to 1/2 in. (12.7 mm) thick. Easily shear along a roof valley, or make tight left square cuts and circles to fit around utility outlets. An extra-wide jaw opening with beveled lead-in tip on the upper blade handles multiple shingle layers. And a wide, flat lower blade offers exceptional operator control. Heat-treated carbon steel blades with solid carbide inserts hold their edge longer in any life-rated shingle or shingle thickness.

Designed for Asphalt Shingles up to 1/2 in.

(13 mm) fiber cement backer board with
minimal dust!**

Designed to replace messy, imprecise, scoring and snapping methods of trimming backer board. A wide skid-plate on the head design stabilizes cutting action for extra smooth results. This versatile shear navigates curved-pattern cuts for window and door arches and will also cut 5/16-in. (8 mm) fiber cement siding plank. You can even rotate the tool's skid plate to maximize cutting life.

**Designed for 1/2 in.

MINI-BRAKE™

Compact & Portable

MB48A

Make big or small fabrications on the job with this lightweight and portable tool! The versatile Mini-Brake™ produces bends up to 135 degrees in sheet metals, including aluminum, copper and 22-gauge galvanized steel. The brake's compact size can accommodate sheet metal stock up to 4-feet wide, in any length, because there is no fixed throat depth to contend with.

Suitable for use
anywhere on
the job site!

Use the Mini-Brake™ anywhere on the job site, even on a truck tailgate, for a variety of fabricating tasks from large HVAC transitions to narrow roof flashing to structures as small as a 4-inch square. Strengthening ribs on the brake's anvil and apron assure consistent bends. A safety conscious, cam-over style clamping mechanism, similar to much larger shop-floor brakes, keeps the anvil secure in any position. Extra wide feet offer stability even when operating on a truck tailgate. *Optional legs are available separately.*

A 5/16 in. (7.9 mm) plate steel apron & adjustable strengthening ribs on anvil assure uniform bends across width of material.

Accommodates sheet metal up to 48 in. (1.2 m) wide in any length. There is no fixed throat depth to contend with.

Versatile bending range accommodates compact fabrications as small as a 4-in. (101.6 mm) square.

The Mini-Brake™ also bends metal roofing components and roof flashing including copper and aluminum.

Dual-direction, cam-over style clamps prevents anvil from free falling or creating a pinching hazard.

Pan Style MINI-BRAKE™

*Perfect for Drip Pans, Register Boxes,
and complex corners for Facia!*

The MB48B "Pan Style" Mini-Brake™ is designed to fabricate drip pans and register boxes, as well as complex corners for flashing and fascia, on the job. At just under 100 pounds (45 kg), it is carried comfortably by two people, or quickly separated into anvil and table

components for one-person transport. The MB48B operates on a workbench, tailgate, or optional legs to produce 135° bends in 22-gauge (0.86 mm) galvanized steel at a maximum 48 inch (1.2 m) width. A 5/16-inch (7.9 mm) plate-steel table apron and anvil frame, with adjustable set-back and strengthening ribs, ensures a uniform bend. Cam-over-center clamps keep the anvil secure in any position for safe operation.

MB48B

Finger Plate Widths:

(5) 2 in., 50.8 mm • (6) 3 in., 76.2 mm • (5) 4 in., 101.6 mm

Choose a combination of fingers that will span the bending width as closely as possible.

Adding space between fingers when arranging combinations to accommodate fractional or uneven numbered pan or box side-width dimensions will still produce an accurate bend. The anvil's clearance allows for a range of pan or box side-height dimensions from 1/2 inch (12.7 mm) to a maximum of 3 inches (76.2 mm).

**3/8 in. (9.5 mm) and 1 in. (25.4 mm)
folding depths up to a 30 gauge capacity.**

**Premium
Sheet Metal
Folding Tools**

Malco's 12F, 18F, and 24F Sheet Metal Folding Tools offer a premium choice for bending and forming metal. Each model is made with superior design and includes handy sight holes to ensure proper depth alignment. Whether you are an HVACR or roofing pro, Malco offers you the right tool to get the job done. Each sheet metal folding tool model can be used for various applications.

12F 12 in. (30.5 mm) Length

The 12F is ideal for HVAC applications such as 3/8 in. (9.5 mm) folds for drive cleats and big 1 in. (25.4 mm) deep folds for joist panning, plenums, register boots, trunk line end caps and more.

18F 18 in. (45.7 mm) Length

Longer 18F - 18 in. (45.7 cm) tool assures a uniform fold.

24F 24 in. (60.1 mm) Length

Extra long 24F - 24 in. (60.1 cm) tool may also be used as a mini brake by siding applicators.

Did you know?

Malco folding tools are formed from two steel halves, permanently joined together, and handy sight holes assure proper depth alignment.

Duct Stretchers for One-Hand drive cleat installation

Malco's Duct Stretcher to hold duct in place with one hand while slipping drive cleat in place with the other hand. The low profile, straight body is designed to go anywhere, even in the tightest quarters. Additional spacing holes allow wheels to be adjusted to span greater distances. Rugged anodized aluminum body features large vinyl cushion grip and a handy hang-up hole.

DS3	Locking Duct Stretcher	12 (305)	30 (851)

Replacement Parts

DS1C	Replacement wheels, nuts and screws (2 each)
------	--

Model DS3 locking duct stretcher pulls duct sections together and holds them in place while freeing both hands to align and install drive cleats.

Greater wheel clearance makes capturing the ends of duct sections, even misshapen flanges, easier than ever. The versatile shape of the DS3 frame also lets you hook and pull duct from above as the drive cleat is coaxed along the remainder of flanged track. The durable all steel frame extends beyond wheel edges, making it safe to push, hammer and bend drive cleats as necessary to complete installation. An offset handle design eliminates knuckle contact with work.

REDLINE

1/8 - 3/16 in. Hole Punch

The HP18KR Hole Punch does the work of more expensive, bulkier punches faster and easier!

The Malco HP18KR is designed to make holes along the edge of sheet metal and vinyl plastic, including rivet or screw fastener holes in metal ductwork and vinyl window extrusions. The tool is supplied with a 1/8 in. (3.2 mm) punch and die, pre-installed on the tool, as well as a 3/16 in. (4.8 mm) punch and die assembly. A stop gauge permits tool throat depth adjustments from 1/4 to 1-1/8 inches (6.4 to 28.6 mm) for easy hole placement. The tool body consists of a lightweight, die cast aluminum "C" frame head and hardened steel handles and parts stampings with a rust-resistant, nickel plating to ensure long service life.

- *Lightweight and maneuverable.*
- *Easily make holes in sheet metal & vinyl plastic.*
- *Replaceable punch & die installs on the job.*
- *Adjustable throat depth for easy hole placement.*

Duct Holders for Duct and Pipe

Like an extra pair of hands, this job-site duct holder supports sheet metal ductwork in place with clamps and a chain during installation until permanently secured. Temporarily suspending duct or venting from any joist is fast and easy. Double-ended keyhole also allows easy chain adjustment and locking in a horizontal clamping position, required for engineered joists, without the need to tie the chain around the clamp. Formed teeth hold the clamp securely in place on joist.

CAUTION: 20 lbs (9 kg) Maximum Work Load
For use on residential lumber and / or engineered I-beam construction only.

Holders also open wide and clamp securely for use on engineered wood joists.

Holds duct in place, either between or under joists until properly secured.

◀ Most Popular!

The most popular choice of sheet metal professionals worldwide, the Malco SH3 setting hammer's leather grip permanently conforms to the user's hand for ultimate comfort and ease of use.

