

Edge Roller

Work. Perform. Outlast.

Limited Lifetime Warranty

3-Station Edge Roller

ER3

Assures a uniform bend along the entire length of material. Quickly adjusts for making 5/8 to 4 in. (15.9 - 102 mm) bends in 29 - 22 gauge (0.36 - 0.76 mm) steel.

The center roller station of the ER3 Edge Roller features a precision English / Metric depth gauge on one shaft leg that, when locked in place at desired setting, accurately aligns the depth of all roller stations. Large, comfortable adjustment knobs hold depth setting securely.

Outer rollers may travel off material and easily back on to complete bend because two roller stations can remain aligned on the edge of material.

Also adjusts for making curved bends. The center roller station is independently adjustable, with the outer roller stations retracted and locked, to allow for bending on a slight curve.

Capacities: Mild Steel 24 ga. - 0.014 - 0.03 in. (0.36 - 0.76 mm)

Catalog Number	Description	Bending Depth in. (mm)	Net Wt. lbs. (kg)
ER3	3-Station Edge Roller	5/8 - 4 (15.9-102)	8.5 (3.86)
