Slimeout® Condensate Pan Conditioning Tablets

Slimeout® tablets prevent plugging of the air conditioning condensate drip pans and the drain lines.

The plugging and subsequent overflow from these pans ruins ceilings, walls, furniture, carpet, and clothing, etc. causing many hundreds of dollars damage within one room, plus many times causes the loss of the resident/tenant or guest.

SlimeOut® does not release any chlorine or other noxious fumes.

This simple and economical positive protection can be used on steel, copper, galvanize, painted surfaces and other materials without damage. It is one of the few treatments that will not stain exterior wall of the structure when the line drains outside.

SlimeOut® eliminates odors...

...in window and package units and helps prevent their unsightly appearance. It keeps the pan clean and improves the operation of units that use the condensate for additional cooling.

SlimeOut® easily solves problems.

One or two tablets placed in the condensate pan periodically will prevent the pan from plugging and consequently no damage by water overflow; However, it may be necessary, for the initial application, to use more than two tablets to thoroughly clean the pan and drain. Keeping the pan clean also eliminates the swampy, musty odor in the air handling unit.

Part No.	SO100	ST200
Description	Slime Out	Slime Tab
Tablets/ Jar	100	200
Tablet Size	35 grams	20 grams
Initial Application	2 tabs/3 tons	3 tabs/3 tons
Maintenance	2 per month	3 per month