SH3
Setting Hammer

Malco's Sheet Metal Hammers are individually hardened and tempered for strength and resiliency. The full-polished heads with beveled face and pein are corrosion resistant, making these tools last longer and work better. The one-piece forged, I-beam construction, make this a durable setting hammer for anyone to use on the job. Available in 12 oz., and 18 oz.

Pocket Sized Sheet Metal Scribe

Scribe common place trim lines on galvanized sheet metal quickly and accurately. Ten pre-set scribing depths from 1/8 in. to 1 in. (3 to 25 mm). Each scribing depth size features a dual edged point to create clean, readable and accurate score lines parallel to the edge of the metal sheet. Corrosion resistant finish and etched-in dimensions are readable for life of tool.

Adjustable Sheet Metal Scribe

Measure, mark, and scribe trim lines on sheet metal in one easy operation. Set desired trim depth on the 1/8 in. (3.2 mm) graduated scriber extension and tighten knob. The stop at the end of the scriber sleeve glides along edge of work as a 6 x 3/8 in. sheet metal screw point scribes a clean, hard line. Adjustable from 1/4 to 12-1/2 in. (6.4 to 318 mm) depths.

Expandable Trammel Points

Two sizes handle a variety of layout applications. The TR42 expands to a big 42 in. (107 cm) radius (84 in. diameter). The compact TR18 expands to 18 in. (46 cm) and stores in most tool boxes. All steel construction. Points are resharpenable and also replaceable. Telescoping arms are nickel plated to resist corrosion. Handle features a comfortable vinyl grip.

Carbide Tipped Scribe

Solid carbide tip for scribing fine lines on hardened steel as well as glass, ceramics, plastics or sheet metal. Retractable tip is easily replaceable. Tool has handy pocket clip. Carbide tip ensures long service.

Fast Adjusting Dividers

Accurate and fast adjusting. Two sizes for circles up to 32 in. (81 cm) and 42 in. (107 cm). Points are easily resharpened or replaced. Nickel plated steel body.

Scratch Awls

Use to scribe lines on metal, plastic, and a variety of other materials. Pierce holes in wood, plastic, leather - even light gauge metal. Blades are high carbon, alloy tool steel fully polished to resist rust. Blade tapers to a fine point and may be resharpened many times. Easy-to-spot red handles are shock and shatter resistant.

PEX Foam Board Stapler

**For in-floor radiant heating installation.
Magazine Fed Staples with Non-Jamming Design!**

Malco's FBSN Pex Foam Board Stapler is the ideal solution for installing in-floor radiant heating. A light-weight one-piece polymer magazine stands up to any rugged job-site environment. A leaf spring controlled stop automatically adjusts to setup the staples and guide it through the fastening mechanism without risk of jamming or deforming staples. Magazine loading-strips of 25 staples are joined together with a discreet plastic weld that allows staples to separate cleanly as they are engaged by the fastening mechanism.

Exclusive Dual-Barbed foam board staples increase bite and holding power!

FBSN1: 1-1/2 in. (38.1 mm) staples for 1 in. (25.4 mm) foam board, for 3/8 in. (9.5 mm), 1/2 in. (12.7 mm) PEX.

FBSN2: 2-1/2 in. (63.5 mm) staples for 2 in. (50.8 mm) foam board, for 3/8 in. (9.5 mm), 1/2 in. (12.7 mm), 5/8 in. (15.9 mm) PEX.

SmartTool™

with SmartClip™ Fasteners

For Fast, uniform layout of PEX to a wire-grid!

The SmartTool™ stapler is used to install SmartClip™ staples that secure an in-floor radiant heating layout of PEX tubing to a wire grid with foam board base. The ergonomic 38-1/2 inch (98 cm) tall SmartTool™ weighs only 6.1 lbs (2.8 kg) and saves time by operating from a standing position to attach SmartClips™ to a 10-ga (3.5 mm) wire grid. The installed SmartClips™ accommodate popular 1/2 inch PEX tubing, which the user also installs from a standing position by pressing into place with one foot while distributing the PEX along the clip layout. The SmartClip™ keeps the inserted PEX elevated over the wire grid to provide thorough concrete encasement and coverage.

PEX Tubing

PEX Uncoiler

**Organize and dispense PEX Tubing easily
and efficiently for a more uniform layout**

Compact Carrying Case

Organize and dispense PEX tubing easily and efficiently with Malco's PEX Tubing Uncoiler. A heavy-duty turntable supports a full coil of PEX (polyethylene cross-linked tubing). An eyelet loop opens for easy feeding or removal of tubing from the uncoiler unit. The rotating eyelet arm allows tubing to be pulled off in any direction. A Factory-adjusted tension prevents backlash and spreading of tubing coil off the turntable. The PEX Tubing Uncoiler is easy to setup, with no tools required to assemble, and takes up very little space in a truck or van. The entire unit stores in a steel-reinforced plastic case measuring 40 x 17 x 5 in. (102 x 43 x 13 cm). Carrying weight is only 50 lbs. (22.7 kg).

EASY STEP BY STEP ASSEMBLY

REDLINE

PEX-to-Wire Tool

The lowest cost per connection for laying out a PEX in-floor radiant heating system on a wire grid.

- Safe to use on all PEX to wire applications and all brands of PEX tubing from 3/8 in. (9 mm) to 5/8 in. (15.9 mm) diameters.
- Easy-loading magazine with 25 clip capacity won't slow you down.
- Trouble-free tool operation and secure clip connection.
- 12-gauge (2.5 mm) clips will not jam, break, or damage PEX.
- Clip connection allows some PEX movement to avoid abrasion.

Hard or Soft Copper

Rugged Aluminum Alloy Body

For hard or soft copper tubing. Makes clean, right-angle cuts with no burrs or chips to clog tubing. Features ball bearing feed, flare cut-off groove, retractable reamer and spare cutting wheel. Rugged aluminum alloy body is designed for handling ease.

Conforms to Federal Specification GGG-C771d 1-31-64. Type II, Class 1, Style B.

Conforms to Federal Specification GGG-C771d 1-31-64. Type II, Class 2, Amendment II.

Tight Spaces

1-1/4 in. Clearance

TC127

1-1/4 in. Clearance for tight spaces

A handy tube cutter for cramped spaces so often encountered on installations or repairs. Only 1-11/16 x 1-15/16 x 7/8 in. (42.9 x 49.2 x 22.2 mm). Weighs only 2-1/2 oz. (71 g) A mere 1-1/4 in. (31.8 mm) clearance is all that is needed to operate the "Imp".

Double Rollers

TC174

Tubing pivots on double rollers.

Compact cutter requires only 1-15/16 in. clearance, yet accommodates tubing from 1/8 to 1-1/8 in. (9.5 to 28.6 mm) O.D. (1/4 to 1 in. Nominal). Cuts copper, aluminum or brass, thin wall tubing. Lightweight aluminum alloy body. Spare cutter wheel included with tool.

Sure Grip Tube Slicer

TC400

Ideal for use on PEX Tubing

Also produces cuts in ABS, PVC, rubber and fabric reinforced hose up to 1-1/4 in. (31.8 mm) O.D. Rigid, durable nylon handle design provides sufficient leverage when cutting so that only moderate hand pressure is required. Stainless steel cutting blade is resharpenable and replaceable.

Drip Edge Folding Tools

For quick bends in standing seam metal roofing panels

A fiberglass reinforced nylon handle makes bending maximum 22-ga. (0.76 mm) roofing metal easy, even when working overhead.

Two rib-reinforced steel plates are permanently welded together to create strong folding seams for making 1 inch (25.4 mm) and 1-1/2 inch (38.1 mm) bends.

