

Liposomal Vitamin C for Maximum Impact

HIGH-POTENCY ANTIOXIDANT FOR IMMUNE DEFENSE & CELLULAR PROTECTION

From Dr. Shade

"Liposomal Vitamin C brings you a highly-bioavailable, premier quality Vitamin C supplement. One of the problems with ordinary vitamin C delivered in capsules, tablets, or powders, is that very little is absorbed in the gut, especially as you increase the doses. The very small liposomal vesicles in our vitamin C offer rapid absorption beginning right in the mouth."

Product Overview & Key Benefits

Vitamin C is an essential nutrient that supports immune function, helps protect against oxidative stress, and plays a crucial role in collagen production. However, standard vitamin C supplements can have poor absorption, limiting their effectiveness. **Liposomal Vitamin C** uses advanced delivery technology to enhance bioavailability, offering optimal uptake and utilization at the cellular level. This potent formula provides superior antioxidant defense, supports tissue repair, and helps maintain overall health.

A POWERFUL ANTIOXIDANT

Helps neutralize free radicals and oxidative stress

SUPERIOR BIOAVAILABILITY

Liposomal delivery improves upon reliability and absorption

IMMUNE SYSTEM HEALTH

Aids white blood cell function for robust defense

GENTLE ON DIGESTION

Bypasses gastrointestinal limitations common with other vitamin C formats

COLLAGEN & TISSUE NUTRIENT

Supports healthy skin, joints, and connective tissues

SUGGESTED USE

Take 1 tsp by mouth on an empty stomach. Hold 30-90 seconds before swallowing for maximum absorption

How It Works

Vitamin C plays a vital role in numerous biological functions, including immune regulation, neurotransmitter production, and collagen synthesis. However, its absorption is limited by intestinal transporters, reducing its bioavailability at higher doses. **Liposomal Vitamin C** encapsulates ascorbic acid in phospholipid nanoparticles, allowing it to bypass conventional absorption pathways of the GI and enter the bloodstream more efficiently. This advanced delivery system enhances cellular uptake and efficacy, supporting antioxidant defenses, immune function, and overall vitality.

Why Trust Us?

At Quicksilver Scientific, we develop innovative health solutions rooted in nature and backed by science. Quicksilver Scientific has been formulating and manufacturing highly bioavailable liposomal supplements since 2006.

- Leader in highly bioavailable liposomal delivery system technology
- Sold in 30+ Countries
- Trusted by 30,000+ practitioners and healthcare providers
- 38 patents issued or pending
- NSF Certified, GMP onsite manufacturing

At Quicksilver Scientific, we pioneered pharmaceutical-grade liposomal delivery to maximize nutrient absorption and efficacy. Our proprietary technology ensures that active ingredients are rapidly absorbed, delivering unparalleled bioavailability for optimal health benefits.

Quicksilver Scientific's liposomal delivery system bypasses absorption constraints in the intestine, significantly enhancing the bioavailability and cellular delivery of vitamin C.¹
