

MerProtect[®]

PROTOCOL

INSIDE THE MERPROTECT® PROTOCOL

KIT ITEM	COUNT & SIZE
Liposomal Glutathione Complex needs to be refrigerated	1 - 100 mL Bottle
AmalgaClear®	1 - 73 gram container
Complete protocol instructions and guide	

The MerProtect® Protocol is designed to support the body in detoxifying and eliminating mercury and other metals released during removal of "silver" dental amalgams. Dental amalgam is a mixture of 50% elemental mercury, along with a powdered alloy of silver, tin, and copper.

The MerProtect® Protocol supports our powerful internal protective and antioxidant defenses, and promotes detoxification using targeted nutraceuticals. These compounds help usher toxic metals from your cells and to the GI tract where they are picked up by binding agents for safe excretion from the body.

This protectionary protocol lasts one week - with doses to be taken before, during and after amalgam removal.

THE MERPROTECT® PROTOCOL INTEGRATES TWO UNIQUE QUICKSILVER SCIENTIFIC PRODUCTS:

Liposomal Glutathione Complex: A blend of elements necessary for the glutathione system to enable natural detoxification. Contains the essential core of liposomal glutathione with nanoparticle milk thistle for broad hepatoprotection and all B vitamins necessary as cofactors for liver metabolism.

AmalgaClear®: A specially formulated and targeted binder blend that works in the gut to intercept and neutralize mercury and associated amalgam metals. AmalgaClear ingredients include Quicksilver's proprietary thiol-functionalized silica and modified citrus pectin, both aiding metal binding in the GI; and buffered vitamin C for broad-spectrum antioxidant capacity, and the soothing and fluidizing prebiotic acacia gum.

PROTOCOL INSTRUCTIONS

Please follow the dosage schedule below, taking Liposomal Glutathione Complex first and AmalgaClear® second, in matched doses.

A dosing cycle consists of one teaspoon of Liposomal Glutathione Complex held 30 seconds before swallowing; followed 30 minutes later by one teaspoon of AmalgaClear® stirred into four to eight ounces of water.

Suggested use: One complete dosing cycle completed at least 20-30 minutes before a meal.

1. Take a dose of Liposomal Glutathione Complex (remember to hold in mouth 30-60 seconds before swallowing.)
2. 30 minutes later take a dose of AmalgaClear®
3. Wait 30 minutes before eating

In a perfect setting, waiting 30 minutes is optimal, but intervals may be adjusted down to 20 minutes to accommodate a hectic schedule. As long as the dosing cycles are spaced at intervals throughout the day the protocol will be effective.

PROTOCOL INSTRUCTIONS

DAY 1-2 (2 DOSES PER DAY)				
PRODUCT	A.M.	30 MIN. LATER	P.M.	30 MIN. LATER
Liposomal Glutathione Complex	1 tsp		1 tsp	
AmalgaClear™		1 tsp in water		1 tsp in water
*Make sure to drink adequate water when taking charcoal-containing supplements				

Disclaimer: This system is not intended to diagnose or treat any disease. The dosing schedule below is designed to serve as a guide and should not supplant guidance concerning the use of these supplements provided by your healthcare practitioner.

Caution: Because AmalgaClear® contains substances which may affect the absorption of medications, it should be taken at least two hours before or after prescription medications.

DAY 3 (AMALGAM REMOVAL - 4 DOSES PER DAY)

PRODUCT	A.M.	30 MIN. LATER	MIDDAY	30 MIN. LATER
Liposomal Glutathione Complex	1 tsp		1 tsp	
AmalgaClear™		1 tsp in water		1 tsp in water
PRODUCT	P.M.	30 MIN. LATER	BEFORE BED	30 MIN. LATER
Liposomal Glutathione Complex	1 tsp		1 tsp	
AmalgaClear™		1 tsp in water		1 tsp in water

*Make sure to drink adequate water when taking charcoal-containing supplements

DAY 4-7 (3 DOSES PER DAY)

PRODUCT	A.M.	30 MIN. LATER	MIDDAY	30 MIN. LATER
Liposomal Glutathione Complex	1 tsp		1 tsp	
AmalgaClear™		1 tsp in water		1 tsp in water
PRODUCT	P.M.		30 MIN. LATER	
Liposomal Glutathione Complex	1 tsp			
AmalgaClear™			1 tsp in water	

*Make sure to drink adequate water when taking charcoal-containing supplements

PROTOCOL PRODUCTS

LIPOSOMAL GLUTATHIONE COMPLEX:

Specifically formulated to enhance detoxification in preparation for the day of amalgam removal. Glutathione is the centerpiece, a molecule critical for detoxification, which binds to and helps move mercury and other metals out of the tissues. In its liposomal formulation glutathione is protected from stomach acids and digestive enzymes, and liposomes show enhanced ability to deliver nutrients into the cell.

A complete suite of B-complex vitamins provide support for cellular and hepatic function. The B-complex vitamins are offered in highly bioavailable forms to meet increased demand during active detoxification. Nanoparticle milk thistle helps stabilize and protect the liver during this time of high activity.

The liposomes in this formula contain pure phosphatidylcholine, an essential component of bile and a central element of the cell membrane structure that encourages cellular health, function, and repair.

PROTOCOL PRODUCTS

AMALGACLEAR®:

A blend of two binders with high affinity for mercury and other metals, able to capture and bind them in the GI tract. Capturing metals can help prevent their redistribution and can aid elimination.

The formula includes IMD® (Intestinal Metals Detox), a non-absorbed proprietary thiol-functionalized silica compound with specific affinity for mercury. Modified citrus pectin is included for its affinity for mercury and other heavy metals. Buffered Vitamin C, gentle to the digestive system, offers broad-spectrum antioxidant action. Because binders can be constipating, acacia gum, a bifidobacterial-feeding prebiotic fiber that is soothing, fluidizing and healing to the gut lining, is included in the blend.