Specifications

Seamer & Tongs

Straight or Offset, for the way you work!

The Malco Seamer & Tongs line features generous throat depths and openings to handle a broad range of bending and seaming applications. Durable all-cast-steel construction with heavy-duty pivot point ensures long service life. Comfortable vinyl cushioned grips facilitate easier one-hand operation.

Vinyl-gripped jaws are non-marring.

Specifications

Standing Seam Metal Roofing

Metal Building Panels

Metal Cutting Saw Blade

Cool Clean Cuts in metal roofing & metal building panels

MCCB7

Tough C-6 Carbide Tipped

Tough C-6 carbide tipped blade fits all popular brands of portable circular saws. Lasts up to 30 times longer than abrasive disks for cutting unhardened ferrous metal.

Makes true, flat cuts in standing seam metal roofing and metal building panels without burning paint or protective coatings. Also makes clean cuts in metal studs, light angle iron, and thin walled pipe.

Metal Benders

Light, Versatile, and Modular!

Professional-grade Metal Benders form 0°-100° bends on straight or curved panels of any length on the jobsite. Narrow bearing stance models follow curved panels easily or form straight bends when needed. Wide bearing stance models provide more control for straighter bends. Both variations may be paired with a connector for a modular experience, allowing trade pros to customize their set-up, in a one or two station configuration. Visit our website for more indepth product information and videos.

- Adjustable roller spacing accommodates a wide range of materials:
- Roller spacing adjustable from .5mm - 1 mm
 - Capacity of materials: 24 ga steel, 26 ga. stainless steel, .040 aluminum

Hand Seamers

Anti-Scratch & Anti-Slip for standing seam panels!

Malco's new Mechanical Lock Hand Seamers are the perfect addition to any job site. Pairing with Malco's power assisted seamer these new hand tools easily create flawless seams. The replaceable PVC inserts prevent scratching on the painted panels for an excellent finished look. Additionally, rubber grommets will prevent tool slippage during seam closing.

HAND SEAMER FEATURES:

- Designed for seaming both the first 90 degree stand and second 180 degree stage on mechanical lock panels
- Replaceable PVC inserts prevent scratching
- Rubber grommets improve grip and prevent slipping
- Ergonomic handles
- Carry lock clip for easy carrying and transport

Progressive Profiling Bender Set

NEW PRODUCT!

FSP1

The Progressive Profiling Benders set can create both male and female profiles for 1.5" standing seams with ease and speed.

SEE IT IN ACTION!

Comes packaged in a premium IP 67 case with custom foam inserts to ensure the safe storage of your seamer

- Effortlessly forms male/female profiles for 1.5" mechanical roof panels
- Easy to use and simple to adjust
- Additional rollers included to adjust and adapt to varying material thickness
- Boost job site efficiency and reduce spend on rental profiling tools

Stone Coated Steel Roofing Cutter 30% Easier!

Makes fast, safe, precise cuts in stone coated steel shingles, shakes and tile style roofing, including DECRA, METRO and GERARD brands up to 30% easier than other guillotines.

Compound leverage and a generous handle length reduce user cutting force up to 30% versus other guillotine style cutters that pose a challenge to even the most seasoned pros. A large table surface allows sure handed control and prevents damage to the work-piece. The table's "feed-thru" design also allows long angle cuts for roof hips and valleys. The steel shingle, including lock seam, is cut in an easy, steady motion. The shearing action has a "wiping" effect on the shingle's zinc coating that seals cut edge to resist rust.

SCSRC1

Stone Coated Steel Roofing Cutter

Catalog Number	Description	Adjustable Table Heights in. (cm)	Net Wt. lbs. (kg)
SCSRC1	Natural Roofing Slate Punch	21.25 - 29.25 (540 - 743)	70 (32)

Replacement Part

SCSRC1RB	Replacement Blade and Die Set
----------	-------------------------------

Reversible Cutting Edges on hardened steel blade and die offer twice the cutting life, prior to sharpening. Blade and die are also easily replaceable!

After securing the blade lock-pin in place, the SRCSC1 stone coated roofing cutter is safe to carry on to the job site.

Sturdy frame with two different length leg tubes provides working table height options of 21-1/4 or 29-1/4 inches.

Gutter Outlet Punch

For cutting downspout drop holes in K-style aluminum gutter, nothing else matches the speed and accuracy of the Malco Gutter Outlet Punch System.

The Malco Gutter Outlet Punch and Dies make clean, accurate hole cuts in .032 in. (0.81 mm) aluminum gutter. Ample throat clearance allows these lightweight outlet punches to work over the front edge of gutter to quickly line up cuts. Convenient fastener holes are provided in the tool frame base for optional bench mount application. An easy ratcheting mechanism and angled punch-blade provide smooth cutting action. High carbon steel blades on punches ensure long service life and are also easily replaceable. Heat treated components and weather resistant finishes provide added tool strength and durability.

- Ejector built into Tool Frame safely removes metal slug from rectangular cuts.
- Punch blades are easily replaceable.
- Extra holes in base of Tool Frame allow for secure bench-mount operation.

A versatile, lightweight Malco Tool Frame accepts your choice of separate Malco rectangular and X-style punch and die combinations, including a 3 x 4 in. (76 x 102 mm) X-style punch and die.

Magnetic!

GSG6

Gutter Screw Guide

Extra-Long 6-in. Magnetic Screw Guide

This Extra-Long Screw Guide works over the outside edge of rain gutter to hold and guide 1/4 in. hex head screws up to 3-3/4 inches long. An impact grade 6-inch long driver, with a 4-1/2 in. anodized aluminum sleeve, provides easy reach to the mounting surface of eaves without scuffing the outside gutter edge. Fits any drill or 1/4-inch impact driver and features a secure spring loaded magnet.

Trim Nail Punches

Drive trim nails into soffit, fascia, and other finishing trim without denting or marring material.

The TNP2S, Heavy Duty Trim Nail Punch features an all-steel nose and aluminum tail piece that directs weight to the working end when grasping or starting a nail. Accommodates up to 1-1/4 in. (31.2 mm) standard trim nails. Nose fits into 1/2 in. (12.7 mm) J-channel.

The TNP2R, Trim Nail Punch with Retaining Clip, offers easier nailing from any angle or height and has an exclusive, "nail retaining clip" feature. Avoid the awkwardness and strain of balancing nails in the nose of the punch or holding back the drive pin while standing on a ladder or reaching out to nail. The new retaining clip also minimizes scrapes and dents caused by nail slippage or improper setting depth.

The TNP3S, Pocket Sized Trim Nail Punch, is constructed of hardened steel and corrosion resistance to ensure longer tool life. The tool will hold and install standard 1-1/4 in. (31.2 mm) trim nails. The small size allows easy access to recesses of formed trim pieces. A hex collar prevents rolling when tool is set down.

TNP2S

TNP2R

Nail retaining clip holds nail securely while positioning punch.

SL2R
Snap Lock Punch

Not recommended for heavy sheet metal.

Catalog Number	Description	Throat Depth in. (mm)	Jaws	Length in. (mm)	Net Wt. oz. (g)
SL2R	Snap Lock Punch	1/4 to 5/8 (6.4 to 15.9)	Carbon Steel	9 (229)	16 (454)

Replacement Part

5018	Handle Spring: Fits All Redline Handled Tool
------	--

The Malco model SL2R Adjustable Snap Lock Punch can be used as a gutter end cap crimper or for use in creating locking tabs in light sheet metals. A slide adjustment for throat depth allows settings from 1/4 to 5/8 inch (6 to 16 mm) depth. The formed metal cutting jaws and handles are made of hardened stampings. Rust resistant nickel plate and black oxide finishes ensure long service life. Easy one-hand operation make this a versatile tool for the job at hand.

