

Limited Lifetime Warranty

PEX Tubing Uncoiler

Use for hydronic in-floor radiant heating layout and for running potable tubing. The open case serves as the unit's base. No tools are required to assemble. A heavy-duty turntable supports a full coil of PEX (polyethylene cross-linked tubing). Eyelet loop opens for easy feeding or removal of tubing from Uncoiler unit. Rotating eyelet arm allows tubing to be pulled off in any direction. Factory-adjusted tension prevents backlash and spreading of tubing coil off the turntable.

Accommodates all types of PEX tubing: 1000 ft. (305 m) of 3/8 to 1/2 in. (9.5 to 12.7 mm)
500 ft. (152 m) of 5/8 to 1 in. (15.9 to 25.4 mm)

Organize and dispense PEX Tubing easily and efficiently for a more uniform layout.

EASY STEP BY STEP ASSEMBLY

**Fast Set-Up, Easy Loading
and Dispensing.**
