

Wilson ½ Inch Coaxial Cable

Foam Dielectric

SKU: 952006

500 ft. Spool

DESCRIPTION

This cable is designed for use with WilsonPro cellular repeaters. The cable has a corrugated copper outer conductor that allows the cable to be run throughout buildings without kinking. This high efficiency cable allows transmission from antennas to a repeater with low signal attenuation. The cable can be used in buildings where plenum cable is not a requirement.

FEATURES

- Low attenuation
- High efficiency signal transfer
- Can be terminated with ½ inch air dielectric connectors and tools