Produce a double crimp without deforming down-spout; walls stay square for a tight fitting, leakproof connection.

C4R
5 Blade Crimper

Replacement Part

5018	Handle Spring: Fits All Redline Handled Tool
------	--

If you are looking for a tool that efficiently down-sizes the corners of aluminum or steel downspout, then the Malco 5 Blade Gutter Downspout Crimper is the tool you are looking for. The 5 blade design produces 1-1/4 inch (31.75 mm) long double crimps without causing deformation of downspout walls. A factory-like crimp ensures the downspout walls stay square for a tight fitting, leak-proof connection. A handle closing stop helps to maintain a consistent crimp profile. Made with hardened all-steel construction and a nickel chrome finish, you can be assured this tool will last a long time.

Light duty tool. Makes a single crimp for downsizing aluminum downspouts.

Blind Rivets

Steel, Aluminum, Stainless, Copper, & Painted

Malco Blind Rivets provide a strong, secure connection between two or more sheets of material, that will not loosen with vibration. Blind rivet fasteners can be used where access is limited to only one side of the material to be fastened. Rivets require only a pre-drilled or pre-punched hole. The blind rivet is an assembly, consisting of a mandrel and an eyelet body. Mandrels are used only to set the rivet body and are then discarded. Mandrel is designed to break off at the crimp after pulling (setting) the rivet body. No operator skill is required to set blind rivets. Low rivet profile offers cosmetic advantages over screws.

Shear and Tensile Strengths

Rivet / Mandrel	Rivet Dia.	Minimum Shear	Tensile lbs.
Steel Rivet	1/8 in.	260	310
Steel Mandrel	3/16 in.	540	680

2-in-1 Hand Riveter

Malco's 2IN1 Hand Riveter is easy to use with one hand and provides enough pulling power to set all popular rivet sizes. The 2IN1 adjustment features a single long stroke for most hand riveting applications and a short "ratchet action" power stroke for setting larger diameter rivets. The outside "jaw-grip adjustment wheel" opens and closes jaws with fingertip ease to fit any size mandrel and to obtain maximum stroke efficiency. Three nosepieces 1/8, 5/32, and 3/16 in., included with tool. Nose-pieces are stored in handle. Ideal for reaching into corners and recessed areas. Heavy duty all steel construction ensures long life and minimum wear. Polished finish, nickel-chrome plated. Red vinyl cushion grip and hand stop.

- (1) LONG STROKE: for most riveting applications.
(2) POWER STROKE: "Ratcheting Action" for large diameter rivets.

HR37	Adjustment Rod assembly			

Economy Hand Riveter

Lightweight, compact size and slim nose projection allows this riveter to go wherever the work is. Four rivet nosepieces: 3/32, 1/8, 5/32 and 3/16 in. store in handle. Ideally suited for blind riveting applications in aluminum windows, gutter and downspout. Not for use with steel rivets larger than 3.2 mm. Insert rivet into pre-drilled work to be fastened and squeeze handles until mandrel snaps. Release grip on handles and mandrel will drop out front end of tool when tilted. Rugged steel construction with black paint finish and comfortable vinyl grip.

Non-Slip Manual Tie Tensioning Flex Duct Tools

Flex Duct Tools Tighten nylon cable ties to fiberglass duct take off connections faster, easier, and with better quality than by hand.

Malco's TY4 and TY4G (Vinyl Gripped) Cable Tie Tensioning Tools feature a manual, easy to operate, cutting mechanism and comfortable gray vinyl cushioned grips. When the tie is tight, a simple pull of the lower handle causes a blade to engage and cut off the excess tail of the nylon tie. A reduced

pinch point handle closing ensures peace of mind and reduces injury. Malco Tie Tools are designed to work on standard 175 lb. ties as well as thinner 125 lb. ties.

Adjustable Tie Tensioning Flex Duct Tool

Designed for heavy users of nylon cable ties, that features a desired tension adjustment knob.

Malco's TY6 Tie Tensioning Tool is designed for heavy users of nylon cable ties, and is a more efficient, higher quality alternative to installing flexible duct to take offs. The TY6 features an adjustment knob that allows an installer to set a desired tension for securing flex duct to a take-off collar. When the

tie is tight, a breakaway spring mechanism releases the tool's lower handle, which causes a blade to engage and automatically cut off the excess tail of the nylon tie. No extra operation for manual trimming is required. Operating Malco's TY6 Tie Tensioning Tool is also easy on the installer. Contoured handles, with stops, are easier to grasp. Furthermore, the smooth lever action and vinyl cushion grips minimize hand and arm fatigue on big jobs.

Tensioning adjustment knob and automatic cut-off mechanism turn adjustment knob clockwise to increase tension and counter clockwise to decrease tension.

CAUTION: Do not over tighten adjustment knob with fingers. Adjust knob only with fingers to avoid breaking ties before cut-off occurs.

TY4G	Manual Cut-Off Flex Duct Tie Tool / Gripped	6 (152)	11 (312)

Secure Choice!

Use Malco adjustable nylon ties to install flexible duct to take-offs, or secure bundles, up to 15 in. (3.81 cm) diameter. Made of 100% nylon, Malco ties offer a minimal tensile strength of 175 pounds.

Flex Duct Support

The Malco FDS1 Flexible Duct Support eliminates air flow restrictions and increases efficiency to dramatically reduce utility bills and improve heated or air-conditioned room comfort. A properly supported 90° duct elbow typically improves air flow efficiency 10 to 40%. A Malco Duct Support quickly installs on new or existing flexible duct. The versatile FDS1 design uses either 36 or 48 inch nylon cable/zip ties to accommodate 4 inch to 16 inch diameters of flexible fiberglass wool duct as well as un-insulated flexible duct. And the strong, but lightweight, 100% recycled polymer support will not weigh down ducting.

FDC1

Flexible Duct Cutter

Catalog Number	Description	Blades / Wire Cutter	Variable Leverage Ratio (High / Low) throughout stroke	Length of Cut in. (mm)	Length in. (mm)	Net Wt. oz. (g)
FDC1	Flex Duct Cutter	High Carbon Steel	10.4 to 1.0 - 11.9 to 1.0 (Wire Cutter)	4 (102)	11-7/8 (302)	11 (312)

Flexible Duct Cutter

The Flex Duct Cutter (FDC1) has a built-in wire cutter that lets you finish the job you started with just one tool! A double edged blade cleanly pierces through outer skin and insulation. The fine honed blade, made with long lasting stainless steel, cuts from either direction around the entire circumference of the duct. The built-in wire cutter cuts hardened wire rib coil and features compound leverage for easy wire cutting. The Flex Duct Cutter also includes comfortable, non-slip vinyl gripped handles. Puncture resistant nylon sheath (FDSH) included.

FDC2

Flexible Duct Shear

Catalog Number	Description	Blades / Wire Cutter	Variable Leverage Ratio (High / Low) throughout stroke	Length of Cut in. (mm)	Length in. (mm)	Net Wt. oz. (g)
FDC2	Flex Duct Shear	Heavy-Duty Steel	10.4 to 1.0 - 11.9 to 1.0 (Wire Cutter)	4-3/8 (111)	12-1/4 (311)	13 (369)

Flexible Duct Shear

The Flex Duct Shear (FDC2) Cuts insulated flexible round duct and also cuts the duct liner's wire rib coil. Pointed bottom blade easily pierces duct to start cut. Heavy duty wire cutter is located away from scissor blades. Thumb operated latch ensures that sharpened blade edges stay closed when not in use. Puncture resistant nylon sheath (FDSH) included.

