

**Project Details**

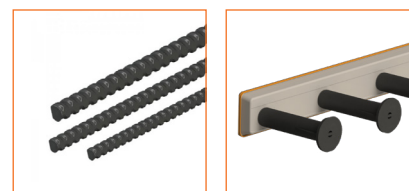

Name: **Victoria Cross Metro Station Tower**  
Location: **189 North Miller Street, North Sydney**  
Finish Date: **2025**

**Project Partners**

Owner: **NSW Government / Lendlease**  
Developer: **Lendlease**  
Specifier: **Robert Bird Group**

**Product**

ReidBar™ Reinforcing  
ReidBox™ Rebate System  
ReidBar™ Couplers  
ReidBar™ Threaded Inserts

# Rising to new heights: Reid™ and Lendlease’s collaborative success at Victoria Cross Station

The Victoria Cross integrated station & commercial tower development is a landmark project, forming part of the Sydney Metro rail link in North Sydney.

Featuring a striking 42-level high-rise tower, it stands as a significant addition to the city’s skyline. This project is also one of the largest in terms of steel tonnage undertaken, showcasing its scale and engineering complexity. It highlights the enduring and successful partnership between Reid™ and Lendlease, a collaboration that continues to deliver exceptional outcomes.

**“The Reid team consistently provided invaluable support, helping us meet our project deadlines and ensuring we delivered a successful outcome on time and on budget.”**  
– Chris Boyd, Project Engineer, Lendlease

**Products, Safety, and Installation Integration**

For this prestigious development, Reid™ provided a comprehensive range of solutions, including ReidBar™ Coarse Threaded Reinforcement & the ReidBox™ Connection System in various diameters (16mm, 20mm, 25mm, and 32mm). These products were chosen not only for their superior performance and strict adherence to safety standards but also for their ease of installation, streamlining the construction process.

**Key Learnings and Client Impact**

The close partnership between Reid™ and Lendlease was crucial to the project's success. Reid's NSW Sales, Engineering & Project Management teams provided continuous support from the initial project meetings through to the final stages of construction. This included on-site field assistance and meticulous scheduling coordination to ensure Lendlease received the best possible products and technical expertise. Our focus on collaboration and proactive problem-solving enabled Lendlease to meet all project timelines, while maintaining the highest standards of safety and quality.

**The Victoria Cross development, featuring a 42-level tower, showcases the engineering scale of NSW Structural Reinforcing. Our partnership with Lendlease was vital, as ReidBar™ Reinforcement & the ReidBox™ System, ensuring superior performance and safety throughout the project.**
