

Malco® Drip Edge Folding Tools

– Built for Metal Roofing Pros

Precision Bending. Lightweight Strength. Professional Results.

Malco's Drip Edge Folding Tools are engineered for fast, accurate bends along the drip edge of standing seam metal roofing panels. Available in 16", 18", and 24" lengths, these rugged hand tools feature rib-reinforced steel plates and a high-leverage, ergonomic design to deliver clean, consistent folds in up to 22-gauge steel.

Product Features:

Two Folding Depths in One Tool

Each tool creates precise **1" (25.4 mm)** and **1-1/2" (38.1 mm)** deep bends for maximum versatility on the job.

Reinforced Steel Construction

Welded, rib-reinforced steel plates fold materials up to 22-gauge steel, offering long-lasting durability in demanding job-site conditions.

Ergonomic Fiberglass-Filled Handles

The fiberglass-reinforced nylon handle is lightweight yet strong—perfect for overhead work or bench use, reducing user fatigue.

Sized to Fit Your Panels

Choose from **16", 18", or 24" lengths** for a perfect fit with common panel widths.