**Trim flex duct and tighten
nylon ties with one tool!**

FDC3

Multi-Purpose Shear

Catalog Number	Description	Blades / Wire Cutter	Variable Leverage Ratio (High / Low) throughout stroke	Length of Cut in. (mm)	Length in. (mm)	Net Wt. oz. (g)
FDC3	Multi-Purpose Shear	High Carbon Steel	10.4 to 1.0 - 11.9 to 1.0 (Wire Cutter)	4 (102)	11-7/8 (302)	14 (397)

Multi-Purpose Shear

The versatile FDC3 Flex Duct Tool is actually three tools in one! The double-edged round knife blade pierces through the flexible round duct and cuts in either direction. A thumb-operated latch opens the tool's compound-leverage handles and the jaws of a built-in wire cutter to easily sever the exposed wire rib coil of duct liner. Use the tool's tie-tensioning mechanism to install a nylon tie strap and secure the flex duct take-off collar. With the handles of the FDC3 in the open position, a nylon tie can be threaded through the mechanism and then tightened by gently pumping the tool's handles. Puncture resistant nylon sheath (FDSH) included.

5018	Handle Spring: Fits All Redline Handled Tool
------	--

REDLINE®

Snap Lock Punch

SL8R

Recommended for Vinyl Only.

The SL8R Snap Lock Punch for Vinyl Siding produces wider, more prominent rectangular tab projections for securing vinyl skirting or siding to finishing trim. The raised tabs grip a greater surface area and guard against dislodging due to relaxation of vinyl from heat or blowout during times of high pressure and wind. Constructed of hardened steel stampings and rugged investment cast alloy steel jaws with rust-resistant nickel plate and black oxide finishes to ensure long service life. **Not Recommended for use below 32° F (0° C).**

Economical and Rugged

SL5

Snap Lock Punch

Catalog Number	Description	Throat Depth in. (mm)	Hole in. (mm)	Length in. (mm)	Net Wt. oz. (g)
SL5	Snap Lock Punch	3/8 (9.5)	.460x.075 (11.684x1.905)	9 (229)	12 (340)

Snap Lock Punch

Snap lock plastic skirting and siding to finishing trim.

SL5

Snap lock plastic skirting and siding to finishing trim. Makes tabs in the cut edge of siding panel used as a finishing course at top of wall or below window. Tabs lock into utility trim.* Punch raises a high projection to compensate for natural relaxation of vinyl plastic. It also works well on aluminum siding but is not recommended for steel.

Note: The SL5 should not be used when PERMATABS are required to snap into finished trim. For this application we recommend using the Malco SL1R or SL2R Snap Lock Punch. PERMATABS is a trademark of C & H Enterprises. **Not Recommended for use below 32° F (0° C).**

REDLINE®**J-Channel Cutters**

JCCR

5/8 in. (15.9 mm)
J-Channel

Depth Gauge

Use graduations on jaw to gauge cutting depths of 3/8 to 1-1/4 in. (9.5 to 31.2 mm)

J-Channel Cutters are available for 1/2, 5/8 and 3/4 in. (12.7, 15.9 and 19.1 mm) channel.

Use a versatile Malco J-Channel Cutter to make drain tabs, downstream notch cutouts and miter trim cuts in vinyl channel. Available in three sizes for 1/2 inch (12.7 mm) channel, 5/8 inch (15.9 mm) channel and 3/4 inch (19.1 mm) channel. Tool operation is fast and easy! Light hand pressure produces a single handle click signal to ensure perfect drain tabs every time. Graduations on the upper jaw easily gauge tab or notch depths from 3/8 to 1-1/4 in. (9.5 – 31.2 mm). Use either side of the jaws to cut a 45-degree miter for a professional finished look. Hardened all-steel construction with rust resistant nickel chrome and black oxide finishes ensures long service life.

Ultra Lightweight Snips

The Blade on the ULV10 Ultra Lightweight Vinyl Snip features an extremely sharp knife-like bevel for easy starting and cutting in the thickest, hardest vinyl and other non-ferrous materials or fabrics, including trim coil. The snip has a strong, lightweight 10 in. (254 mm) polymer frame, and weighs less than 9 oz. (249 g). These lightweight Vinyl Snips have protective handle loops and are easy to grasp, while also producing a big 3 in. (76 mm) long controlled cut.

- **Strong, lightweight 10 in. (254 mm) polymer frame**
- **Easy-to-grasp, protective handle loops**
- **Big 3 in. (76 mm) long controlled cut**
- **Designed for all weather conditions**
- **Includes a Full-Size Handle**

Worry Free Blade Changes

A fully threaded brass insert thermally anchored in the blade area of the polymer frame for holding power and no loss of thread integrity.

SRT2B	SideSwiper® II Siding Removal Tool Bulk (25)	—	—

SideSwiper® II

Siding Removal Tool for Vinyl Siding

SRT2

The Malco SideSwiper® II Vinyl Siding Removal Tool combines the comfort and added leverage of an easy-to-grasp straight handle with the smooth unlocking motion of a burr free hook. The blade of the removal tool is angled from the bottom plane of the handle and allows the user to keep their wrist straight while keeping knuckles well above the work. The surface finishing and plating of the blade ensures the sharply angled hook will not cut into the vinyl material or produce shavings. Additional comfort and control is achieved with a non-slip textured handle grip. The gripping surface will not become slick from moisture, and the form fitting, plastisol dip process, bonds the grip for the life of the tool.

Instructions:

- Insertion:** Wedge tip of blade under overlapping panel and hook onto the back lip of buttlock.
- Unlocking:** Pulling lip downward, slide the tool along length of panel to unlock and expose nail row of panel to be removed.
- Panel Replacement:** Lock and nail replacement panel into place. Use tool to relock overlapping panel. Pull down on panel lip and press it into lock of replacement panel below.

Easy One-Person Fiber Cement Siding Installation!

Siding Gauge Adjustable

The All-in-One Siding Installation Tool Set is built with an adjustable 5/16" - 5/8" clamping range and an adjustable 4"-8" (1/4" increments) facing range, allowing Pros to quickly and easily hang different types of fiber cement siding and other lap siding of various widths. The SGA eliminates the need for multiple gauges, shims, and more than one

SGA

FCG2
Overlap Gauges
U.S. Patent No. D525,492

Overlap Gauges

- Two gauges support entire length of plank and precisely gauge a standard 1-1/4 in. (31.2 mm) overlap, even on a bowed wall.
- Works on 5/16 in. (7.9 mm) fiber cement siding plank.
- Will not mar finish of pre-painted siding.
- Strong, One-Piece tempered spring steel construction.
- Scan the QR Code for a step-by-step video!

FCFG
Facing Gauge

Facing Gauge

- Adjustable for precise 5, 6, 7, or 8 in. (127, 152, 178 or 203 mm) exposures. Gauging block easily snaps into desired position without use of tools or fasteners.
- Easy to grasp with one hand while steadying new plank for nailing.
- Manufactured of tough, solid, weather-resistant nylon material.
- May be used with Overlap Gauge for 1-person application.
- Scan the QR Code for a step-by-step video!

Speed Set Gauges

Speed Set includes one of each of Malco's FCFG overlap and FCG2 facing gauge for 5/16 in. (7.9 mm) fiber cement siding installation.

Hidden Nail Cutter

The easiest way to cut hidden nails!

Malco's SNC Nail Cutter cuts hidden nails left over from removal of damaged or unwanted fiber cement siding plank without damaging overlapping plank. The Flat head with a beveled leading edge easily maneuvers under the edge of siding and into corners.

