

Pipe & Duct Holders

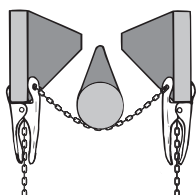

Work. Perform. Outlast.

Limited Lifetime Warranty

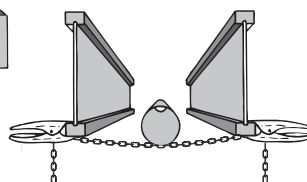

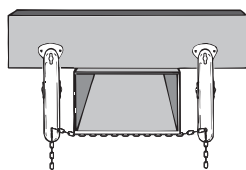

Like an Extra Pair of Hands!

Holds Duct or Venting in place until properly secured.

This job-site helper holds ductwork in place with clamps and a chain during installation until permanently secured. Temporarily suspending duct or venting from any joist is fast and easy. Double-ended keyhole allows easy chain adjustment and locking in a horizontal clamping position, required for engineered joists, without the need to tie the chain around the clamp. Formed teeth hold the clamp securely in place on joist.

Holders also open wide and clamp securely for use on Engineered Wood Joists.

Holds duct in place, either between or under joists until properly secured.

Double-Ended Keyhole secures chain in vertical or horizontal clamp position.

Catalog Number	Description	Chain Length ft. (M)
2DH	1 pair of clamps and chain	4 (1.22)

CAUTION: 20 lbs (9 kg) Maximum
Work Load For use on Residential Lumber and
/ or Engineered I-Beam Construction Only.
