

REACH THE APEX

RAKE-LIKE HEAD CLEANS MORE EFFICIENTLY.

Dirty HVAC/R evaporator and condenser coils can reduce system efficiency by up to 70%, dramatically reducing the operating life of the equipment. The Coil-X helps maintain a clean, smooth running system.

FEATURES

- ✓ Adjustable brush head pivot up to 120°
- ✓ Patented stiffness adjustment slide
- ✓ Tempered stainless steel cleaning heads
- ✓ Handle extends to 4 feet

TECHNICIAN INVENTED TECHNICIAN PROVEN

The Coil-X Debris Extractor Brush was invented by a real HVAC technician who was looking for a more thorough and efficient way to clean evaporator coils. Realizing most coil brushes couldn't get all the way to the apex, he solved the problem by designing a prototype that included stainless steel combs, a pivoting head brush and an adjustable handle.