- Saves time and effort when replacing or salvaging siding, thin building materials, and windows.
- Flat head with beveled edges easily maneuvers under edge of material and reaches into corners to cut hidden nails without damaging material.
- Precision-ground, heat treated jaws and compound handle leverage combine to cut up to 16D common nails with a low force requirement.

SNC

Hidden Nail Cutter

Catalog Number	Description	Length in. (mm)	Net Wt. oz. (kg)
SNC	Hidden Nail Cutter	18.5 (47)	28 (.79)

Capable of cutting down to a 2 in. (50.8 mm) circle, or trimming 1/8 in. (3.2 mm) from edge of 5/16-in. (7.9 mm) siding plank.

REDLINE® Fiber Cement Snip

FCSR

Malco's FCSR Fiber Cement Siding Snip is designed to cut 5/16-inch (7.9 mm) siding plank. The FCSR Snip makes precise arc and trim cuts from any work position fast and easy. Hardened all-steel construction with rust-resistant nickel plating and a black oxide finish ensures long service life.

WARNING:

Fiber cement contains crystalline silica. Respirable silica contained in cutting dust is known to cause cancer.

Cut straight or angled cuts!

Long-life nickel plated blade design with high leverage handle requires less force to produce clean cuts and minimal air-borne dust.

Straight or Angled Cuts!

Fiber Cement Siding Angle Cutter

Cut multiple angles in fiber cement siding with guillotine precision and minimal dust!

The Malco FCC7 Fiber Cement Siding Angle Cutter cuts multiple angles in Fiber Cement Siding with Guillotine Precision. The nickel plated blade design with a high leverage handle, requires less force to produce clean cuts with minimal air-borne dust. The blade is anchored above the large guillotine plate to allow clearance for cutting angles in 5/16 in. (8 mm) fiber cement planks up to 12 in. (305 mm) wide. The fold out feet on the bottom of the shear act as support extensions for the cutting operation. These legs also allow the FCC7 to be mounted on saw horses for optional workbench-level operation.

FCC4

Fiber Cement Siding Guillotine

Catalog Number	Description	Net Wt. lbs. (kg)
FCC4	Fiber Cement Siding Guillotine	22 (9.98)

WARNING:

Fiber cement contains crystalline silica. Respirable silica contained in cutting dust is known to cause cancer.

The Malco FCC4 Guillotine Shear Cleanly cuts 5/16 in. (8 mm) fiber cement siding without distortion or compression. A large, stable support plate, with board stop, ensures straight, square cuts in 8-1/4 in. (210 mm) wide plank with minimal dust. No sharpening required! The durable, lightweight steel frame and high leverage design offer long service life, easy handling and smooth cutting operation.

Fiber Cement Circular Saw Blades

with Carbide Tips

For repetitive cuts in fiber cement with power miters or portable circular saws, Malco now offers specialized Circular Saw Blades with PCD (PolyCrystalline Diamond) faced carbide tips for longer life. A lower number of teeth and deeper gullets produce cleaner, more precise cuts resulting in an accurately matched trim edge and tighter seams. Perfectly tensioned, hardened tool-steel blade ensures a flat true run.

Hole in One® HOLE SAW

A hole saw supplied with a dedicated arbor is always the right match, properly assembled and ready to use. BiMetal by Malco concentric construction ensures vibration-free cuts in any machinable metal, including tool steels and stainless. The variable 4/6 pitched tooth configuration milled into a high speed steel edge and micro-welded to a shatterproof alloy steel body easily tackles nail embedded wood. The generous 1-15/16 inch (49.2 mm) cup depth allows cuts in wooden studs, joists and door slabs in one pass.

- Shatter Proof
- High-Speed Steel

BiMetal hole saw with supplied arbor easily cuts metal, nail embedded wood, studs, joists and door slabs.

HSB Hole Saw Bit

High speed 1/4 inch (6.4 mm) replacement pilot drill bit fits both original Hole-in-One hole saw with built-in arbor and current 2-piece Hole-in-One with dedicated separate arbor. Generous 3-sided, 1-13/16 inch (30.2 mm) long flats ensure easy positioning of replacement pilot drill bit in the pass-through shank of original welded-on arbor and positive connection with arbor cap screw of either original or current arbor.

Vent Saws® are designed for cutting all types of hard and soft wood, and other non-ferrous materials

including plywood, composition board and siding. The Malco Vent Saw is helpful when fitting fresh air intakes through foundation plates, exterior siding or facing materials encountered in residential or light commercial installations of gas or oil fired furnaces. It also features easily replaceable alloy steel blades and a versatile one piece cast aluminum arbor/mandrel combination with a 7/16 in. (11 mm) pilot drill. The webbed mandrel allows easy plug removal and a built-in arbor eliminates the need for separate arbor attachments.

Commercial Grade Hog Ring Pliers

The Fastest System for Strong and Secure Hog Ring Installation to chain-link fencing

Designed to address the most stringent regulatory codes, this commercial grade hog ring pliers ensures uninterrupted operation to quickly install rings. Long handles save time and effort with plenty of leverage and reach. The 25-count strips of collated rings can be loaded into the pliers' symmetrical magazine from either direction. A plunger feed automatically sets up each ring. There is no need to manually rotate the magazine out of the way as the pliers' clinching mechanism brings the ring forward of the nose for easy access to tension wire and fence.

HRA5

Aluminum Hog Rings, 9-ga. (3.8 mm)
Lightweight for Fast Installation

- Twice as strong as closest alternative
- 6061-T94 or 5052-H38 alloy
- 25-piece loading strips with no sharp points are safe and easy to load
- One 500 pack secures 1000 feet (305 m) of tension wire spaced at 24 in. (61 cm) intervals

HRS5

Galvanized Steel Hog Rings, 9-ga. (3.8 mm)
Strong and Weather Resistant

- Twice as strong as closest alternative
- Class 3 coating per ASTM A641
- 25-piece loading strips with no sharp points are safe and easy to load
- The only collated 9-ga. steel hog rings on the market
- One 500 pack secures 1000 feet (305 m) of tension wire spaced at 24 in. (61 cm) intervals

Fencing Pliers

Malco's fencing pliers are available in a highly maneuverable 8-inch (203 mm) length or a high leverage 10-inch (254 mm) model.

Malco's durable fencing pliers design features three serrated jaw areas for gripping, pulling and tying fence wire. Also, three built-in wire cutter locations ensure easy access for cutting up to 9-gauge (3.8 mm) chain link fence or tensioning wire. A compact, rounded and tapered nose allows easy entry and reach into tight areas. Textured handle surfaces promote safe and sure control. And durable hardened all-steel construction offers long, dependable service life. Malco fence pliers offered in two sizes.

RRW6

Offset Ratcheting Wrench

Catalog Number	Description	12 Pt. Hex Sockets	Nominal Length (mm)	Net Wt. (g)
RRW6	Ratcheting Wrench, Offset	1/2 and 9/16 in.	6.75 in. (172)	5 oz. (142)

RRW6

Offset Ratcheting Wrench

This versatile, compact and lightweight offset ratcheting wrench provides easy fastener access. Finger switches are easily accessible to change ratcheting direction. A 25 degree offset design maintains clearance between fingers and chain-link fabric. The 12-point box heads, at each end of the wrench, grasp standard U.S. 1/2 inch and 9/16 inch hex fasteners from multiple angles. Through-hole socket openings accommodate any fastener length. Designed for long service life, it exceeds ASME minimum torque requirements.

Vinyl Fence Notchers

Vinyl fence picket and rail notchers are designed specifically for use with vinyl fencing.

Malco VFN1 & VFN2 Vinyl Fence Notching Tools create 1/2 and 3/4 inch (13 and 19 mm) wide and 7/8 inch (22 mm) deep louver-shaped tabs in the end sections of vinyl fence pickets or rails. The resulting raised tabs facilitate a durable lock that prevents the picket or rail from pulling out of the joint opening in a rail or fence post during high winds or abrupt blows. Notcher performance is clean and precise in temperatures from 40 degrees F (4.4 degrees C) to 120 degrees F (48.9 degrees C).

Compound leverage and exclusive RedLine handles reduce the fatigue of repetitive motions.

Quickly lock rails and pickets in place.

Easily create raised tabs on the job site.

The louver-shaped tabs create a durable lock that can withstand high winds and abrupt blows.

Specifications

Works in cold down to 40°F (4.4°C) and heat up to 120°F (48.9°C).

Wood, Metal, Plaster & General Purpose

Reciprocating Saw Blades with BiMetal by Malco®

Reciprocating Saw Blades with BiMetal stack up better! For wood with nails, metal pipe, angles, and a variety of specialty applications from drywall to drain pipe, BiMetal by Malco stacks up best against the rest. These shatter proof blades are formulated from a premium metal composition consisting of a high speed steel cutting edge micro welded to a flexible high carbon steel back. Wood cutting BiMetal blades are available in a wide variety of profiles and tooth combinations to match cutting speed, plus control and maneuverability needed for the job.

Specifications: Wood Cutting and Plaster

Catalog Number	Nominal L x W x Thickness in. (mm)	Teeth per in. (25.4 mm)	Tooth Set	Tooth Form	Cutting Edge	Description / Application
WOOD CUTTING BiMetal By Malco™						
 4DL6	6 x 5/8 x .050 (152 x 15.9 x 1.27)	6	Alternate	Standard	Milled	DELUXE CONTOUR 4DL6 used for rough-in, contours in wood with nails.
 4KH6	6 x 3/4 x .059 (152 x 19.1 x 1.50)	5/7	Alternate	Variable / Standard	Milled	KEYHOLE PROFILE -- VARIABLE PITCH Varied tooth sizes permit an overall coarser pitch for aggressive cutting in wood with nails.  5/7 Variable Pitch teeth 4KH6, 8KH7, 12KH8 used for rough-in, mild contours in wood with nails.
 8KH7	9 x 3/4 x .049 (229 x 19.1 x 1.24)	5/7	Alternate	Variable / Standard	Milled	
 12KH8	12 x 3/4 x .049 (305 x 19.1 x 1.24)	5/7	Alternate	Variable / Standard	Milled	
 4KH8	6 x 3/4 x .049 (152 x 19.1 x 1.24)	8	Alternate	Standard	Milled	KEYHOLE PROFILE 4KH8 produces less vibration, smoother, cleaner cuts in wood with nails, composition board.

 4P6	6 x 3/4 x .049 (152 x 19.1 x 1.24)	6	Alternate	"V"	Milled	STRAIGHT PROFILE - "V" TOOTH 60° angle "V" tooth cuts on both forward and backward stroke. 4P6 used for continuous cutting in plaster, sheetrock and metal lath.

Select the Right Blades for the job!

Selecting the right blade for the job is critically important. Factors that should be considered are:

1. Type and hardness of material to be cut, which will determine the tooth form, thickness, and material composition of the blade to be used.
2. Size and variation in cross section of stock to be cut which dictates the pitch of the teeth (or teeth per inch) required, tooth set, and blade length.
3. Type of cut, whether straight, contour, or both, will determine blade width.

GENERAL PURPOSE BiMetal By Malco™						
 8PAP	8 x 3/4 x .051 (203 x 19.1 x 1.30)	—	Wavy	Special Progr.	Milled	PLUNGE CUT TIP - PROGRESSIVE PITCH Smaller teeth near blade shank and larger teeth at tip for faster cuts / longer life. 8PAP is a BiMetal, PROGRESSIVE PITCH blade used for making fast cuts in wood, wood with nails, non-ferrous metals (including aluminum and brass), plastic and fiberglass. This durable blade offers outstanding performance in thick or thin materials.

Laminate Flooring Guillotine Shear

Quickly make square cuts in 5/16 in. (8 mm) laminate flooring.

Laminate flooring cut easier with Malco's Guillotine Shear for Laminate Flooring. The large stable plate with board-stop supports material to ensure square, straight cuts up to 8-1/4 in. (210 mm) long.

• No noisy operation • No sharpening required • Optimum leverage reduces fatigue • Durable lightweight frame • Cuts cleanly without distortion

Channel Shears

Malco Channel Shears cut through metal studs and runners faster and more economically than any other tool on the market!

Malco Channel Shears complete cuts in one easy stroke without deforming metal channel. Die assembly ensures cutting action is clean and precise. Hollow ground hardened steel blade can be resharpened or replaced. A 36 in. (91 cm) long handle provides additional leverage making cutting with this shear almost effortless. Lightweight and portable enough to be where you want it, when you want it. Shear features rugged all steel and bolt construction. Handle has comfortable red vinyl grips.

3 STYLES

SRC24A

features a single installed die assembly with 3 channel sizes for cutting 1-5/8, 2-1/2, and 3-5/8 in. (41, 64, 92 mm) studs and matching runners.

SRC24A1 EV

features an installed die with 3 channel sizes for cutting 50, 70, and 92 mm studs and matching runners and an *Extra Die* for cutting 45, 64, and 95 mm studs and matching runners.

SRC24A2 SV

features an installed die with 3 channel sizes for cutting 51, 76, and 92 mm studs and matching runners and an *Extra Die* for cutting 45, 64, and 95 mm studs and matching runners.

REDLINE® Punch Lock Stud Crimper

PL1R

Secures any width stud and runner without screws or other fasteners. Punch and die are easily replaceable. Maximum capacity 22 gauge stud and runner.

The PL1R Metal Stud Crimper features a unique punch and die shape that creates a rectangular crimp connection by bending over layered thicknesses of channel and stud at one time to form a sturdy bond without the use of fasteners. Lightweight and compact size allows the user to work overhead with ease. The tool body consists of a strong, die-cast aluminum "C" frame head and rust-resistant, nickel plated steel handles and parts stampings. The long-life punch and die are formed from tool steel and are also easily replaced on the job.

REDLINE® Ceiling Grid Punch

CGPR

Malco's unique Ceiling Grid Punch makes a clean 1/8 in. (3.2 mm) hole in up to three layers of 25 gauge (0.53 mm) ceiling grid.

Malco's Ceiling Grid Punch makes clean 1/8 inch (3.2 mm) holes in up to three layers of 25 gauge (0.53 mm) ceiling grid. The tool's slim, but strong, "C" shaped steel frame ensures lightweight, one hand operation and allows easy access into tight corners. It is ideal for punching through main tees and perimeter wall angle that is to be secured with blind rivets. A generous throat opening allows full operation from the edge of both standard 1 inch and 1/2 inch (25.4 and 12.7 mm) grid profiles..

Pocket size, swivel reamer
Pocket size reamer deburrs nominal 1/4 in. (6.4 mm) or larger tubing and fittings. Freely rotating, hardened steel blade holds its edge in both copper and ABS/PVC plastic. Under 6 in. (152 mm) overall length.

Specifications

For use with copper tubing
Carbon steel crimped fill handle and stem. Available in three different sizes.

Plumbers Roll

AC310
Brown cloth closed coat,
120 grit alum. oxide.

Abrasive cloth specifically designed for cleaning and preparing solder joint fittings
Creates a bite on metal surface for solder or paint. Aluminum oxide cutting grain rates 9.2 on MO scale (diamond=10). Flexible cloth back fits contours of any surface configuration and hard to reach areas. Long lasting urea resin bonding is water resistant.

Abrasive Mesh

AC5M
Actual Size of Weave
180 grit open mesh cleans with both sides,
Requires only light pressure, lasts twice as long as cloth. Scrim is nylon weave. Waterproof adhesive bonding. Will not clog, load, or break down.

Fin Straightening Tools

Fin straightening tools with adjustable nylon combs
The FST tool straightens commonplace 8, 10, 12, or 14 fins per inch. Use the FST2 tool for straightening closely spaced 16, 18, 20, or 22 fins per inch. Both tools feature one-piece adjustable combs. The resilient nylon comb material will not damage the soft aluminum fins of condenser or evaporator units.

Specifications

Step Drills

Drill hole sizes from 1/8 to 1 in. through sheet metal without burring, deforming stock, or threading drill bit. A unique double flute design assures the penetration of soft or thin materials at the proper speed.

Malco Step Drills actually deburr as they drill. Perfect for use as a "hole-opening" reamer. They can also be used for making round holes from slots or intersecting holes. Made of industrial grade high speed steel. Malco Step Drills are heat treated and tempered to assure maximum strength for long wearing rugged use. (Note: All sizes listed in inches).

Utility Caulking Gun CG10

Flexible / Lightweight Caulking Gun CG12

- Compact design stores in a toolbox
- Handy puncture wire
- Ladder size hang hook

Easy Dispensing Caulking Gun CG18

Designed for longer dispensing life

Trigger adjustment screw compensates for normal wear to assure full dispensing stroke and extend tool life. Rotating barrel for maneuverability and easy caulk placement.

Includes puncture wire

Professional Caulking Gun CG20

Square Piston Design

Minimizes worker fatigue. User can regulate stroke to fit hand. Handy puncture wire folds inside handle.

High Thrust Caulking Gun CGC1

NEW PRODUCT!

26:1 ratio drive for high performance in cold environments and high viscosity materials. Swiveling carriage that adjusts for hard to reach areas.

Includes puncture wire

Sausage Caulking Gun Tool Kit

CGS1

NEW PRODUCT!

CGSN1

Replacement Nozzles for CGS1

Sausage caulking gun tool kit with 12:1 ratio drive. Dispenses 10 oz, 13 oz, or 20 oz sausage packs. Includes parts to convert gun to dispense bulk or 10 oz / 12 oz cartridges.

Break-Away Knife

BAK

Positive blade locking mechanism and a forever-sharp break-away point.
Supplied with 1 BAKRB blade in handle.

BAKRB (10 pack)
7 Point heavy duty break-away blades for model No. BAK.

Quick Open Utility Knife

9PK

"No tools" blade change is fast and easy with just a turn of the knob. Extra blades store in handle. Retractable blade advances to three locked cutting positions with aid of thumb button. Heavy duty, die-cast knife halves feature "integrated hinge" to eliminate lost or dropped parts. Contoured knife shape features "ergonomic safety grip". One blade supplied in retracting mechanism.

Twist knob to open

Displayed Open

Utility Knife

4PK

Die-cast heavy duty model comes complete with three double point blades. Safe, easy to operate, thumb action mechanism on top facilitates three cutting positions: fully extended, partially extended for carton opening, and intermediate.

Double Point Utility Blades

Extra durable, heavy gauge blades fit Malco 3PK, 4PK, 9PK knives & most other brands. Made of special alloy steel, precision ground to a fine cutting edge.

Quickly and safely dispense blades. Straight & Hook point blades are available in convenient 50 pack plastic dispenser.

UBS5 (5 pack)

UBS50 (50 pack)

UBH5 (5 pack)

Large hook points work great in multiple layers of asphalt shingles.

Magnetic Tape Measures

Malco's "Magnetic Tip" tape measures are ideal for every ferrous metal working project! A powerful magnet and self-supporting 1 in. (25.4 mm) wide blade makes one-person measurements and measuring elevations an easy task.

Zero commencement:
when hanging and pulling magnet,
deduct 1/16 in. from measurement.

Non-Magnetic Tape Measures

Malco's non-magnetic tape measures offered in 25 in. and 30 in lengths. Both tape measures have a 1 in wide blade with a double riveted tip connection. A rubber-clad housing ensures toughness for everyday use.

Electrical Pliers

Cutter / Stripper / Crimper

Up front scissors action strips copper wire clean and easily cuts sizes 10 thru 20.

Bolt cutters leave a perfect rethread. Plier nose features serrated jaw and slim profile for pulling and putting loops on wire. Crimps all insulated and non-insulated solderless terminals including 7-8 mm auto. Lifetime pivot point assures greater joint strength and adds easy, precise adjustment capability. Black oxide, satin finish steel. Extra large red vinyl cushion grips.

Aluminum Straight Edge Rule

48AR

Made from .125 thickness extruded aluminum. This 48 in. rule is 2 in. wide. Large and clear, easy to read, thermo-bonded red markings on gray finish. Can be read from either end. Graduations in eighths and sixteenths.

Tinner's Circumference Rules

48BS Semi-Flexible

48CR Heavy Duty

Standard bench rules with circumference readings for sheet metal work. Made from stainless steel which means they never need to be oiled. Fully etched markings are black filled for easy reading. 150 circumference inches in 1/8 in. increments both sides. Rules are 48 in. long x 1-1/4 in. wide.

Precision Multi-Use Combination Square

SCS12 12 in. with solid mounted vial

Use as a tri or miter square, height or depth gauge, or for striking parallel or right angle lines. A full view vial allows easy leveling or plumb work!

- 1/8, 1/16, 1/32 in., with cm and mm graduations permanently etched in stainless steel blade.
- Heavy-duty aluminum anvil has self-adjusting draw bolt for easy adjustment and set-up.
- Hardened steel scribe for making clean markings and lines stored in anvil.
- Precision-machined surfaces ensure accuracy.

48 in. Tinner's Circumference Rules					
48BS	48 in. Tinner's Circumference Rule (Semi-Flexible)	Increments to 1/16 both sides	150 circumference inches in 1/8 in. increments both sides	—	—
48CR	48 in. Tinner's Circumference Rule (Heavy-Duty)	Increments to 1/16 both sides	150 circumference inches in 1/8 in. increments both sides	—	—
Combination Square					
SCS12	Combination Square 12 in. with solid mounted vial	—	—	—	12 (340)

Professional Grade Aluminum Torpedo Level

- ## L9
- Professional grade solid aluminum frame.
 - Three easy-read vials with white surrounds.
 - V-grooved working edge for use on pipe and conduit.

Magnetic Aluminum Torpedo Level

- ## L9M
- Full length magnetic strip.
 - Professional grade solid aluminum frame.
 - Three easy-read vials with white surrounds.
 - V-grooved working edge for use on pipe and conduit.

Magnetic Tip Pocket Level

- ## L5
- Strong Magnetic pick-up tip.
 - V-Grooved edge fits pipe and conduit.
 - Use to check electrical boxes and thermostats.
 - Durable plastic molded frame.

Specifications

Levels				
Catalog Number	Description	Line Length in. (mm)	Number of Vials	Net Weight oz. (g)
L5	Pocket Level with Magnetic Tip	5 (127)	1	—
L9	9 in. Top Reading Torpedo Level	9 (229)	3	—
L9M	9 in. Top Reading Torpedo Level with Magnetic Base	9 (229)	3	—
